This diagram illustrates step 384 of a LEGO Technic assembly. A red sub-assembly, which includes a grey motor and various connectors, is being positioned to be attached to a larger white structure. A red outline highlights the specific area on the white structure where the red piece is being placed. The assembly is built on a base of white Technic bricks and beams. A grey motor is visible on the right side of the assembly, connected to a series of gears and connectors. The diagram shows the precise placement of the red sub-assembly onto the white structure.
