

BATTLESTAR GALACTICA

Cylon Raider

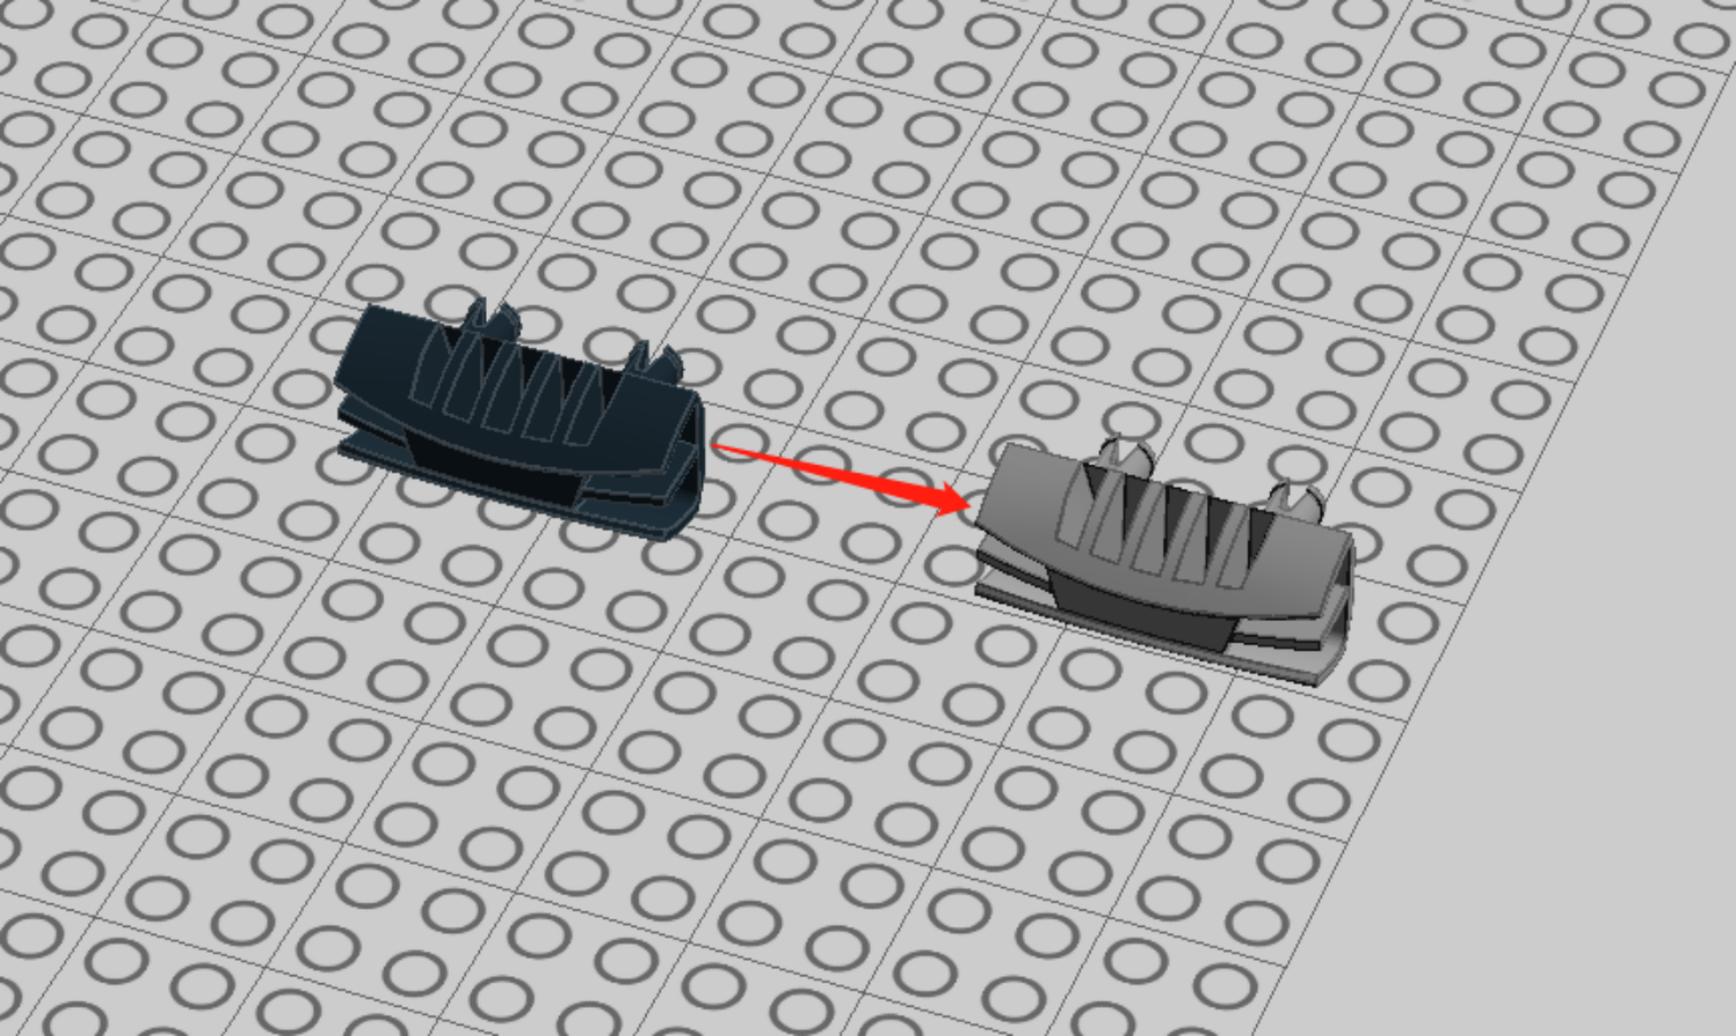

Class	Interceptor Class
Alignment	Cylon
Size	8.54 meters long, 5.59 meters wide
Power System	Nuclear fusion with the upper 48 seconds of peak
Engine	Sublight propulsion (1.1 G max)
Top Speed	Maximal 6.3 G atmospheric thrust (2.5 G max accel)
Weapons	Kinetic energy weapons and nuclear missiles
Crew/Passengers	None, but mechanical high control system (Shuttle's remote operable)

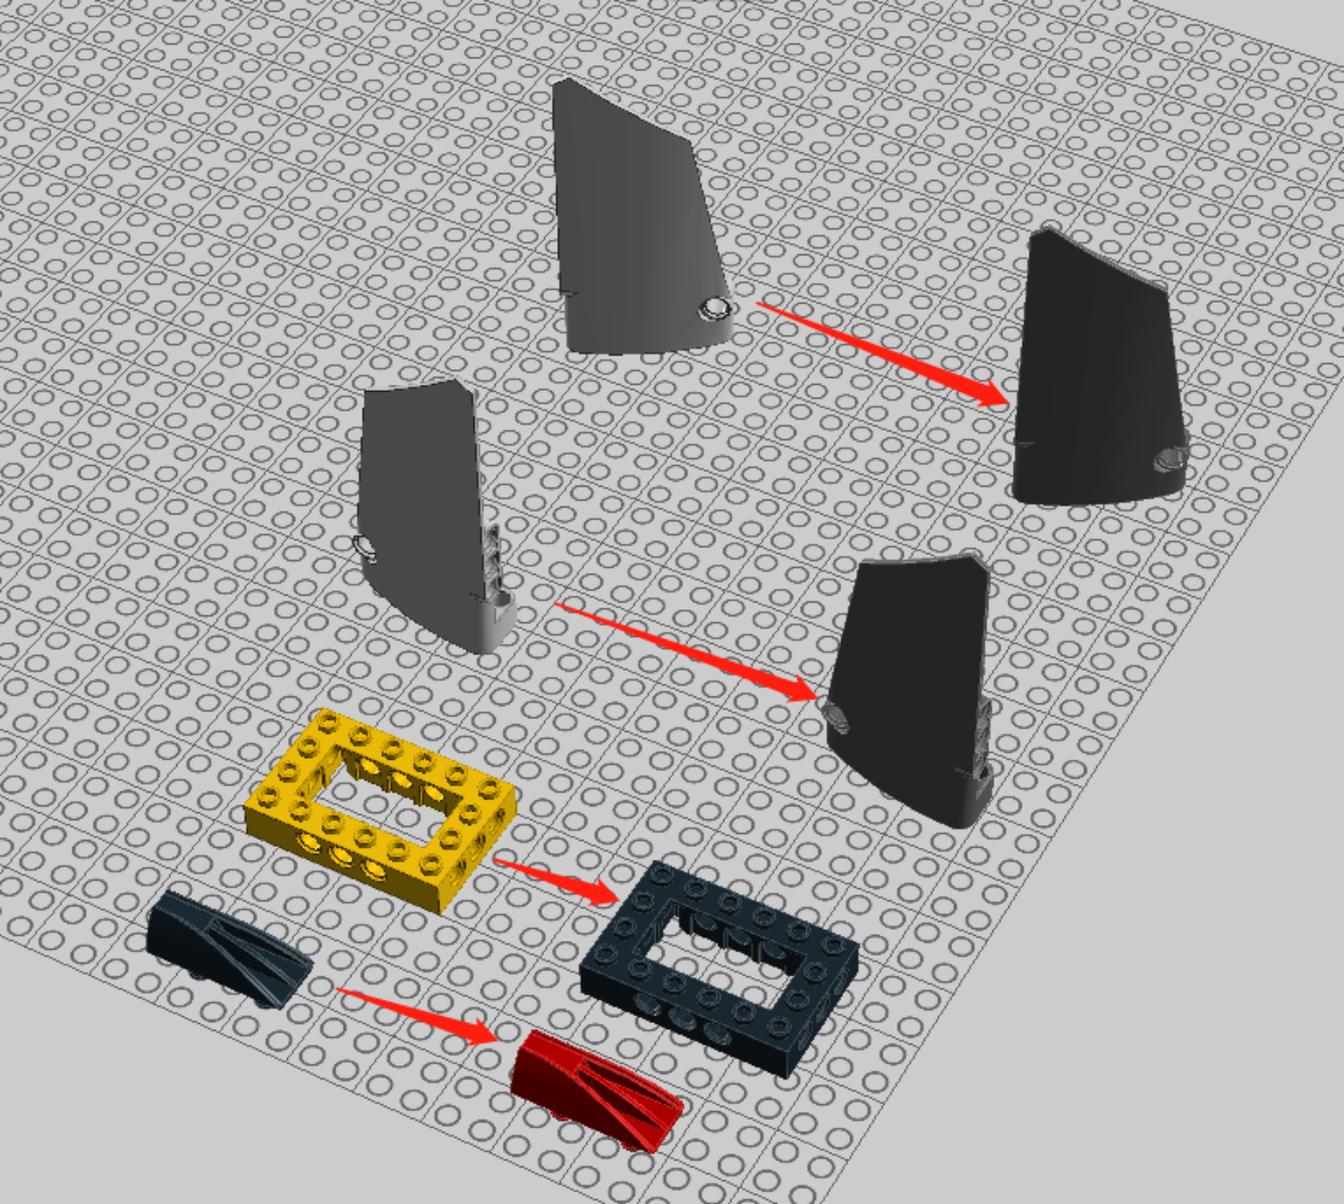

注意：

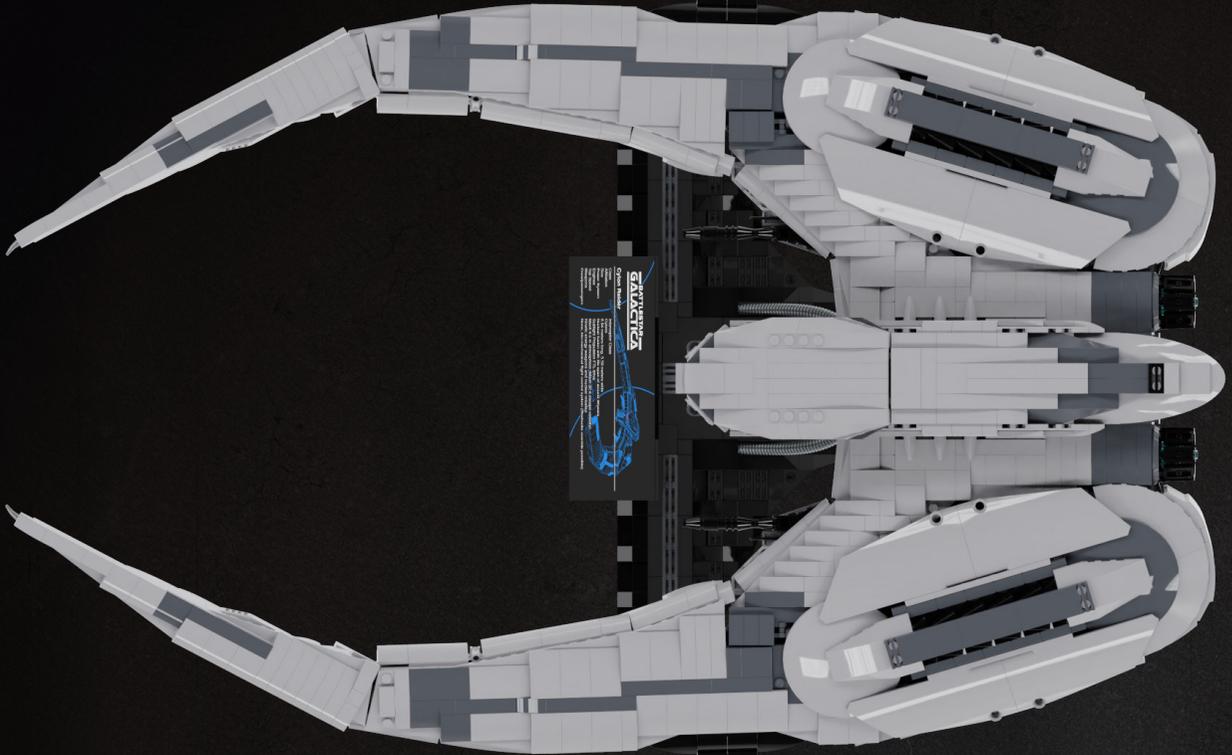

套装不包含印刷零件、贴纸、物品、动物、人仔、及人仔相关配件、道具。

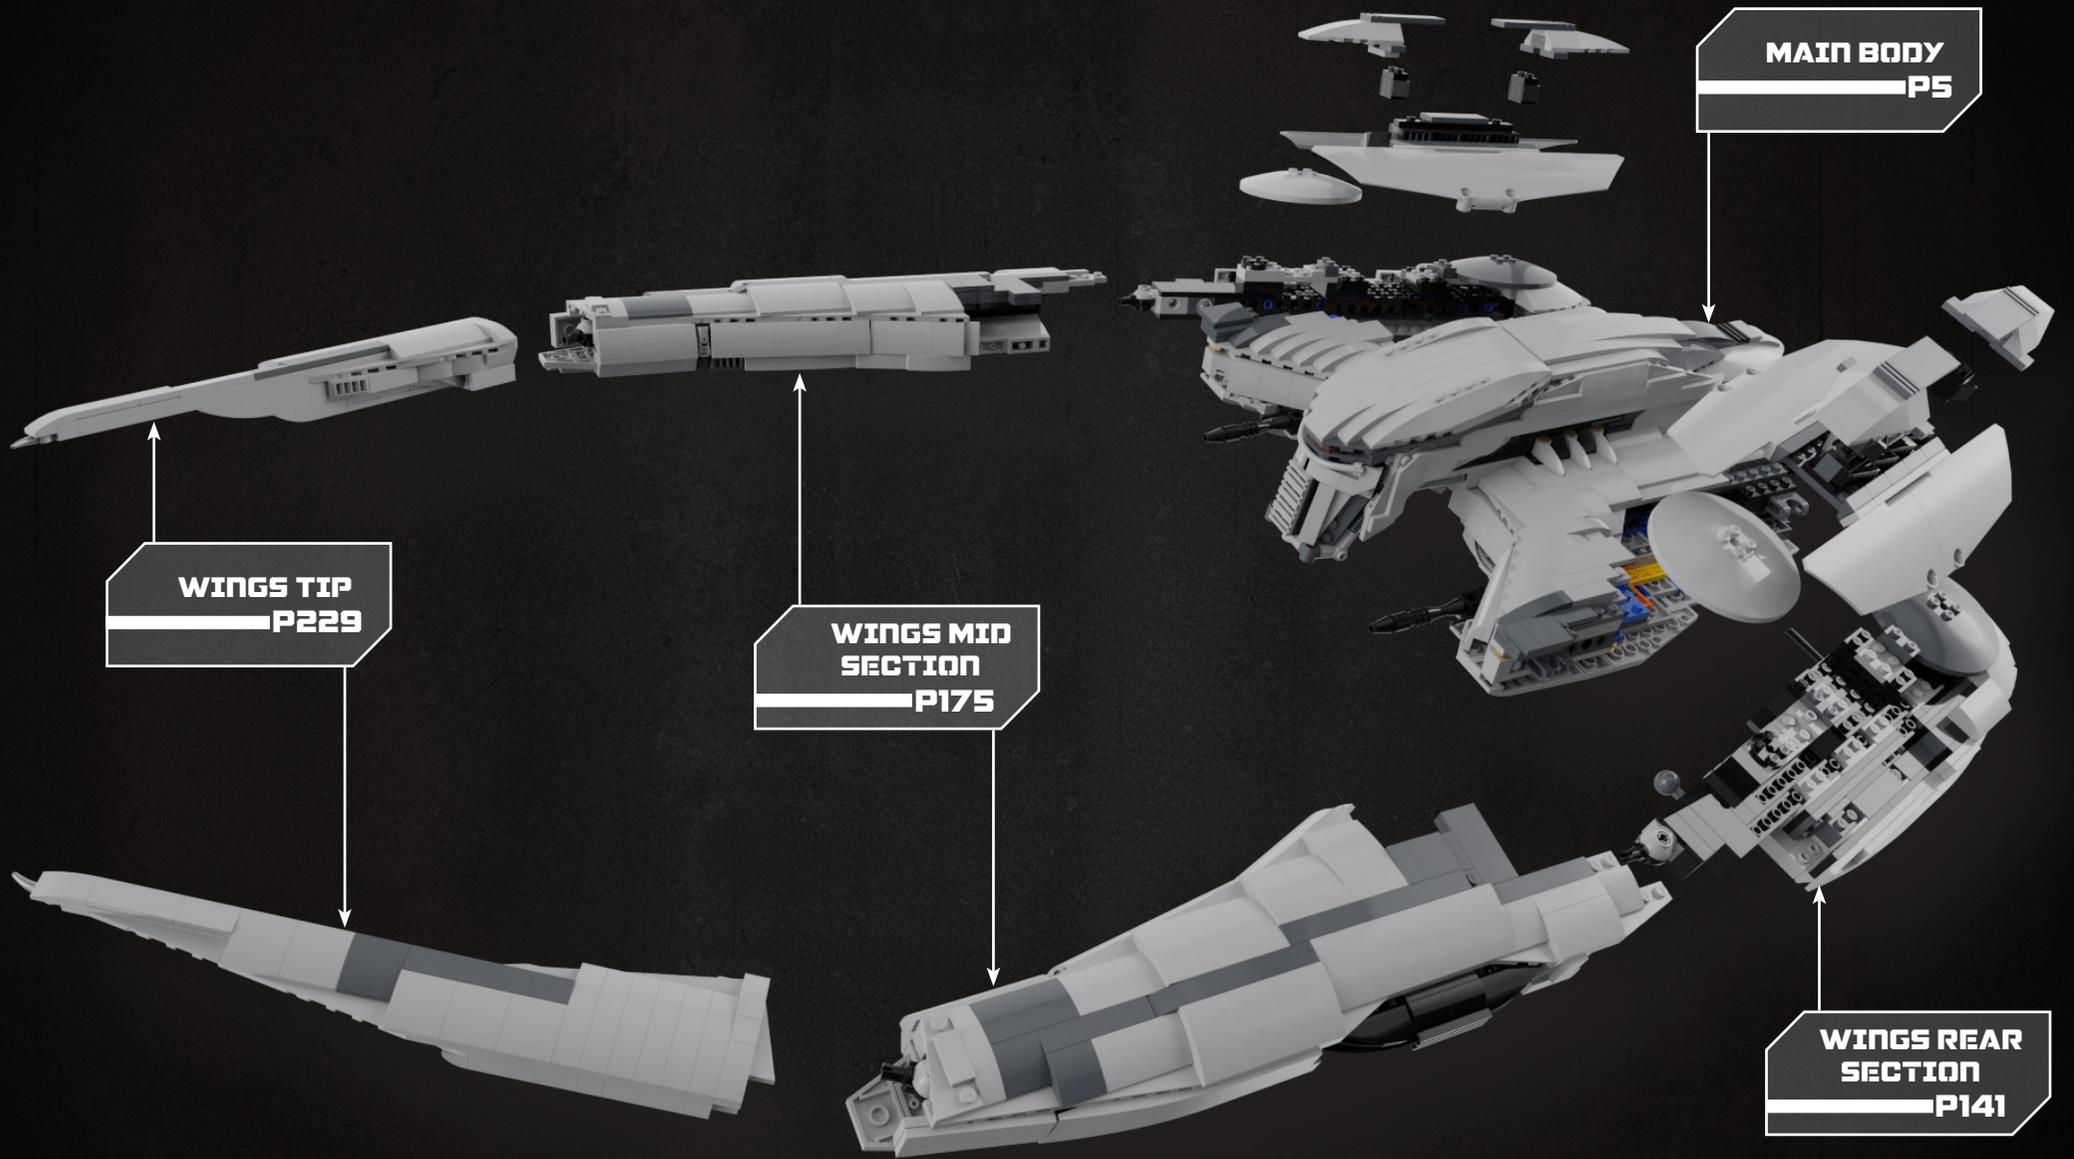

NOTE:

NO printed parts, stickers, objects, animals, minifigures or mini tools contained.

7 ↻

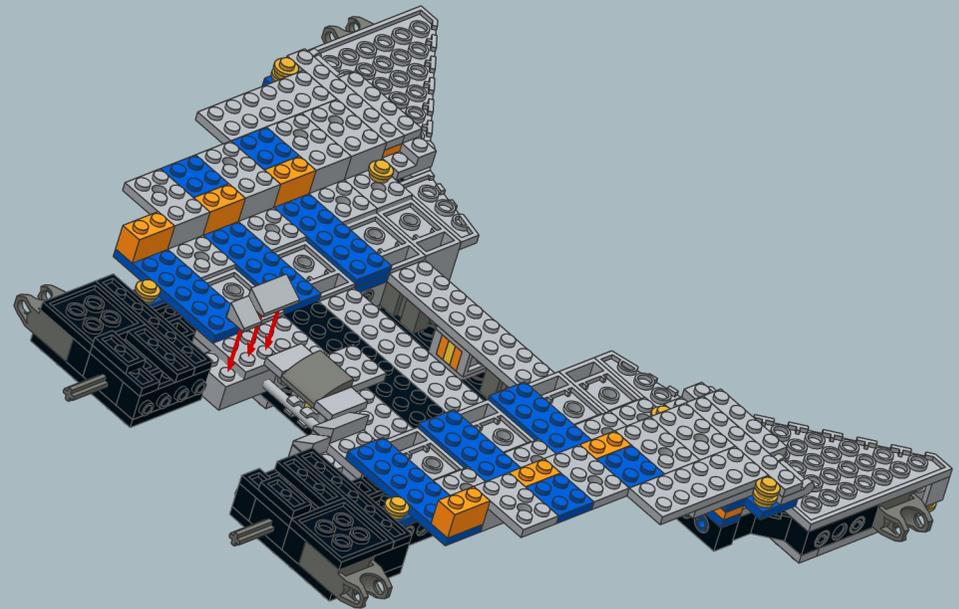

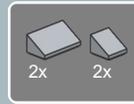

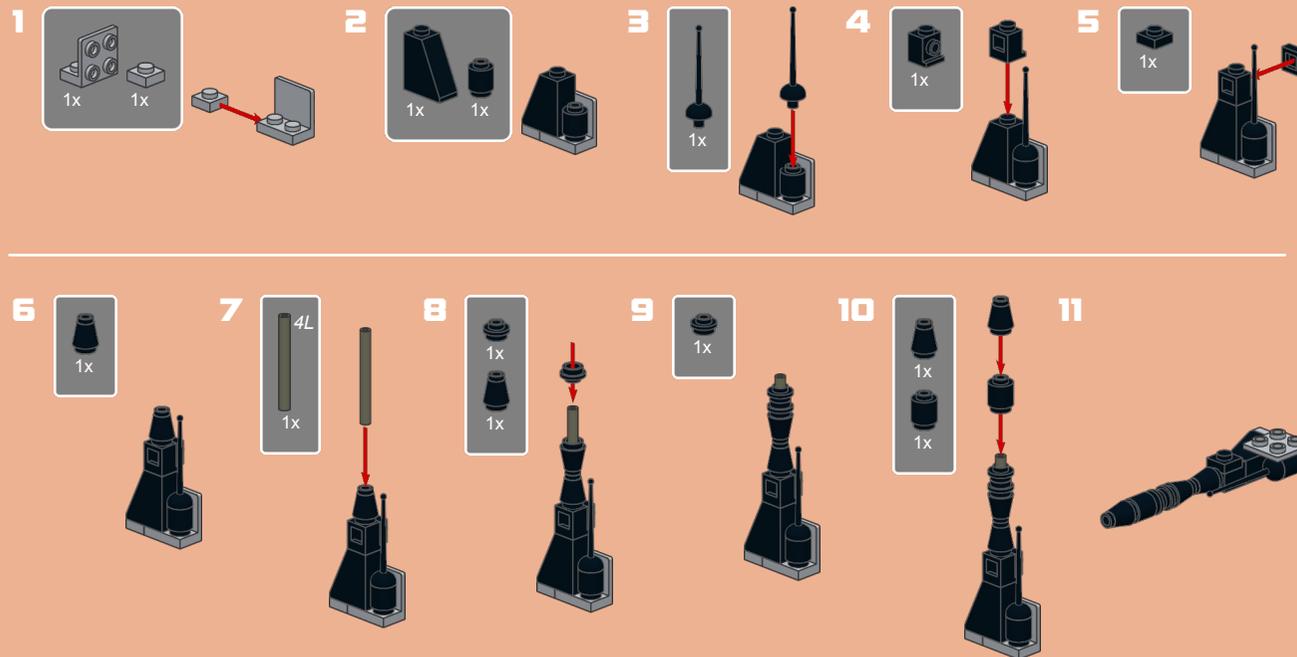

NOTE: the two 1x2 tiles and the 2x2 rounded slope will have a tendency to disconnect regularly. You can choose to keep this step for the very end of the build.

8

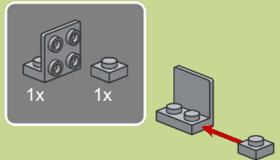

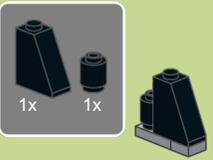

9

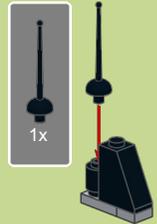

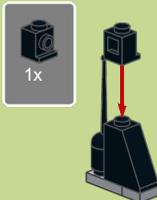

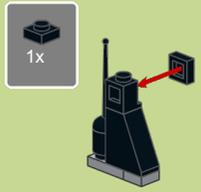

NOTE: Use of hollow rigid hoses is to allow for the cable routing in case you might want to install lighting effects for the cannons. Otherwise, a simple 4L Lightsaber bar is fine.

13 

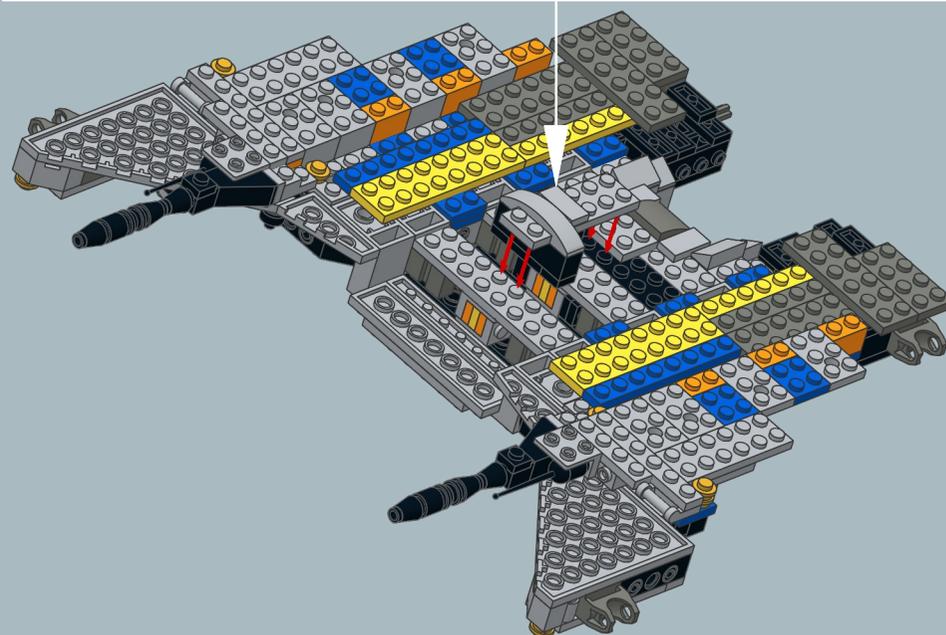

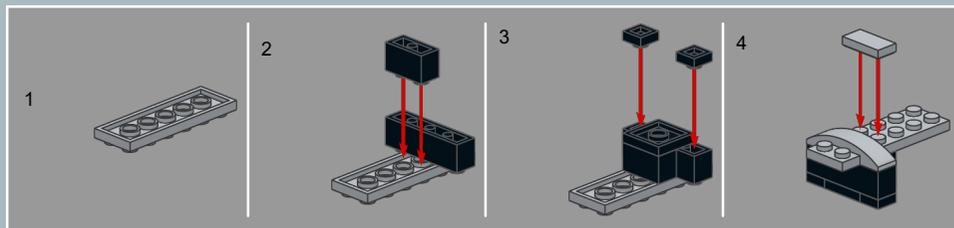

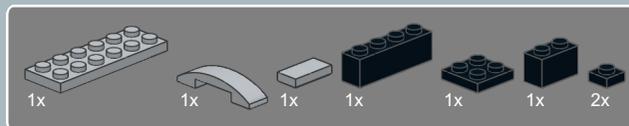

14

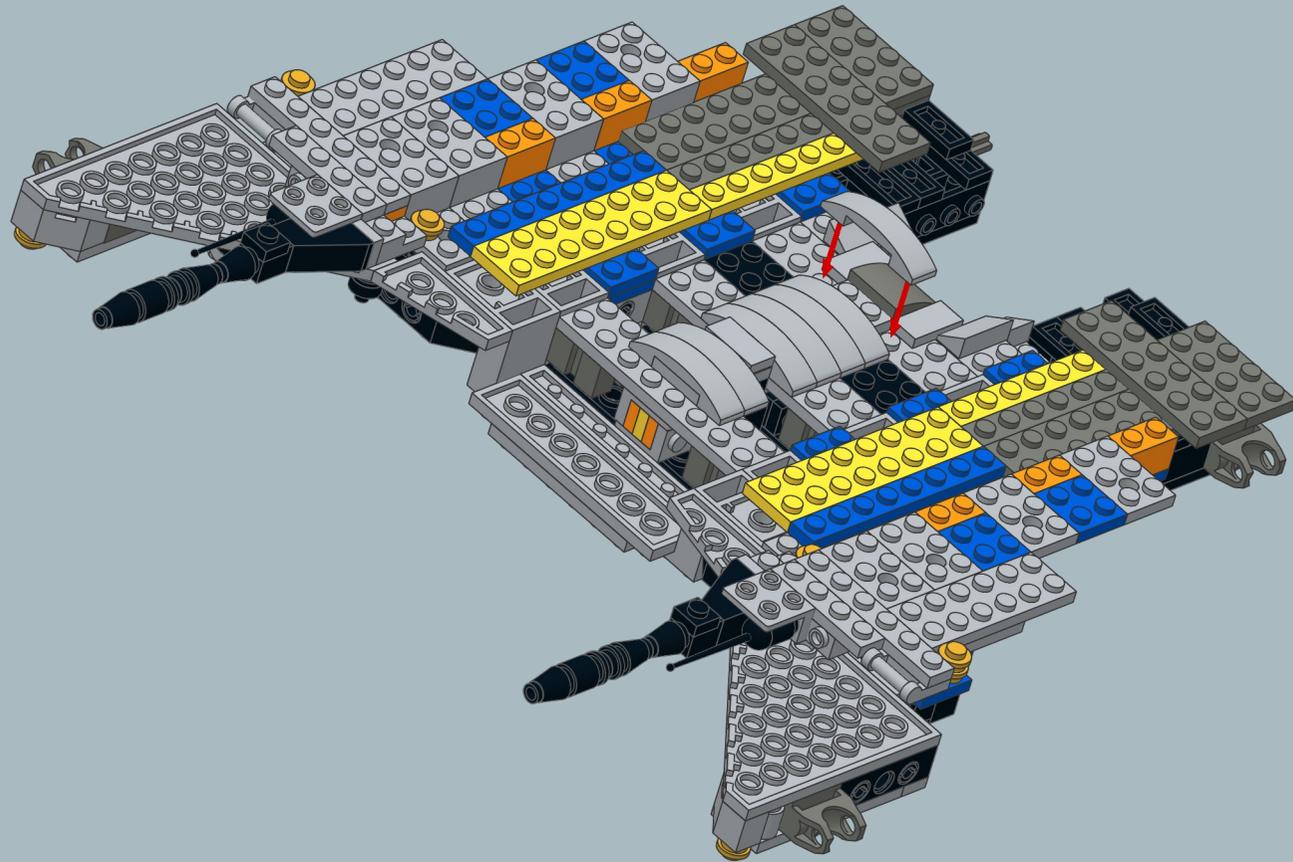

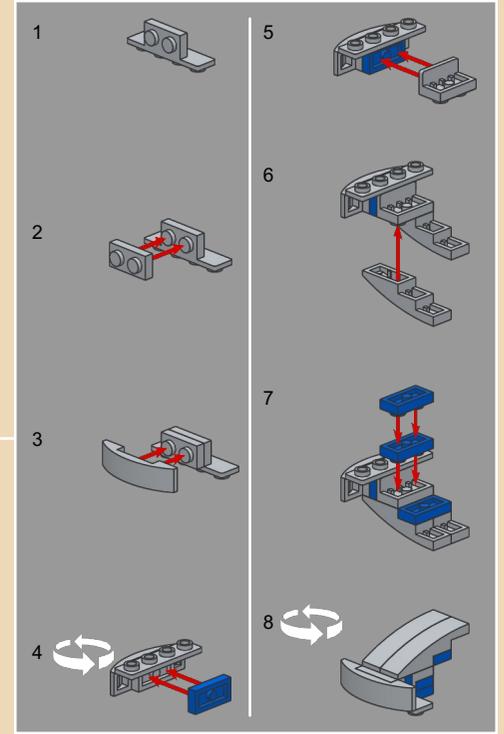

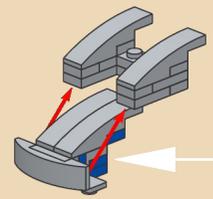

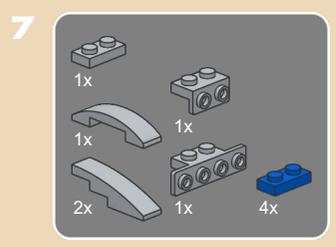

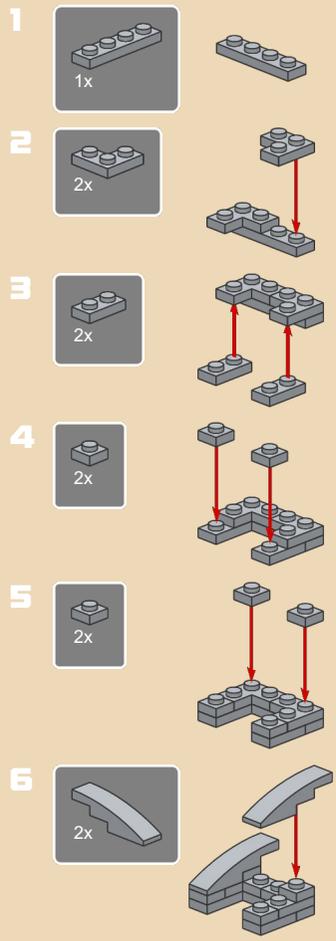

15

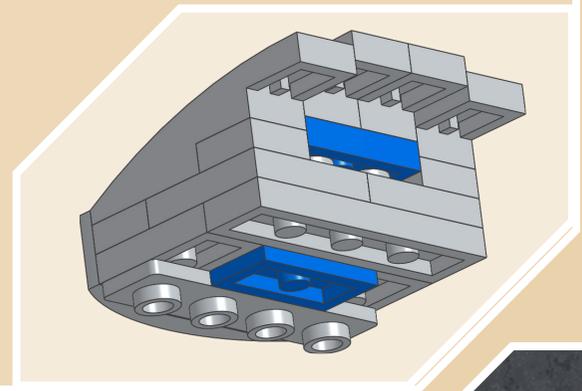

16

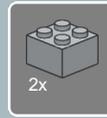

NOTE: as shown on the zoomed view, the two parts of this sub-assembly are not connected together at this stage. A half plate gap remains below the 1x2 blue plate. All will be settled in place once connected to the main body at the next step.

9  

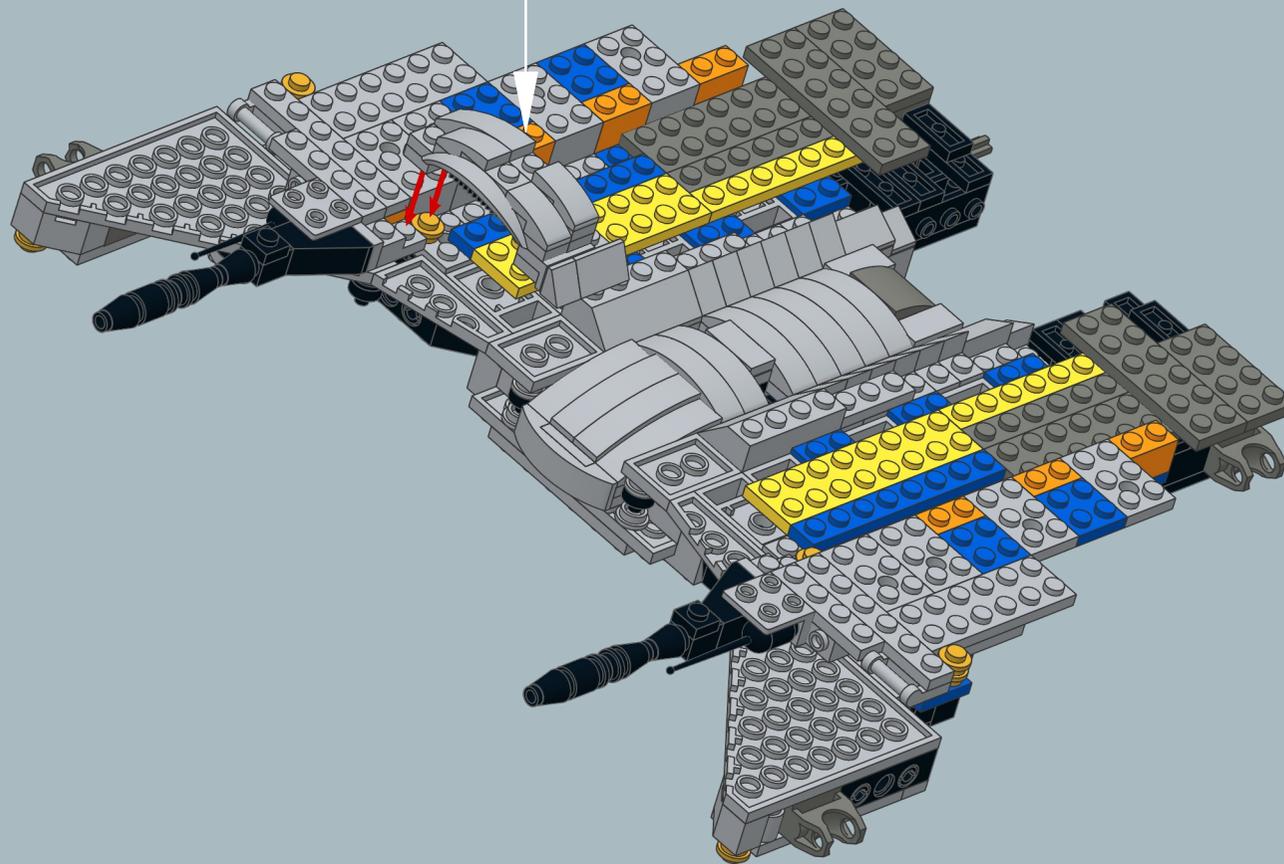

10  

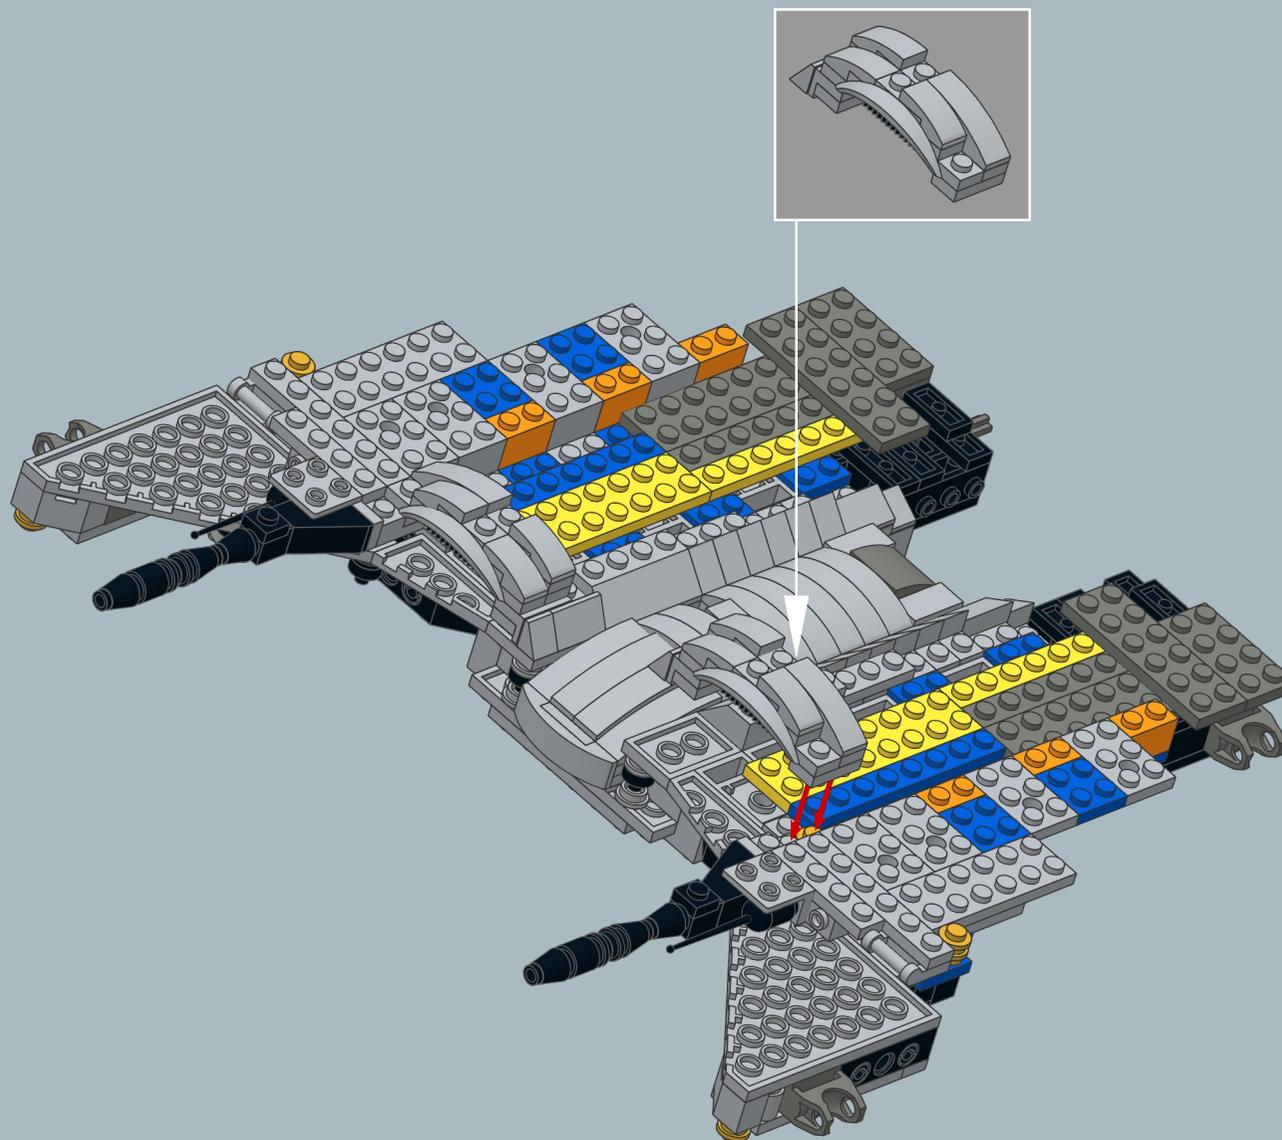

11  

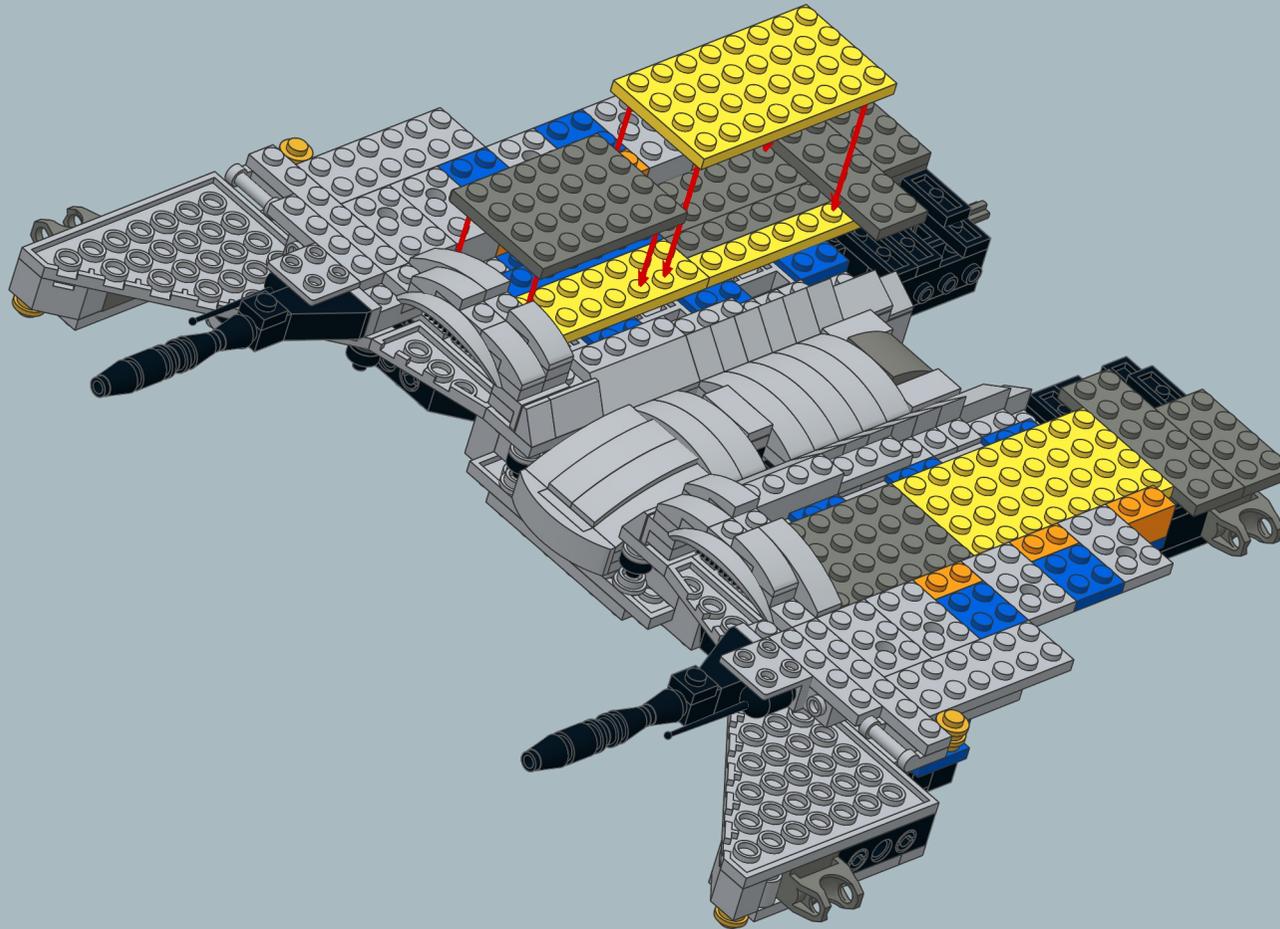

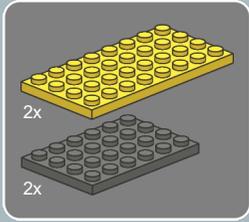

12  

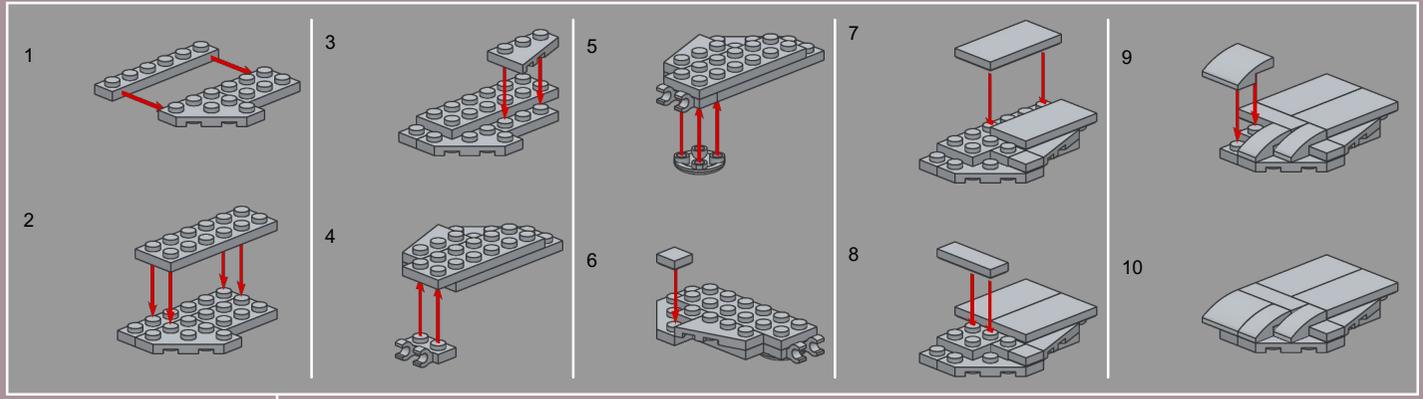

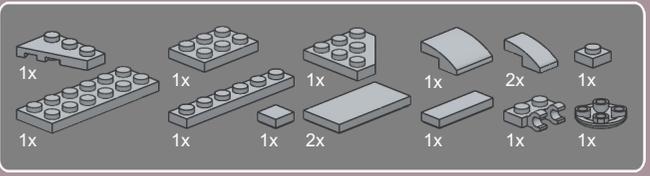

NOTE: At this stage the two intakes are attached on two studs on one side only, which is quite weak, but the next steps will reinforce the connection, and the final assembly will be firmly hold together.

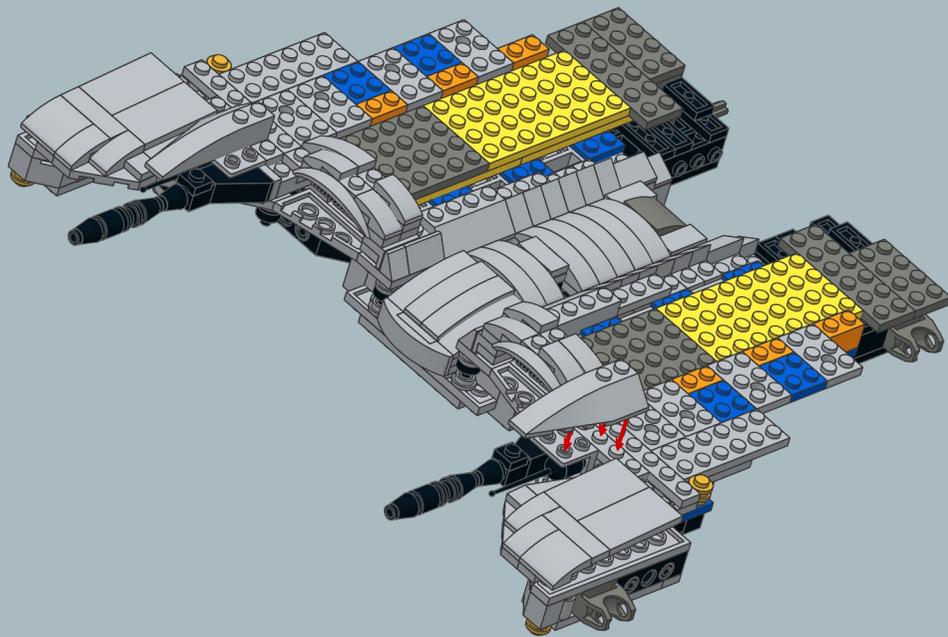

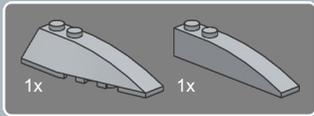

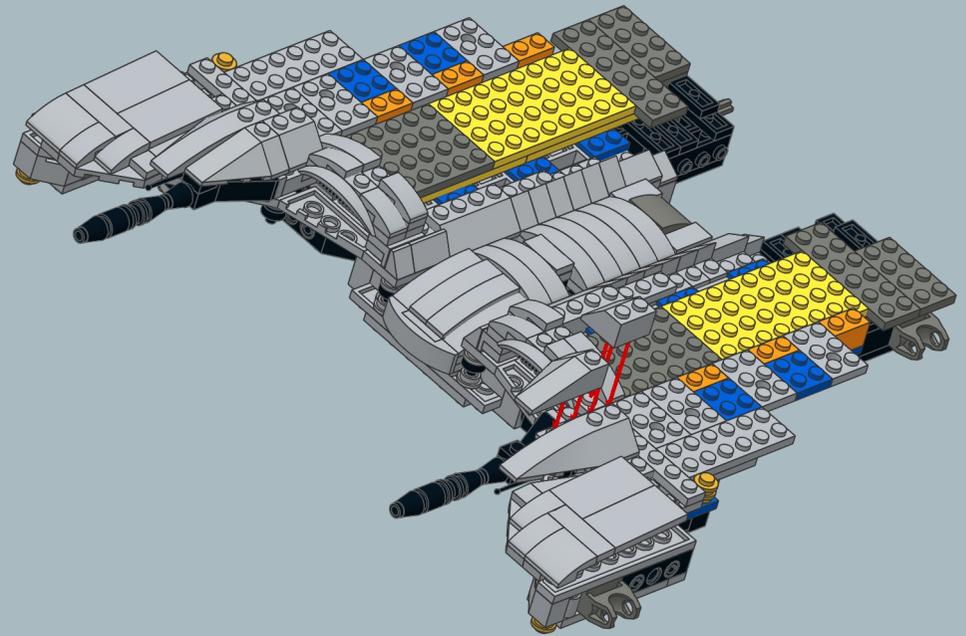

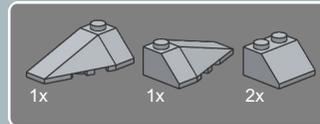

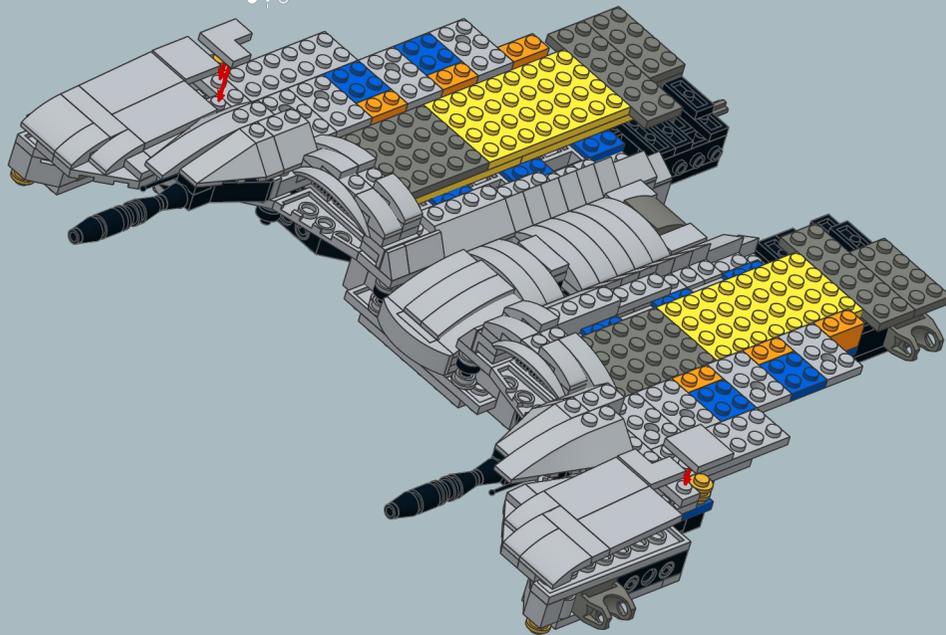

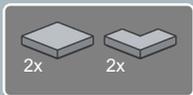

31

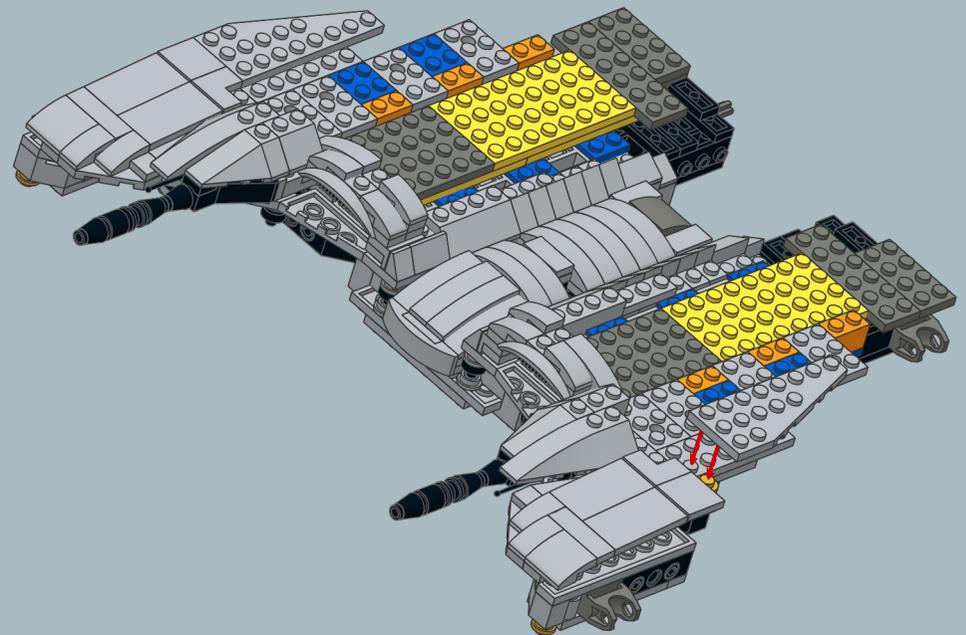

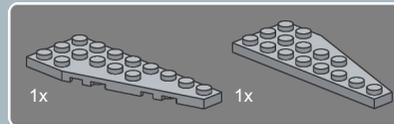

32

33

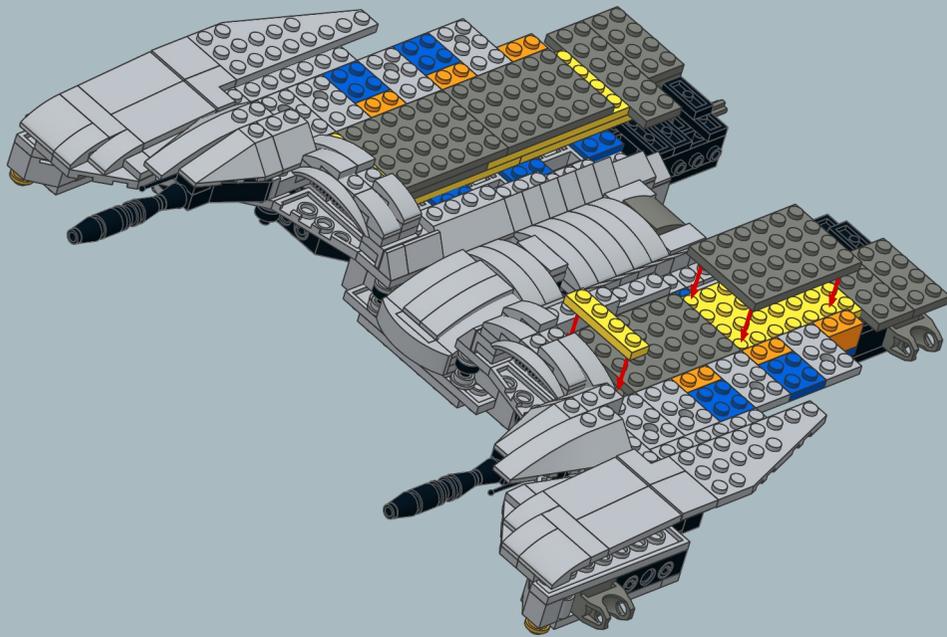

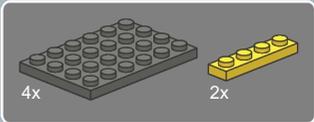

34

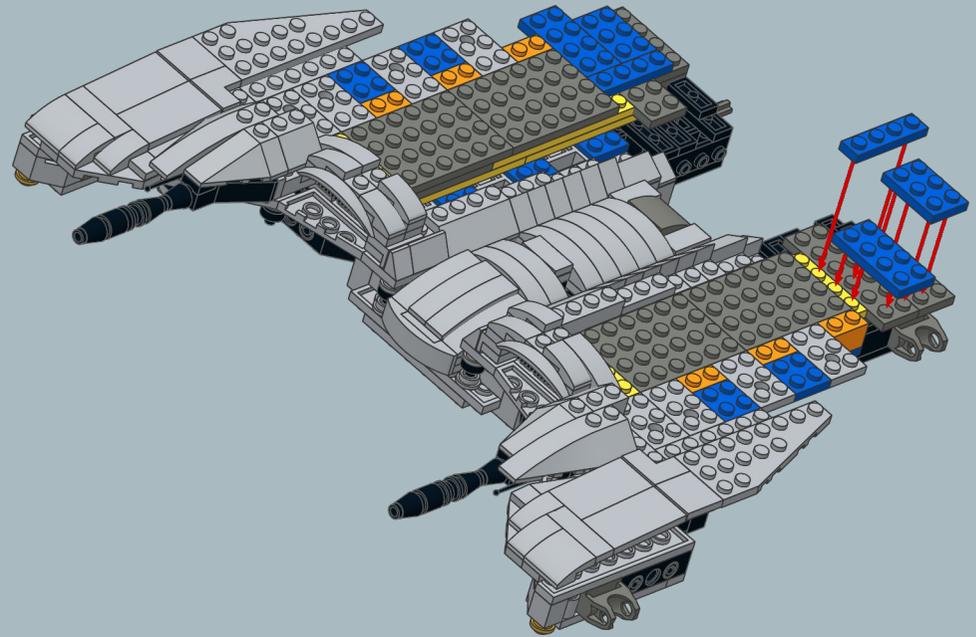

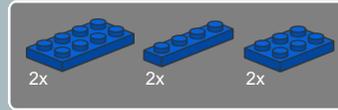

NOTE: the 2x2 tile only holds on 1 stud, and may fall from time to time during the manipulations, or when the wings rear section will be connected. They can be re-installed very easily.

NOTE: this step is quite tricky, and you may see some small parts falling off. Normally, they should all be easily put back in place. I advice to engage the front ball joint first, and then to rotate the wing assembly to insert the rear ball joint. The angle will be naturally defined, as the assembly will come into contact in several points: rear 1/4 round piece against reactor housing, Main Body bottom wedges against rear wing assembly bottom, and cross axle against the black plate.

NOTE: this step is probably the trickiest one of the whole assembly. You will not be able to see the connection pin during the assembly, so you need to carefully check the correct alignment of the pin, and insert the wings mid-section on the same axis before to start pushing.

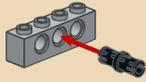

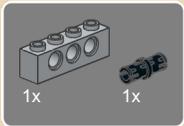

Also once connected (you need to feel the «click»), the wings mid-section will not be firmly attached to the rest of the ship, and will tend to bend forward. This will be completely solved after STEP 7 and STEP 8.
