This image shows step 62 of a LEGO building process. The main structure is a stone bridge base built on a large green 16x16 plate. The bridge is supported by four grey stone pillars. A red box highlights the three grey stone pillars that are being placed on the green plate. An inset box in the top left corner shows the parts to be used: two small grey stone pillars (labeled '2x') and one larger grey stone pillar (labeled '1x'). The bridge deck is made of green and yellow bricks. In the background, there is a brown building with a white roof and a small yellow figure. The base of the entire structure is a dark blue plate with three white circular patterns.

This image shows step 59 of a LEGO Technic assembly. The base is a large blue Technic plate. A green Technic beam runs along the top edge. On the left, there is a brown structure with a light blue roof. In the center, a brown Technic beam is supported by several white Technic pillars. A red outline highlights a new assembly being added to this beam. This assembly includes a black Technic motor, a black Technic gear, and a black Technic axle. A yellow Technic pin is used to connect the axle to the motor. The red outline also encompasses a black Technic connector piece and a black Technic axle that is already attached to the motor. The assembly is being placed on the blue plate, with the green beam visible at the top.
