3 Different gear options are available for the Aventador.

Option 1 - fixed 1:1 - good for 1 battery

Option 2 - fixed 1:1.6 - fast speed works well with 1 or 2 buwizz or 2 lipo batteries

Option 3 - Gear selector - works with 1 or 2 batteries.

Regarding the 2 speed, this is a very large car and it puts a bit of strain on the drive system. If you move the car slowly at first to pickup speed, the gearing works.
