This diagram illustrates a complex LEGO Technic assembly, likely a motorized vehicle or machine. The central component is a large yellow motor or actuator, which is connected to a black frame. The frame is constructed from black Technic beams and connectors, with various mechanical parts like gears, axles, and springs visible. A black axle with a grey gear is shown extending from the motor. The assembly is supported by a black base. A black arrow points to a specific connection point on the base, indicating where a part should be attached. The diagram is labeled with the number 204 in the top left corner.
