127

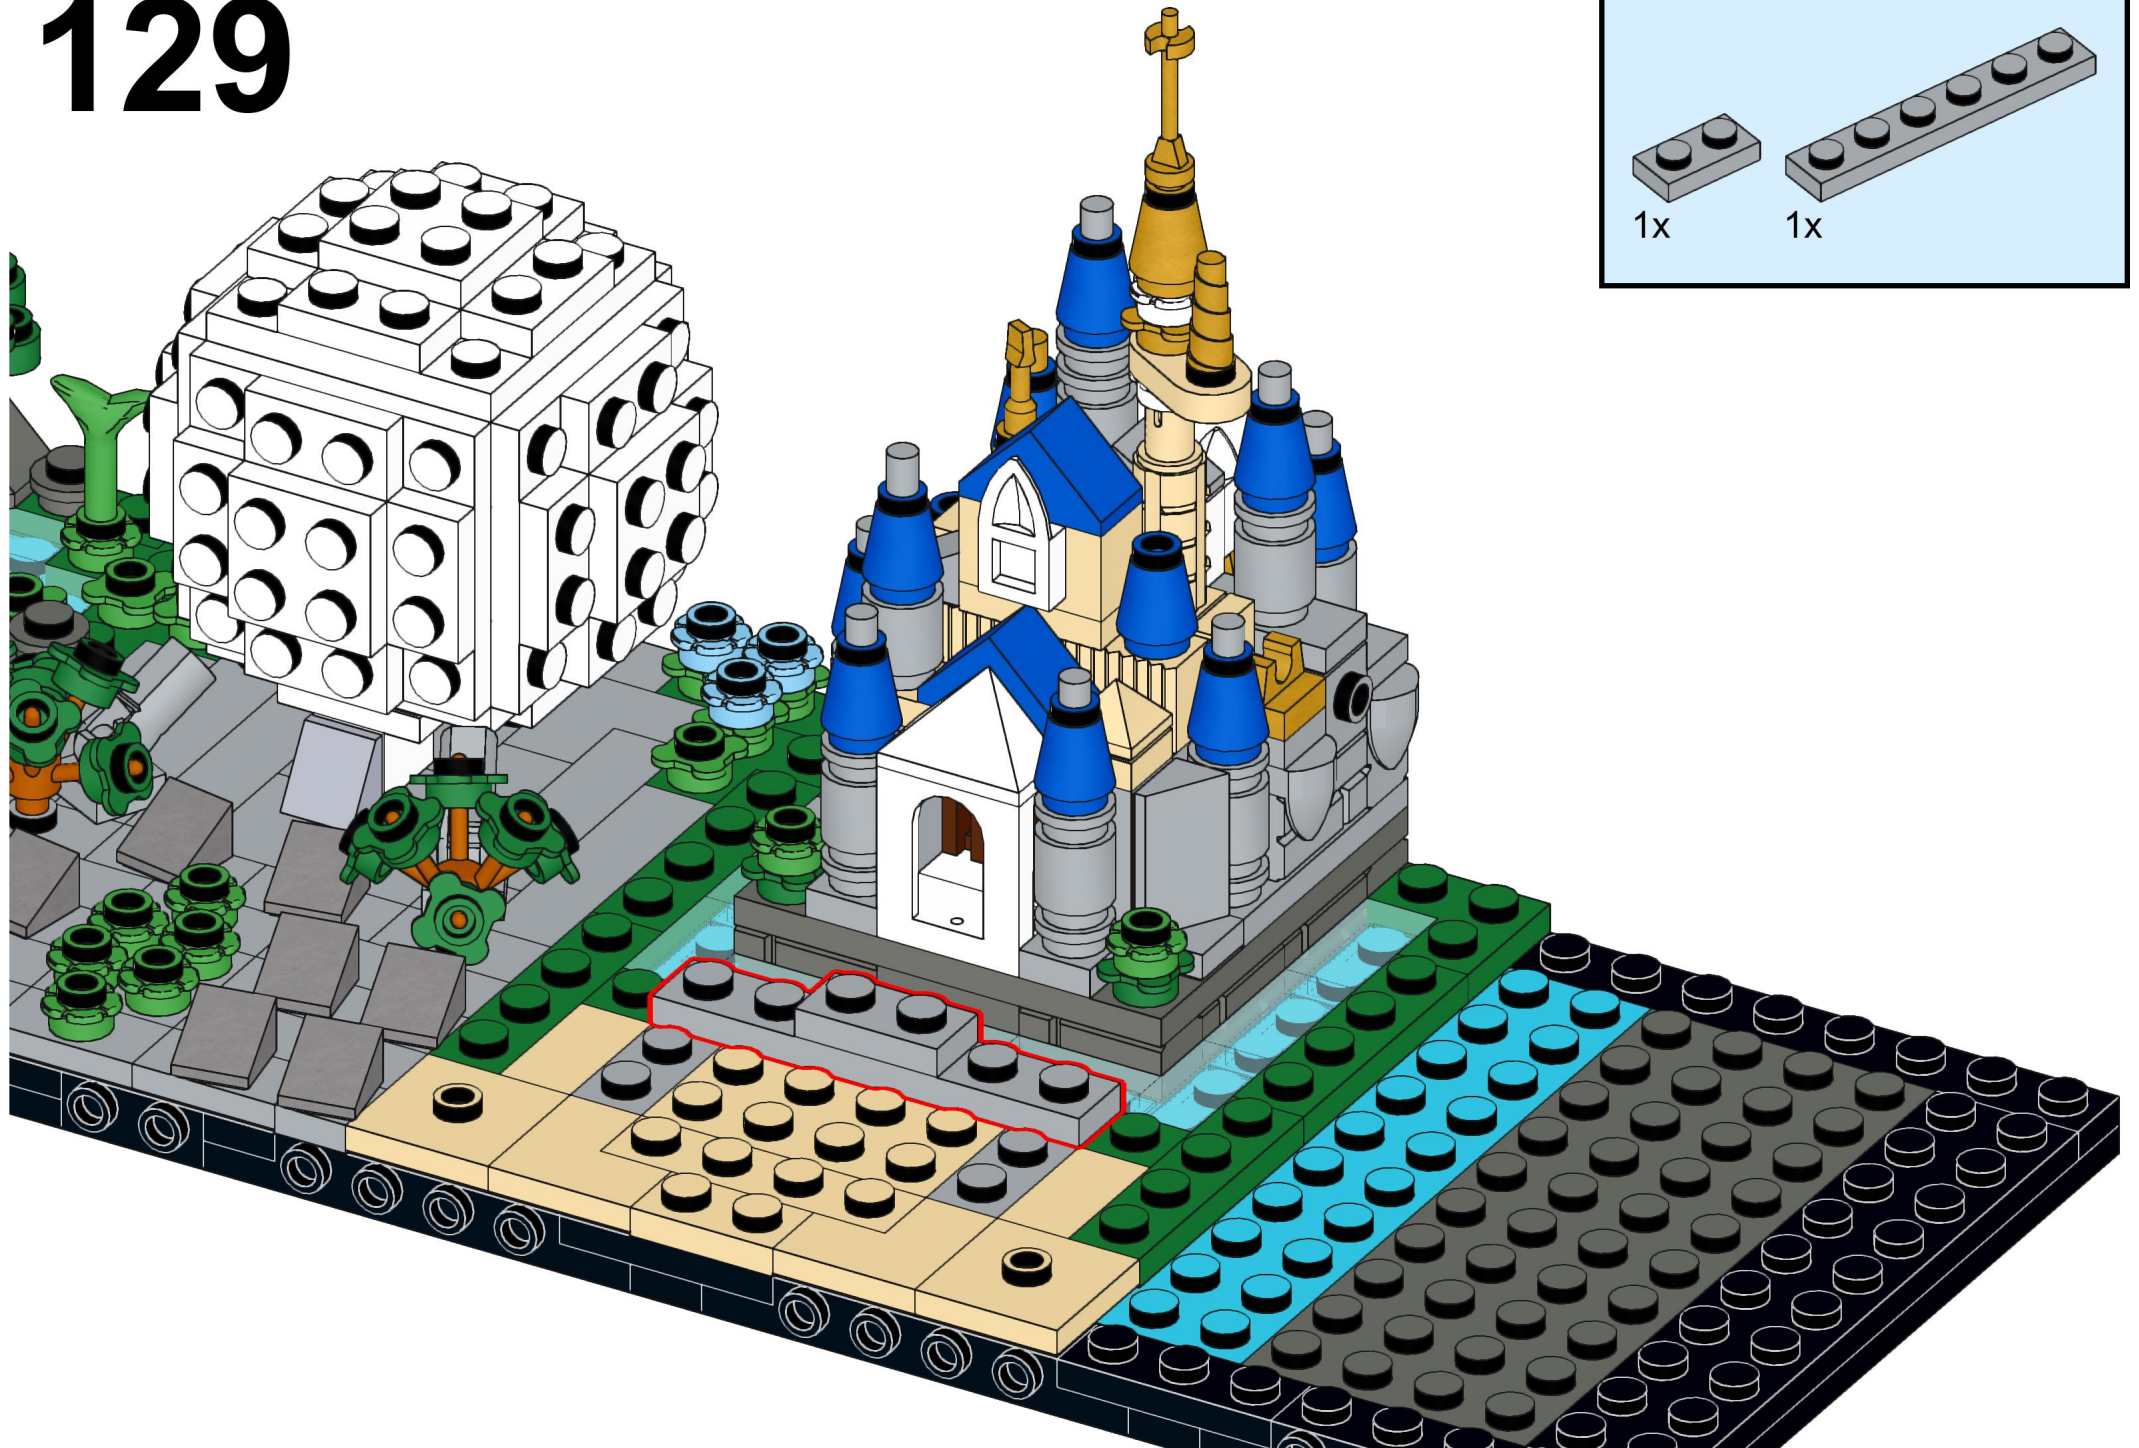

128

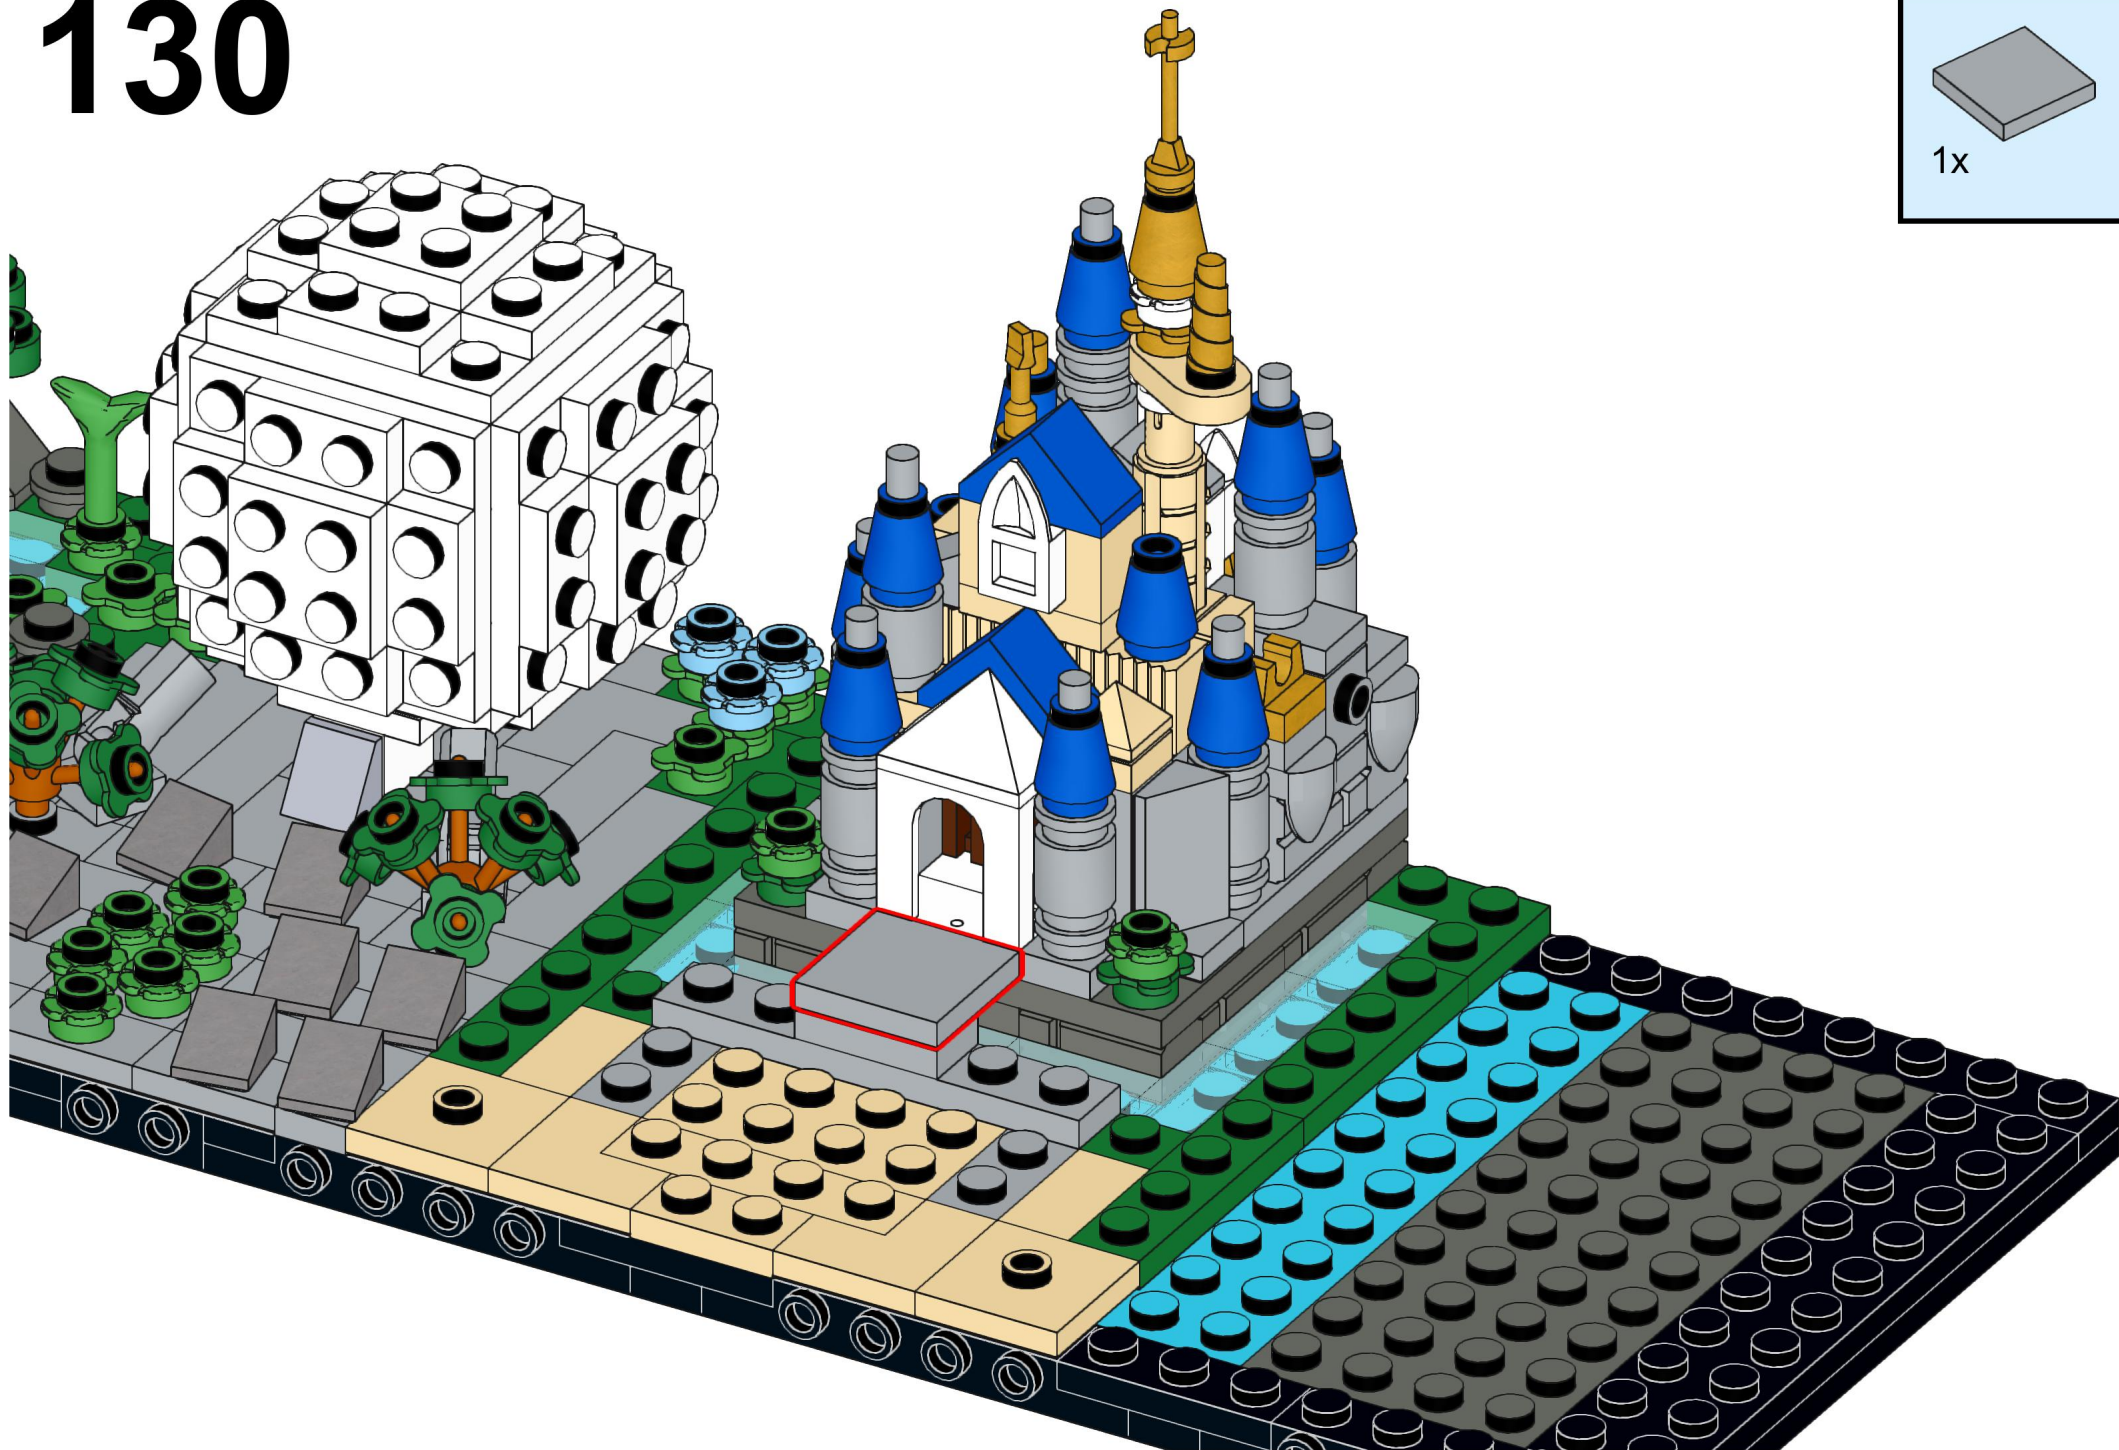

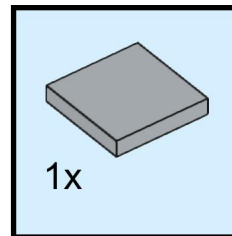

Fun fact: Visitors are optically fooled into “seeing” the castle as much higher than it actually is. As the building becomes taller, the design proportions become smaller. The top spire is actually almost half of its perceived size.

The brick further away has studs on both sides.

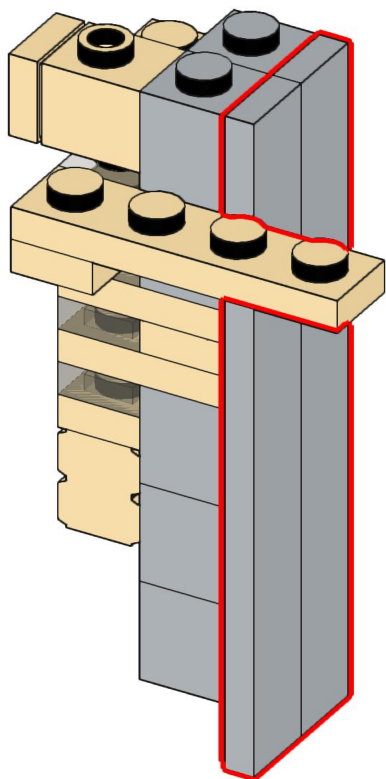

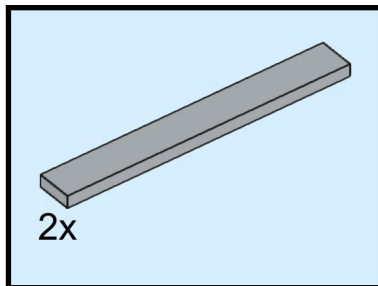

198

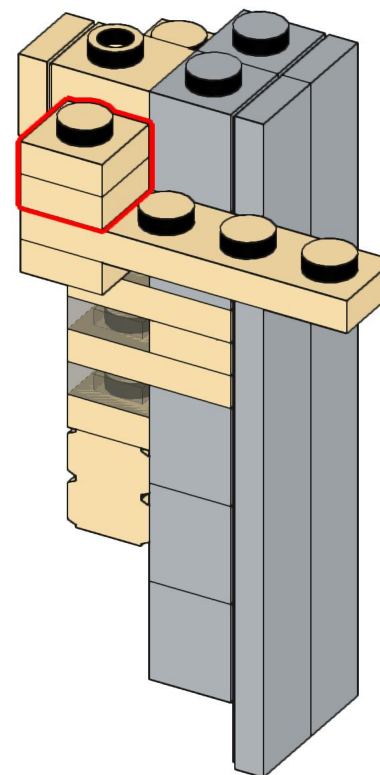

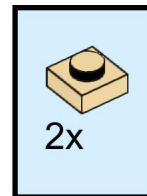

199

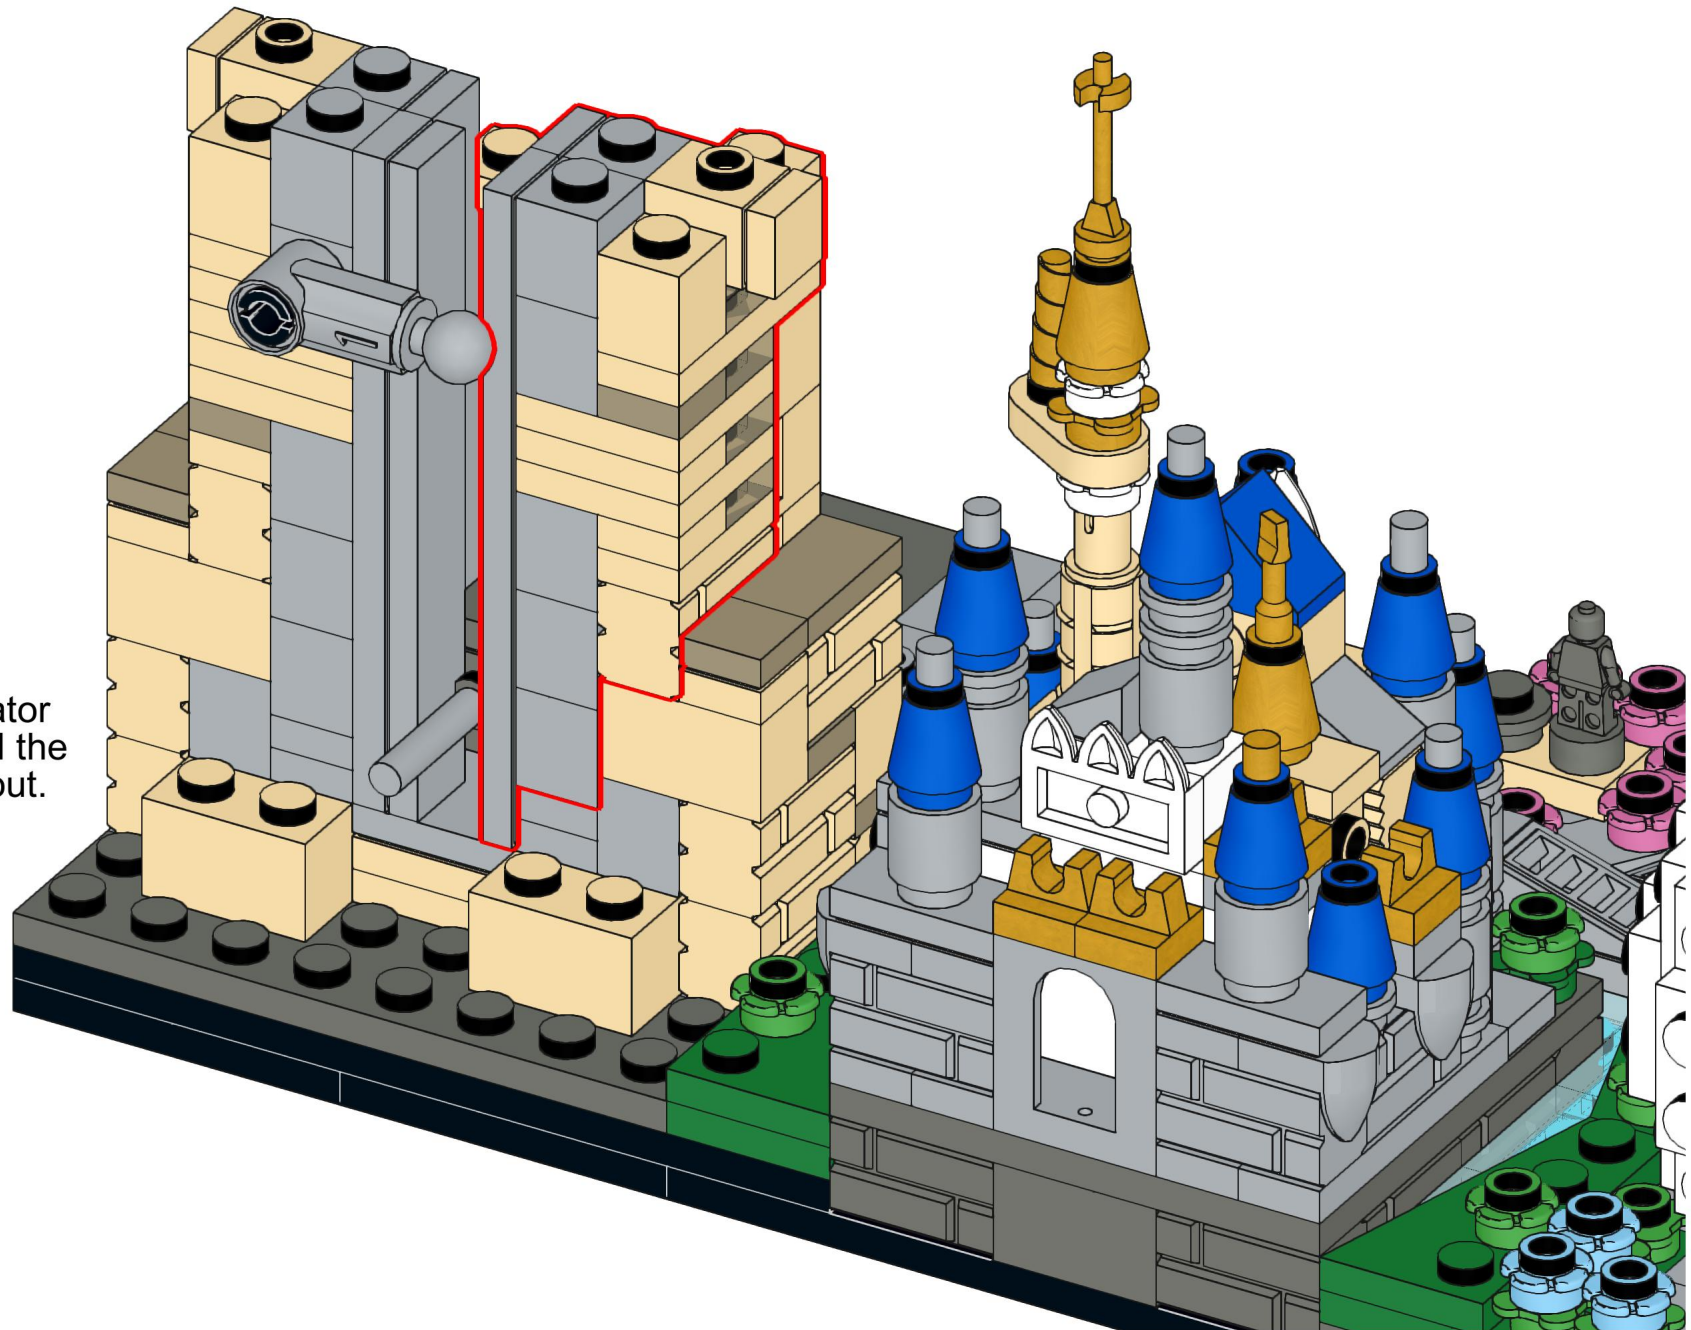

200

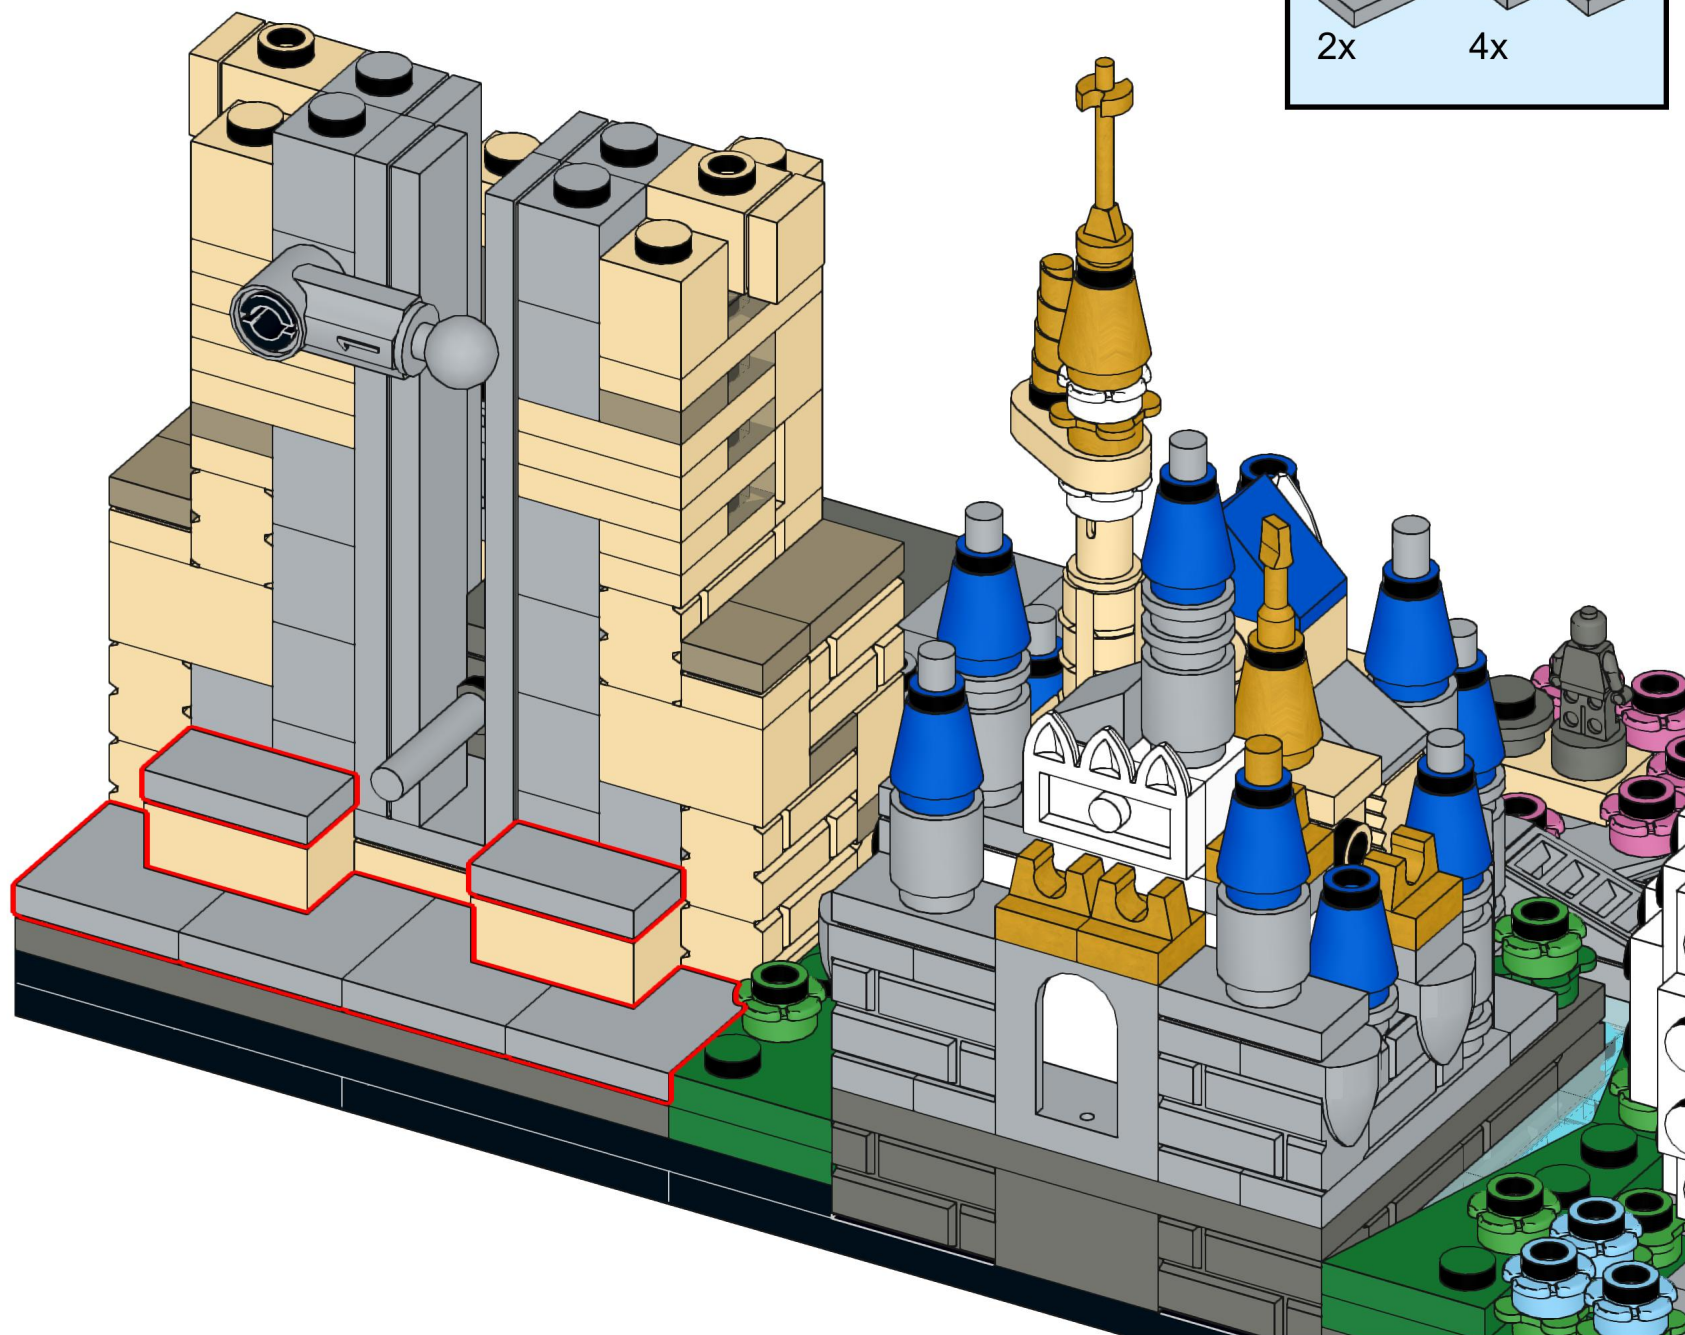

201

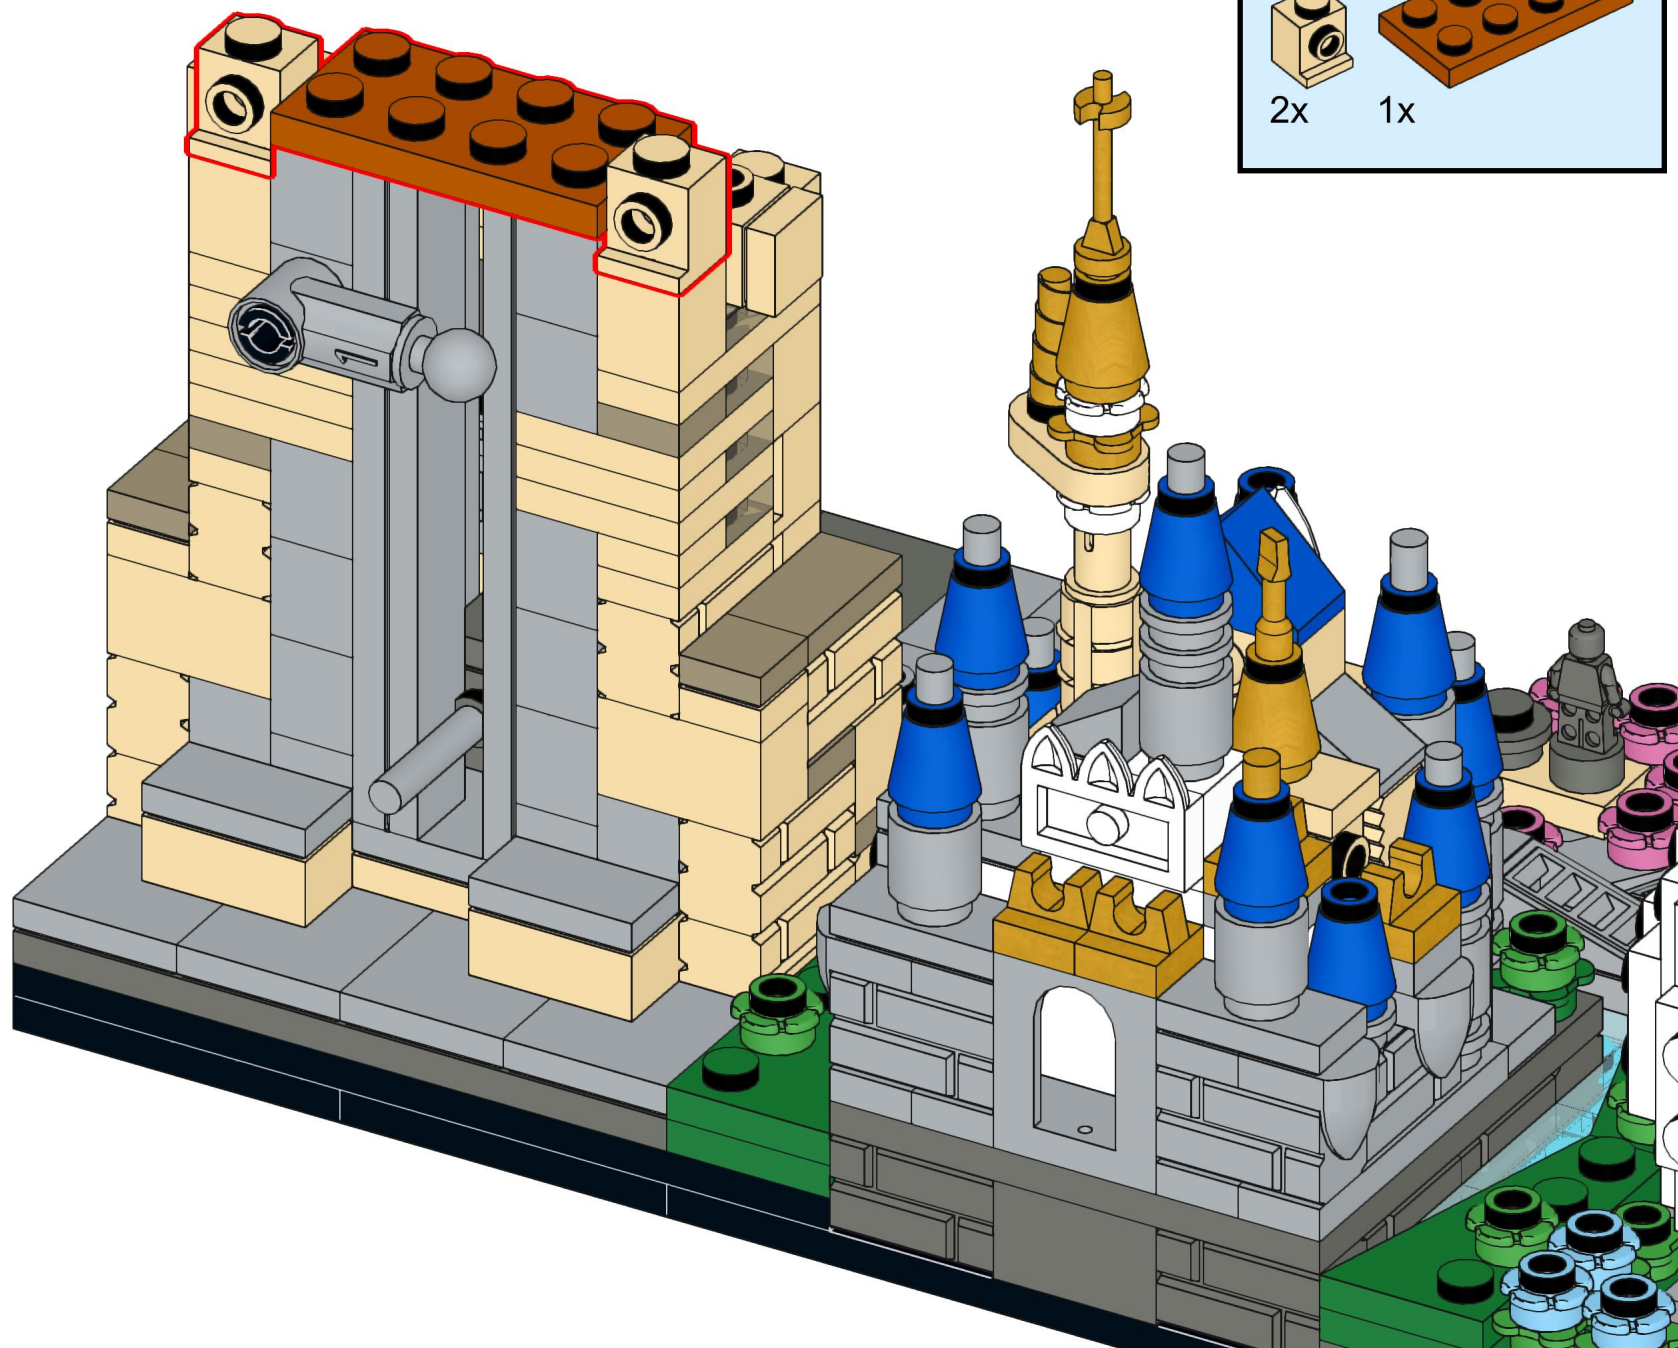

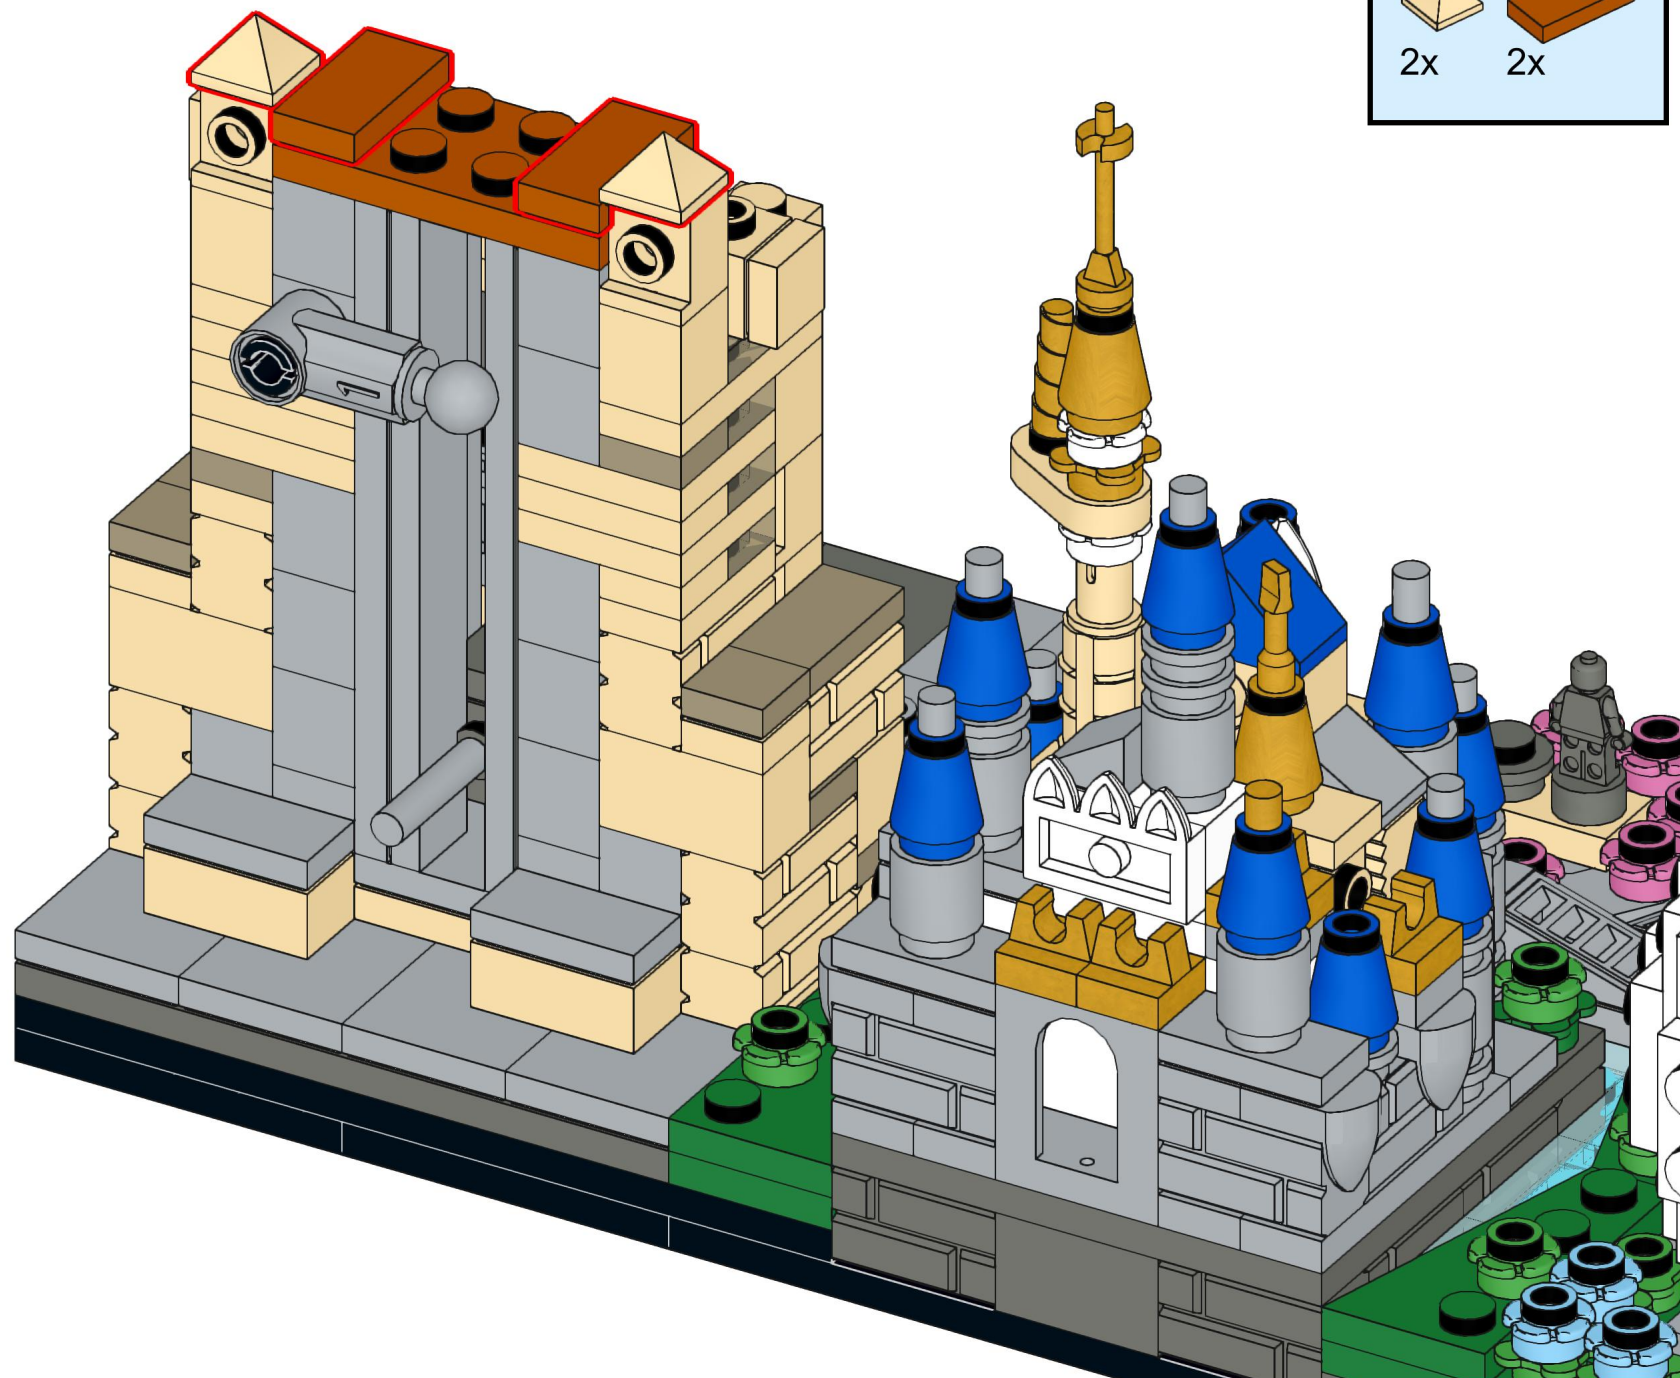

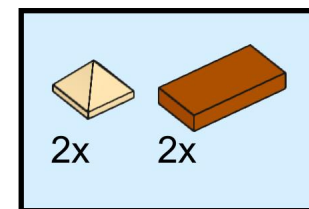

Make sure the micro elevator becomes "trapped" behind the tiles so you cannot pull it out.

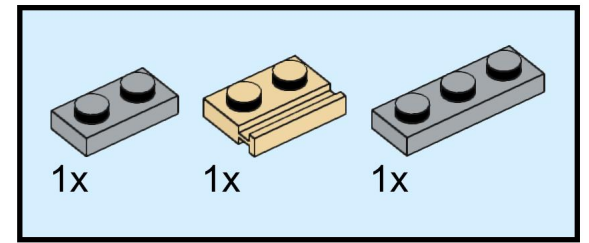

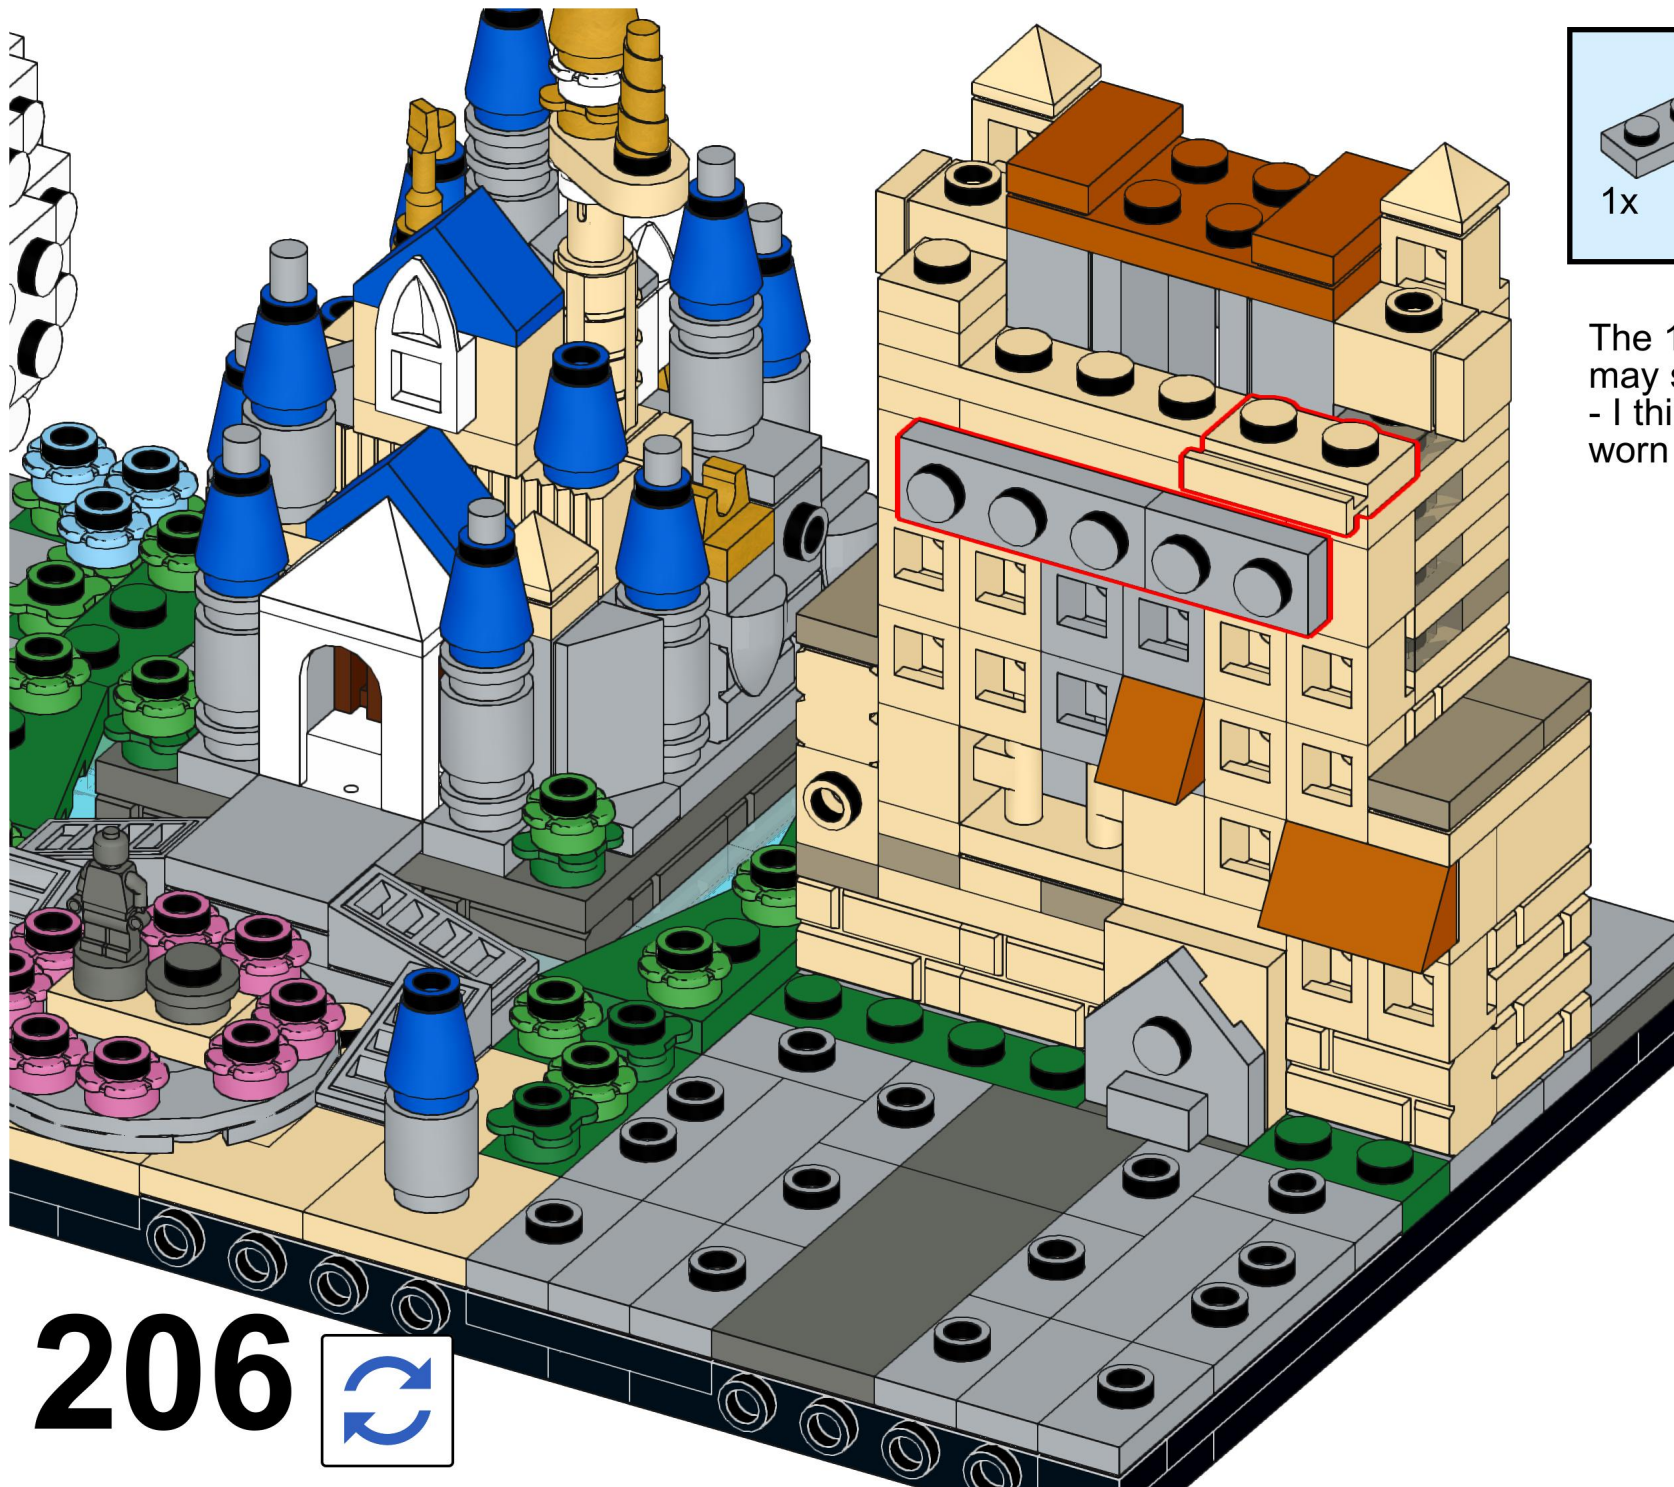

203

204

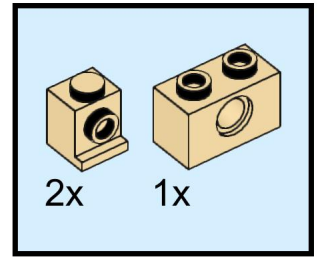

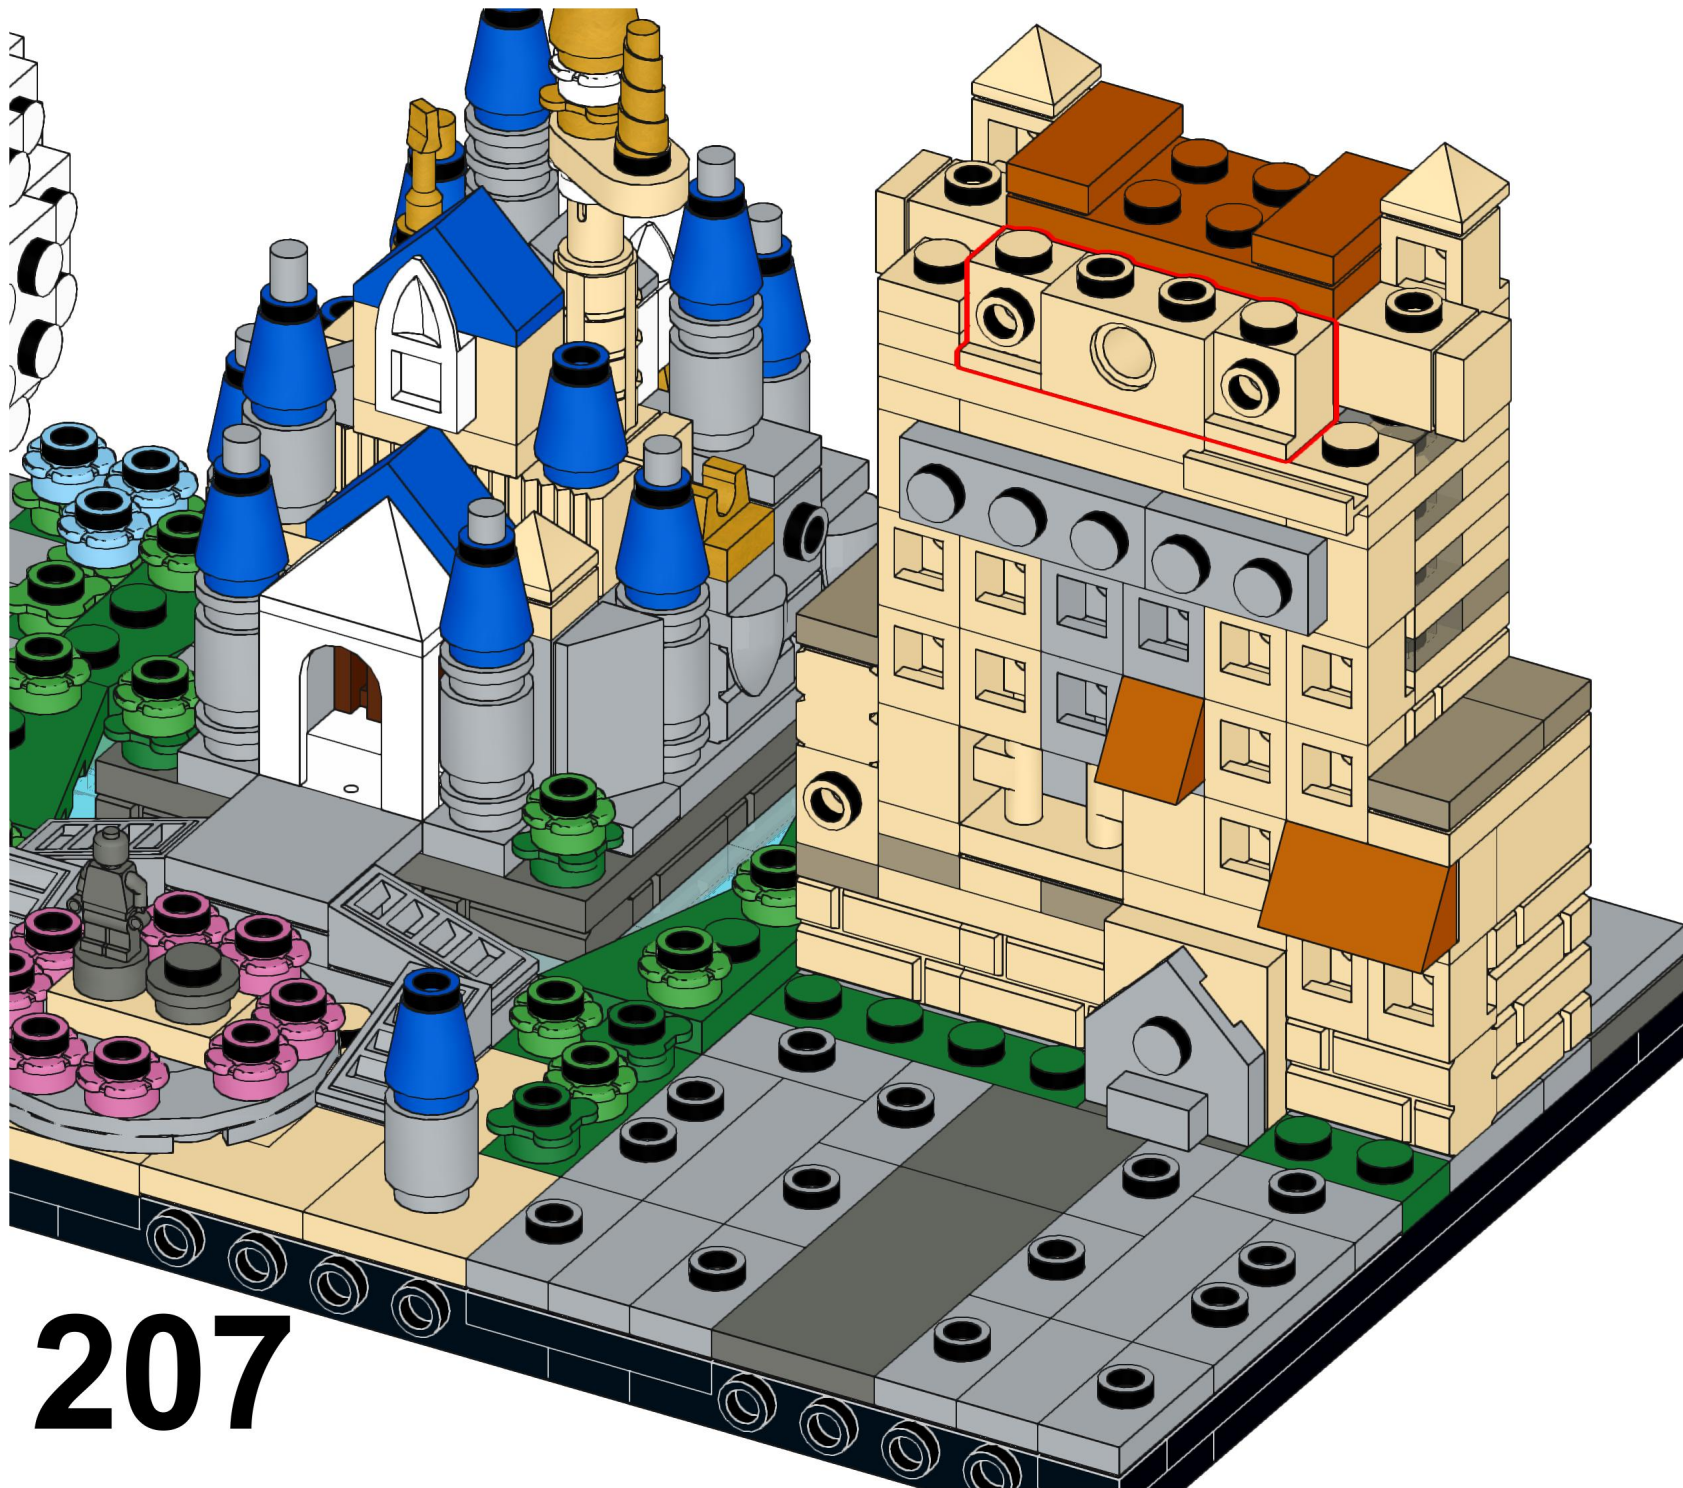

205

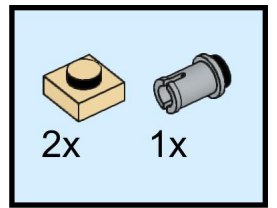

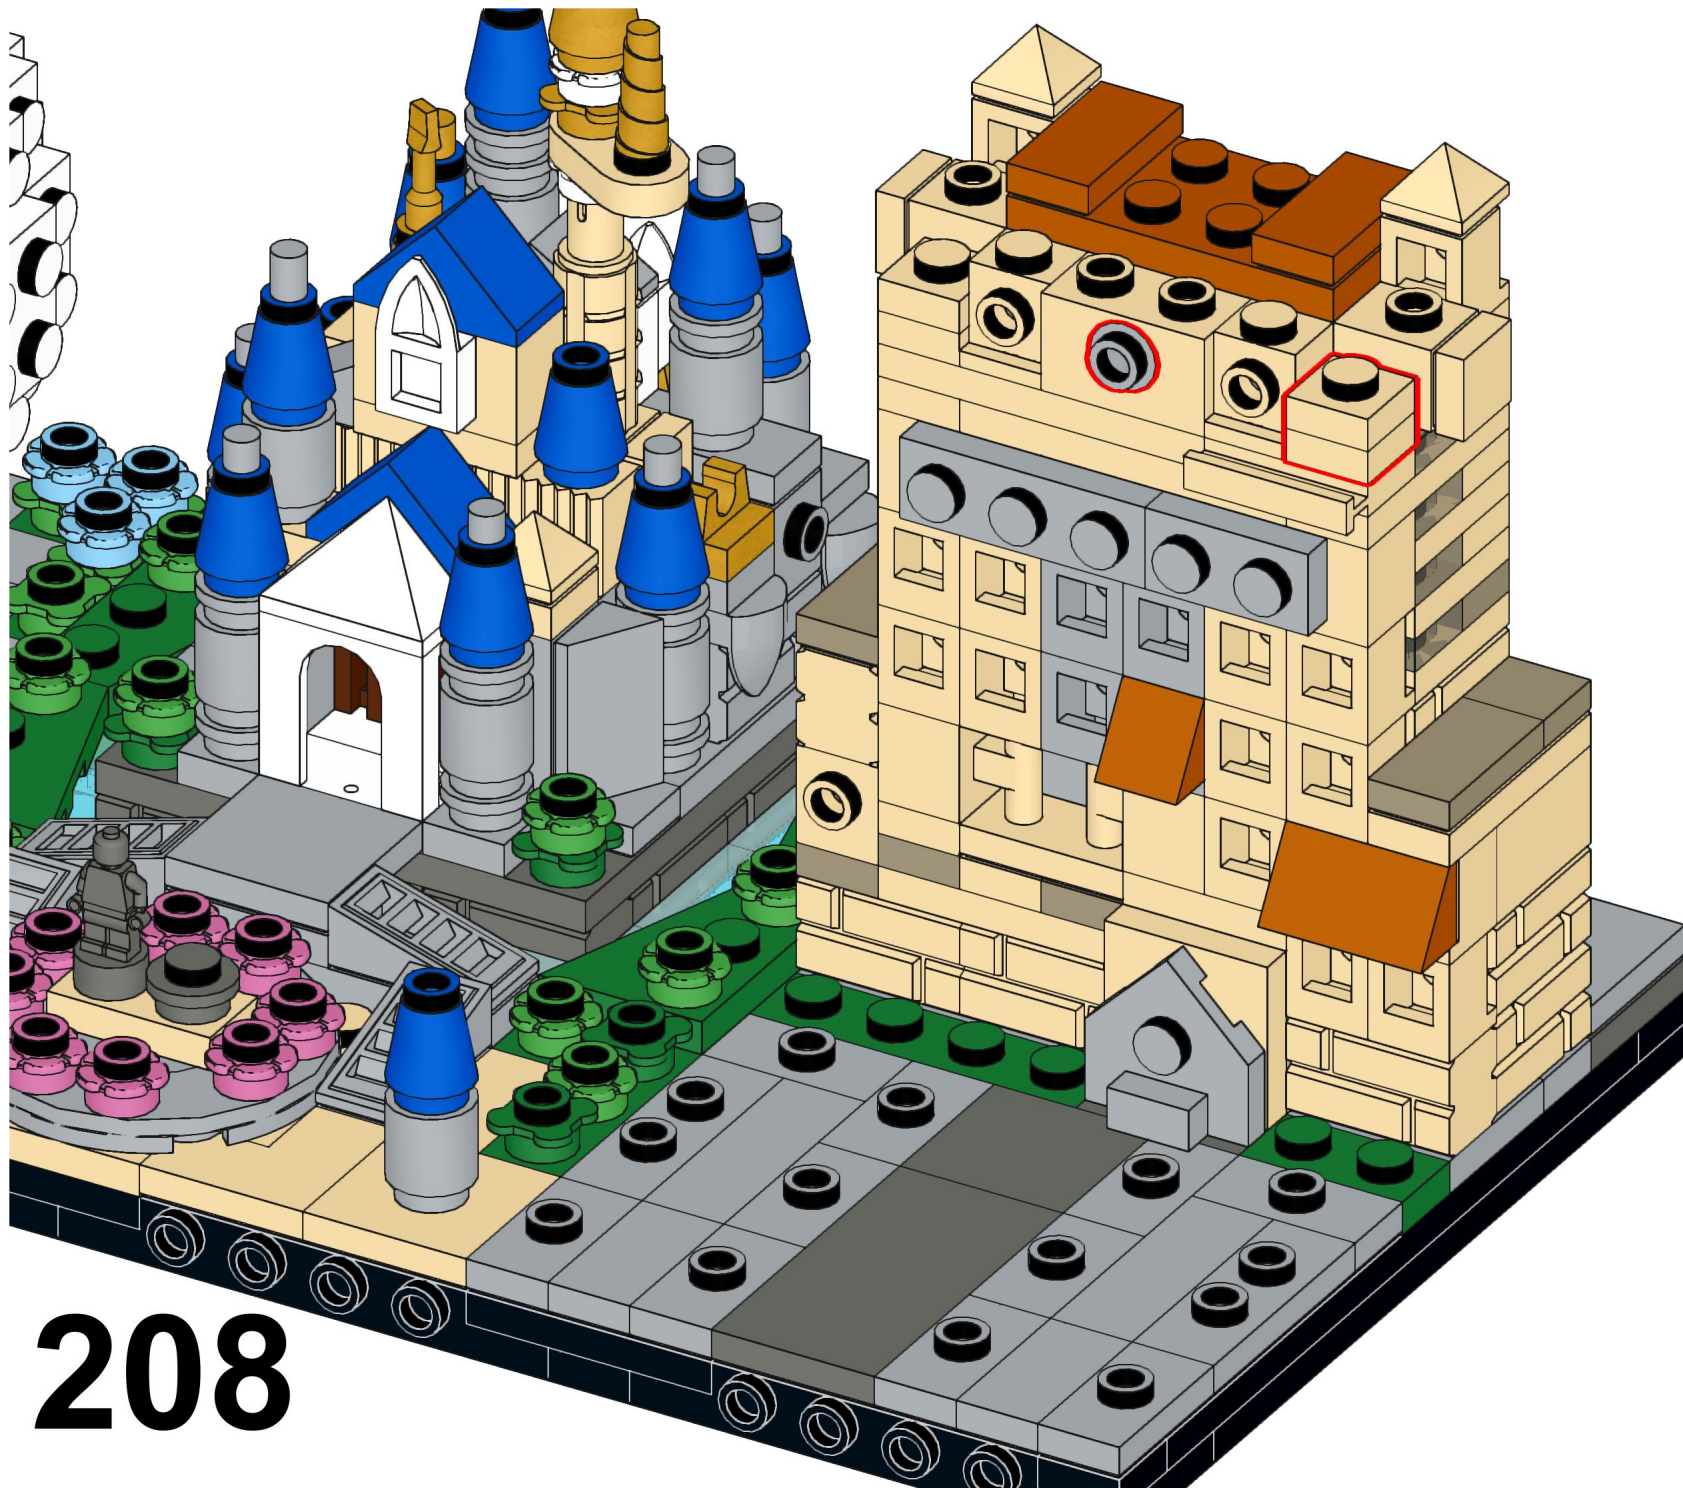

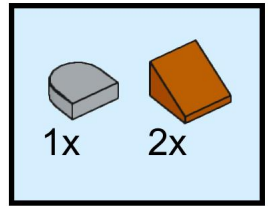

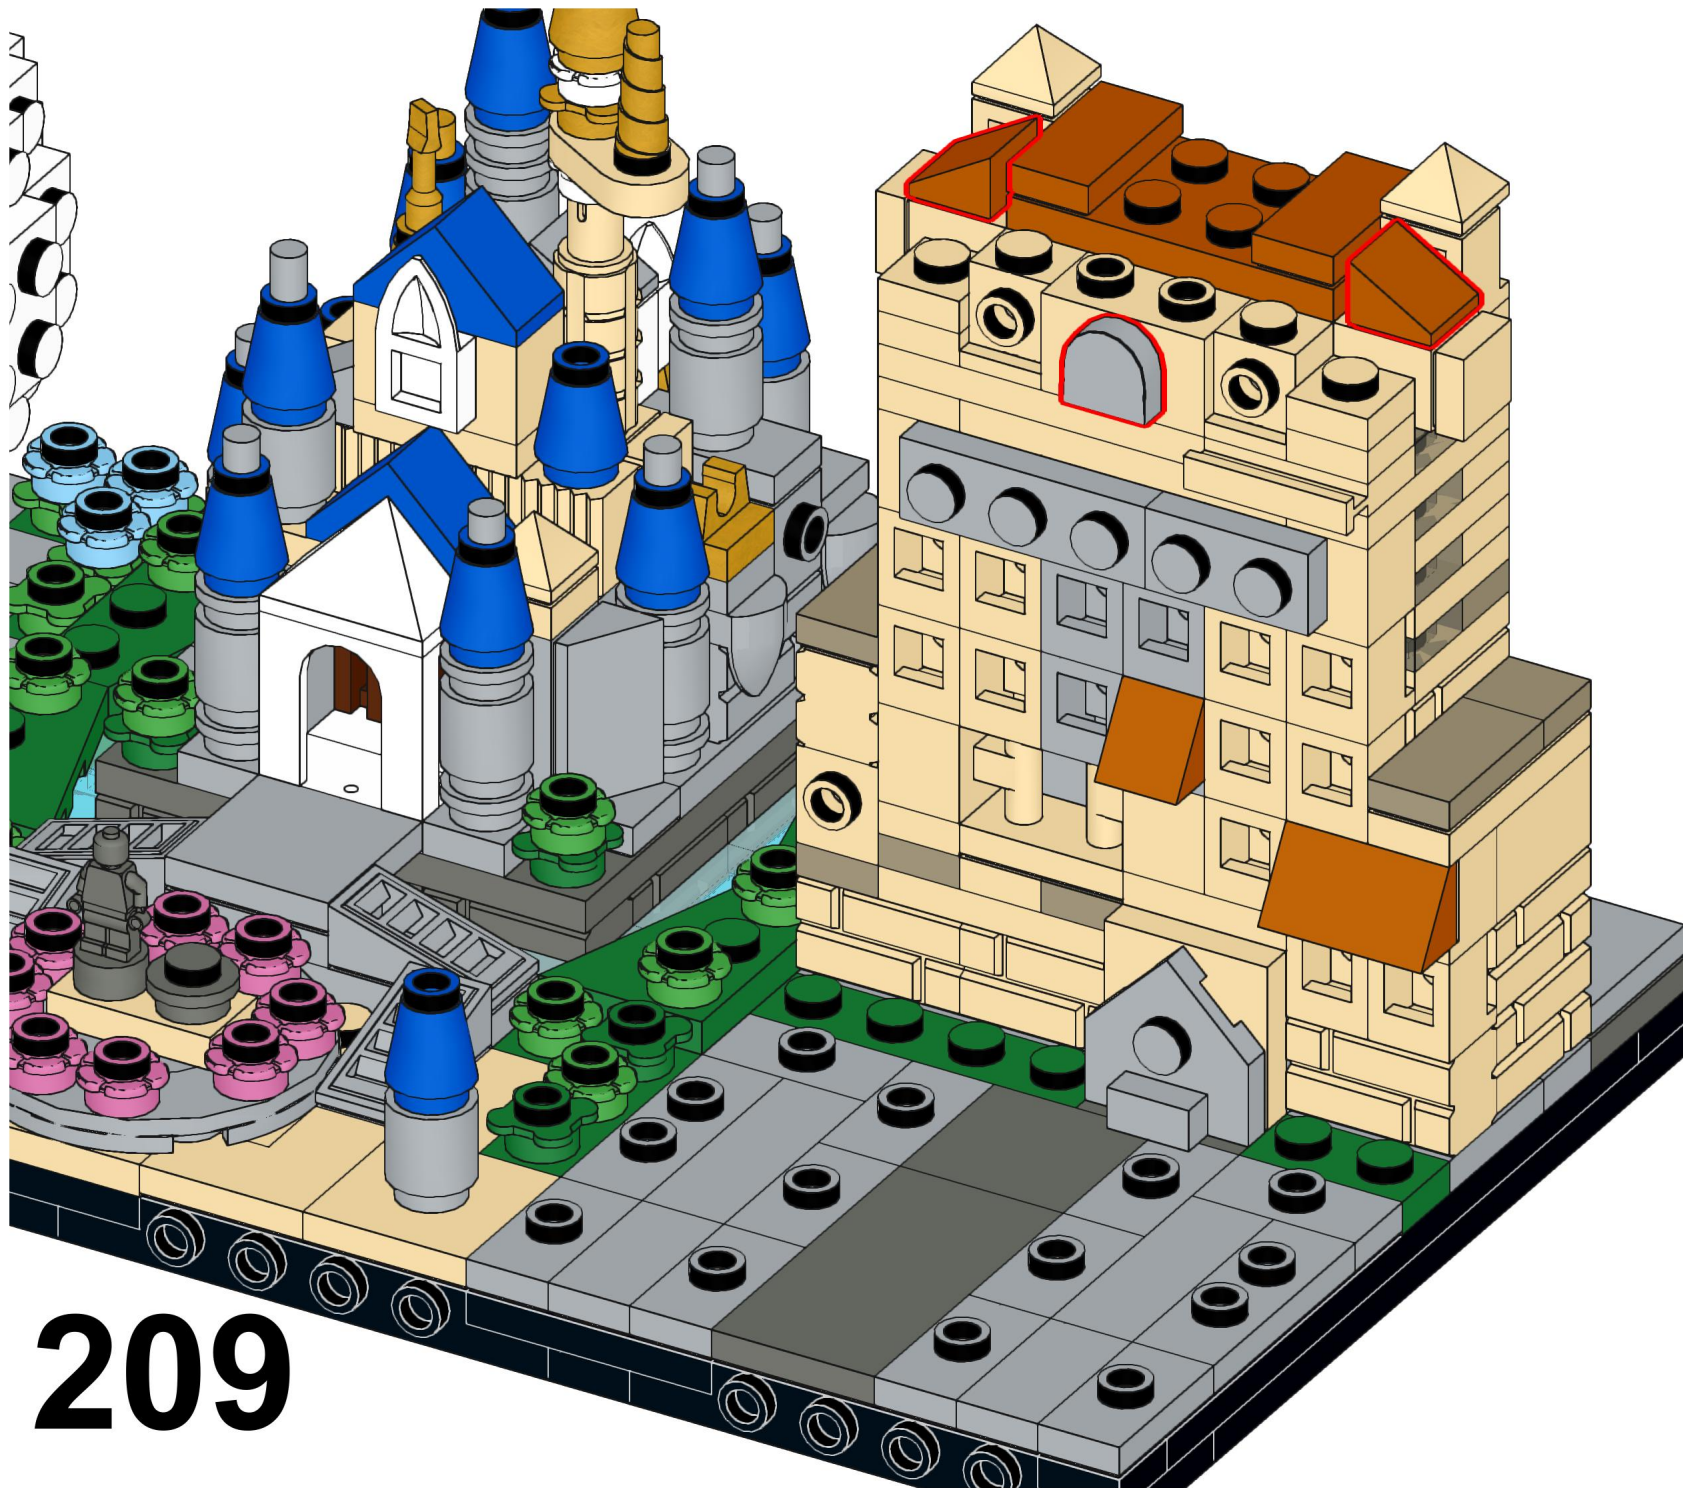

The 1 x 2 light bluish grey piece may sag slightly, and that's okay - I think it helps emphasize the worn down state of the building.

206

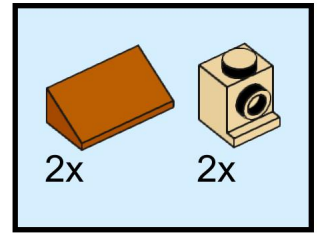

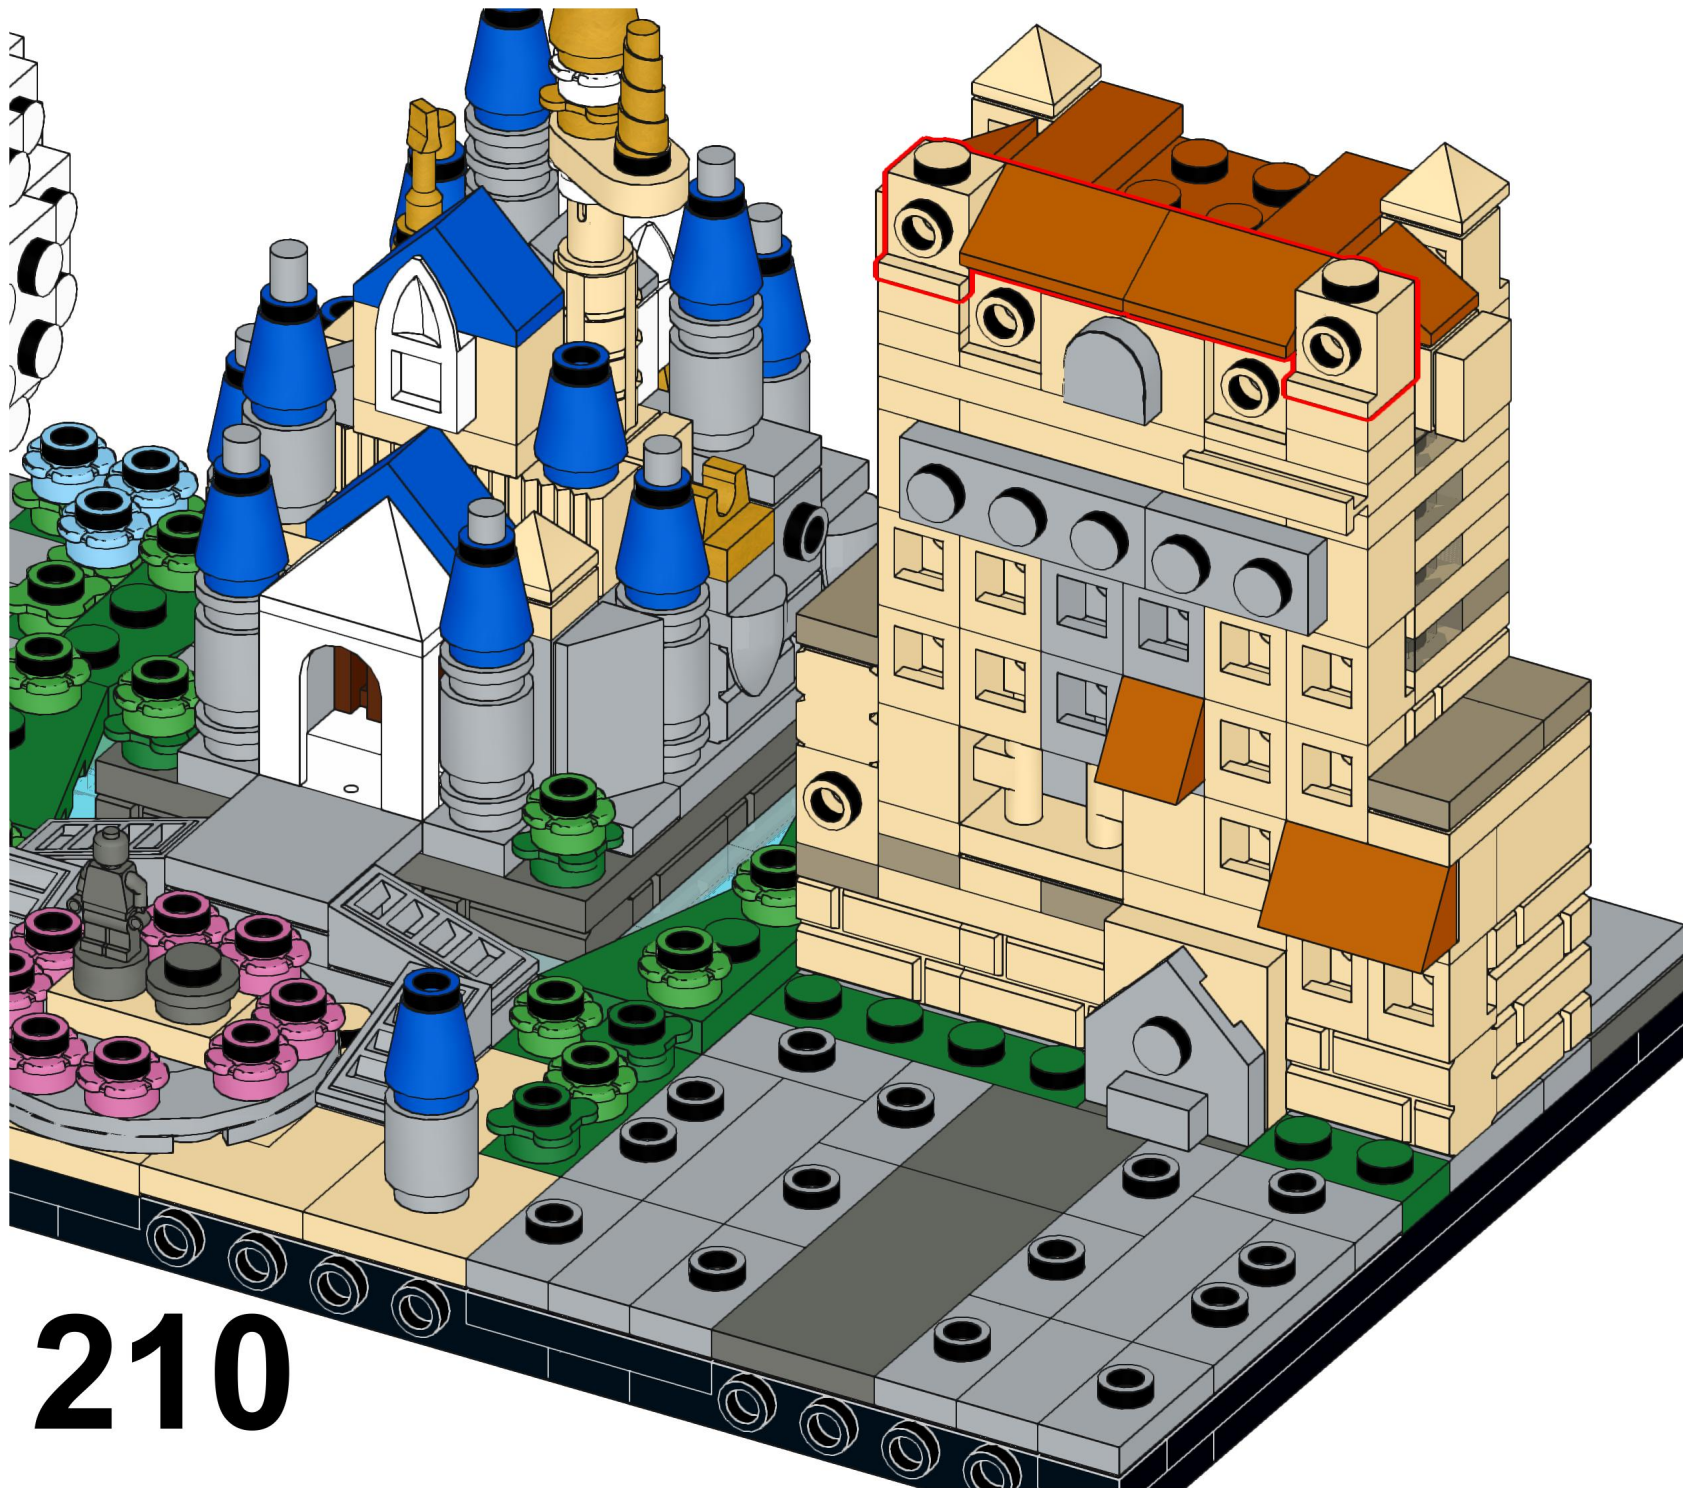

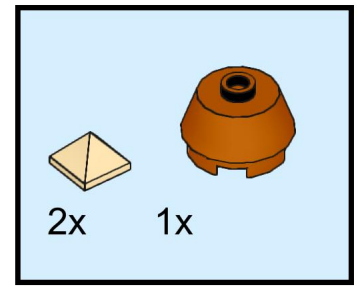

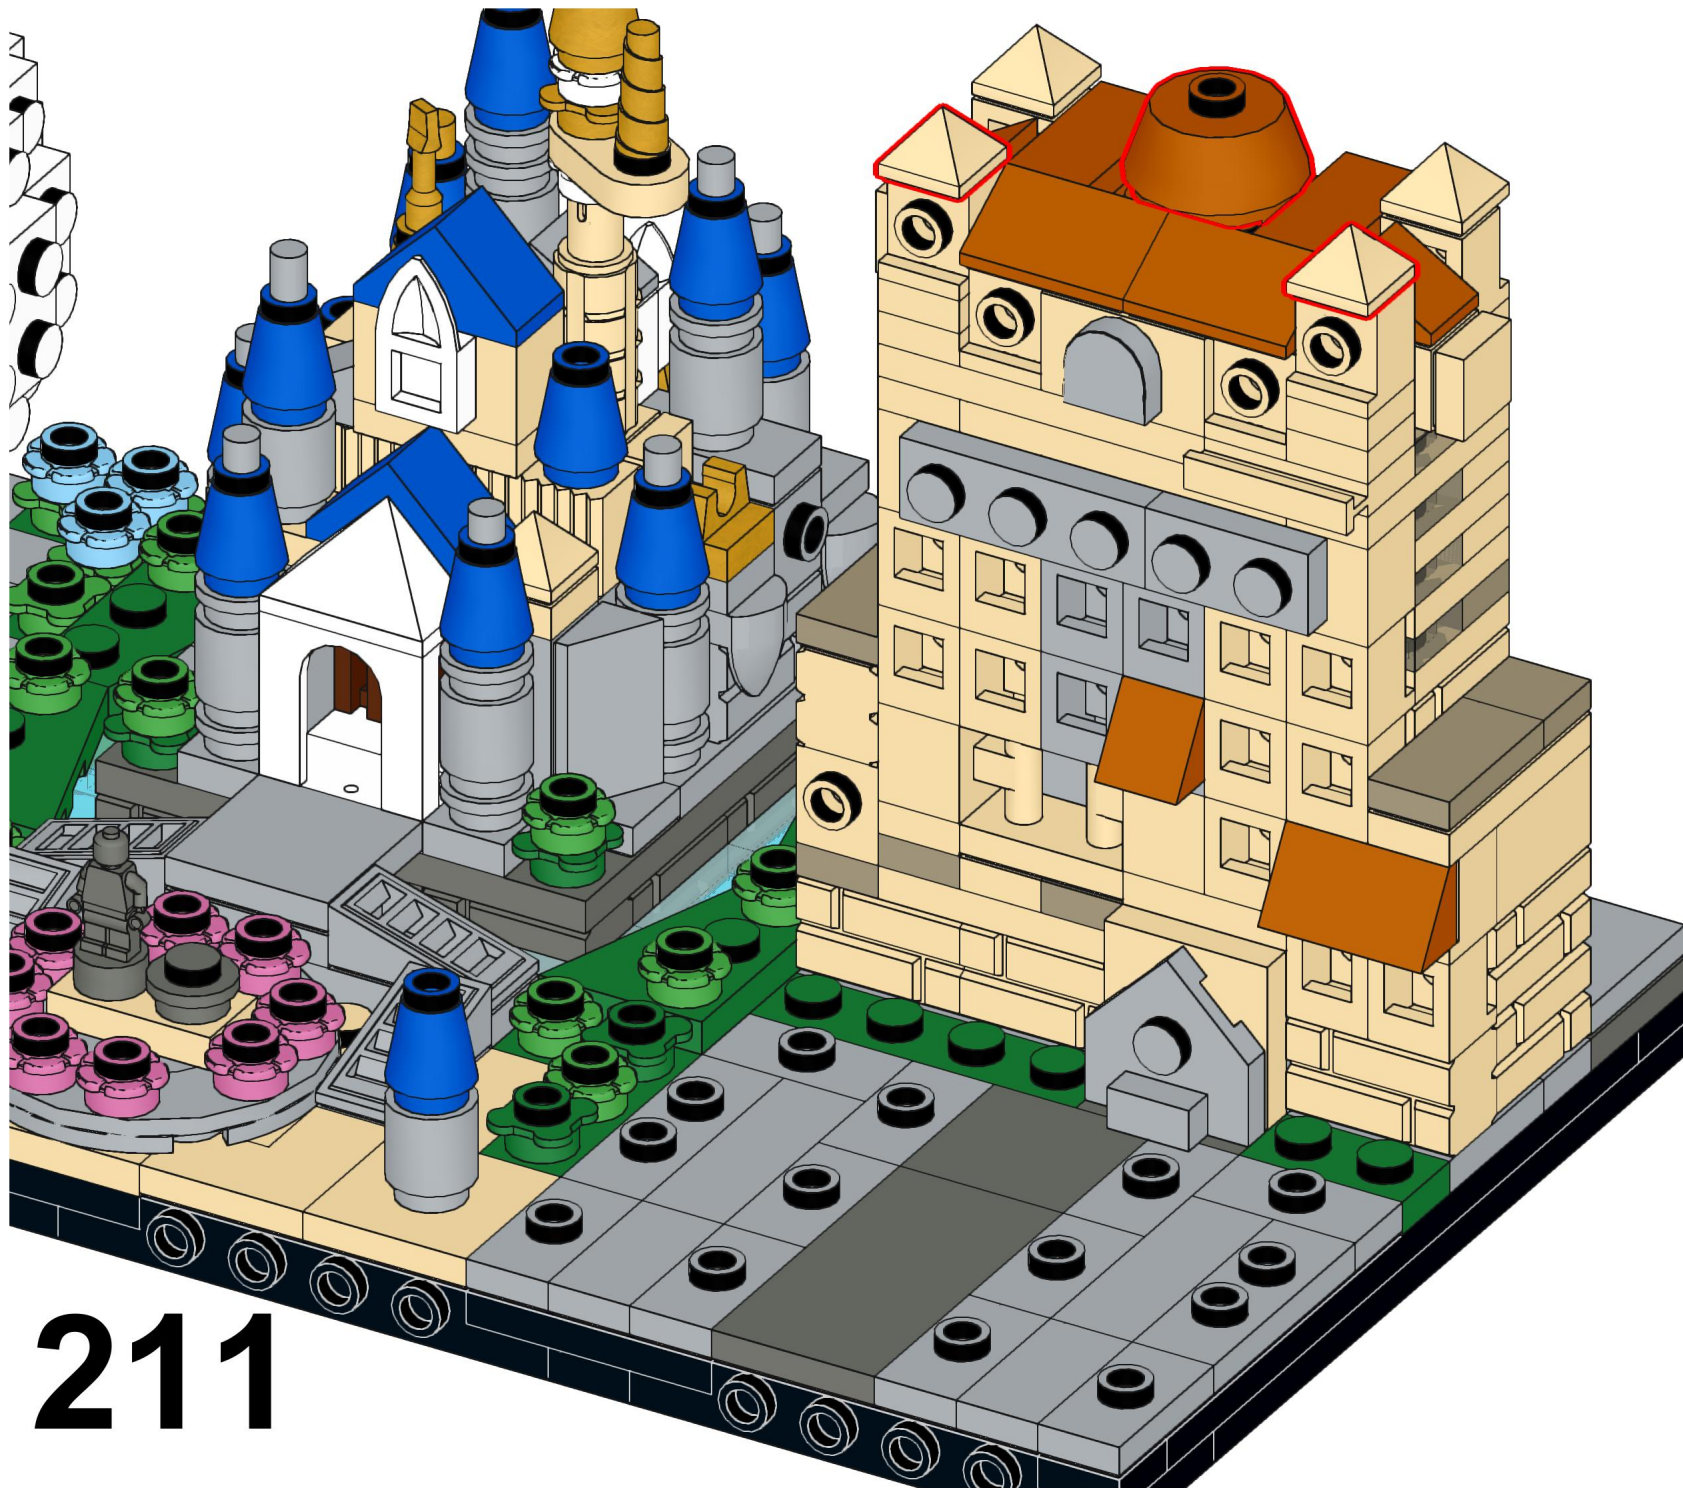

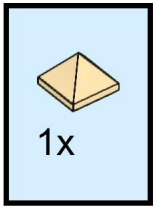

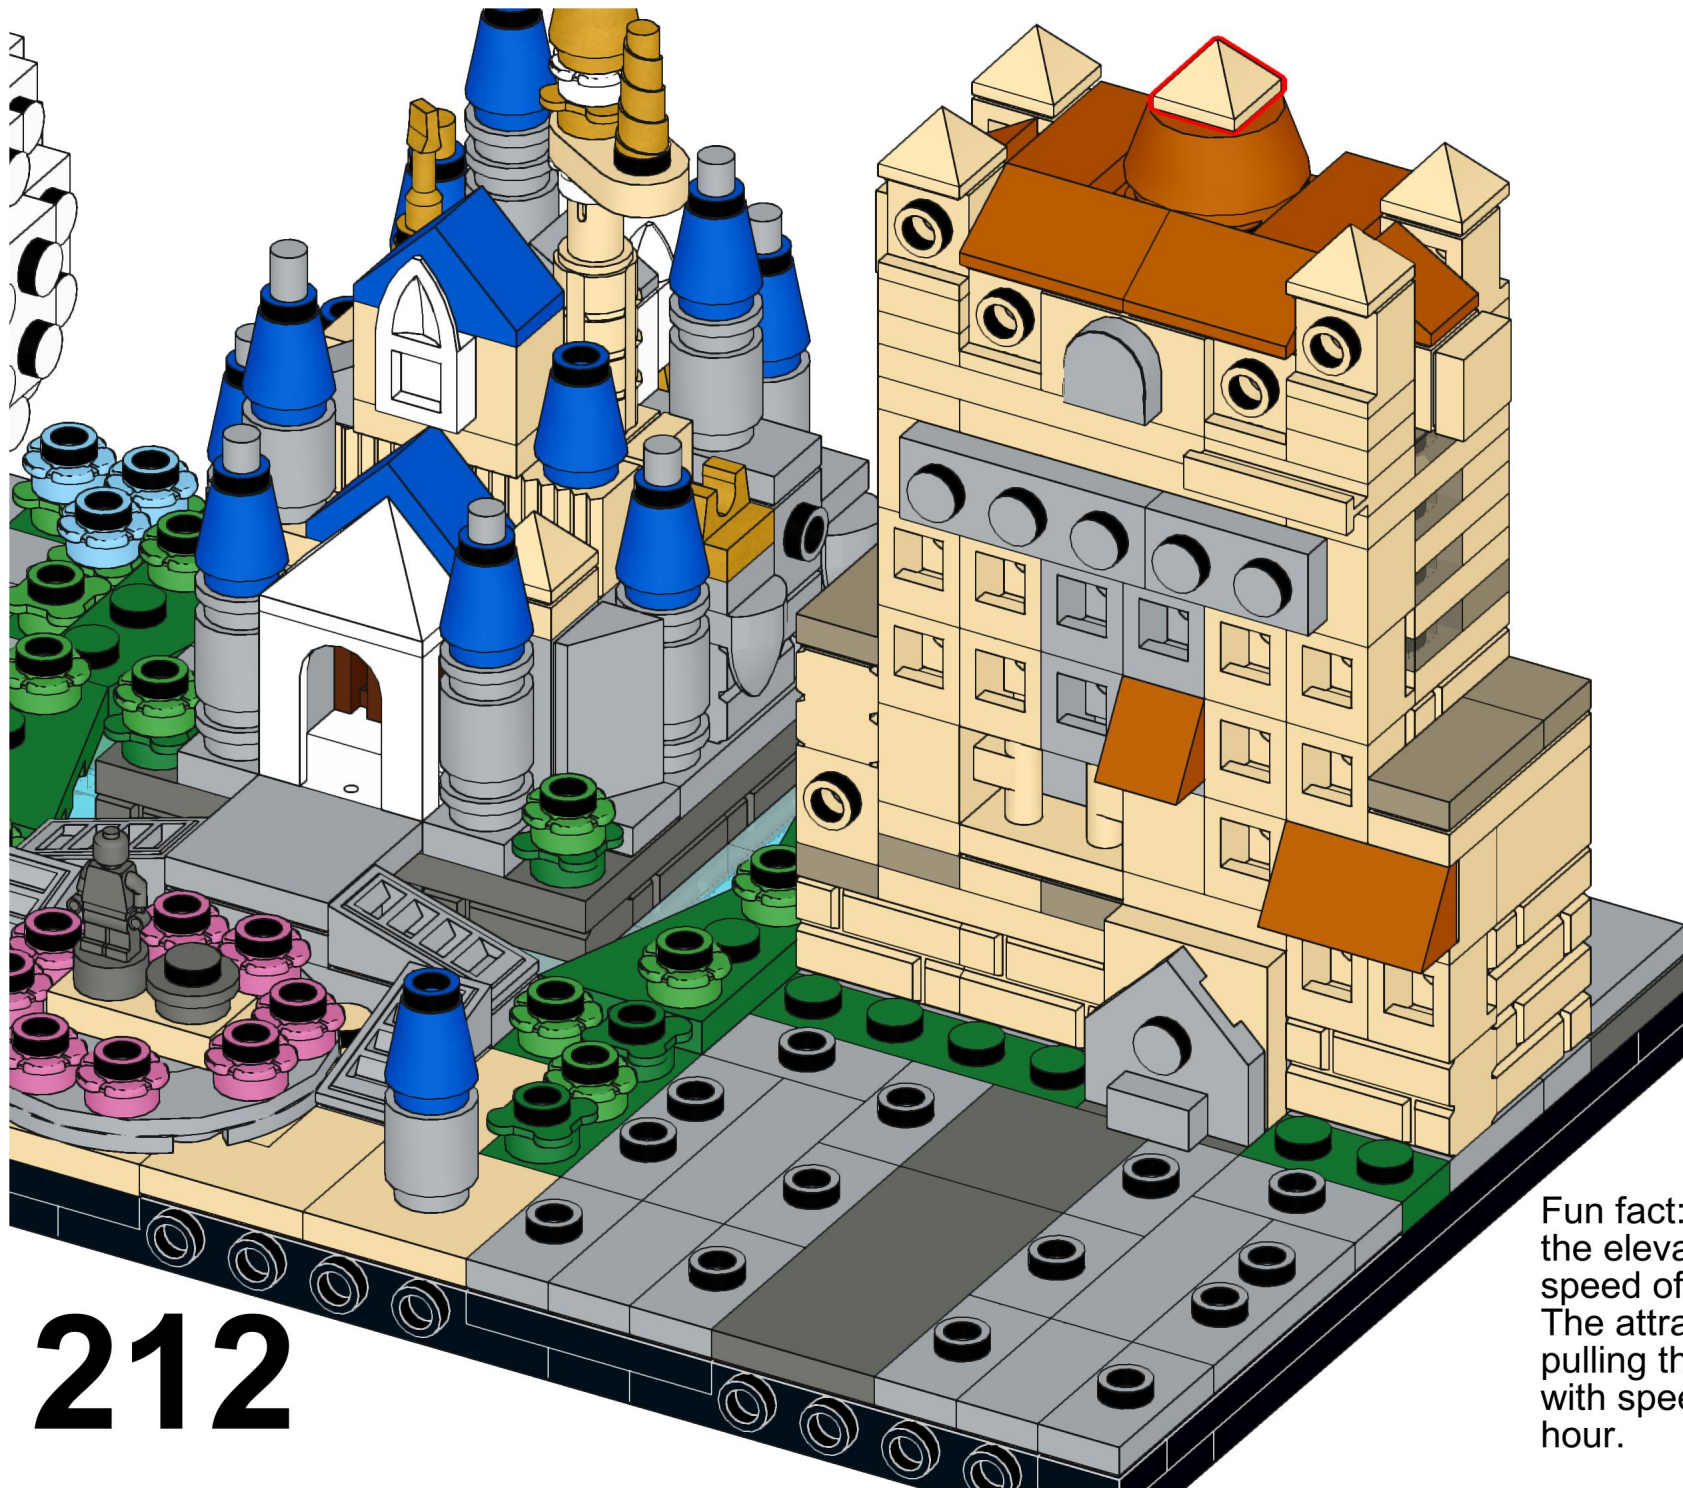

209

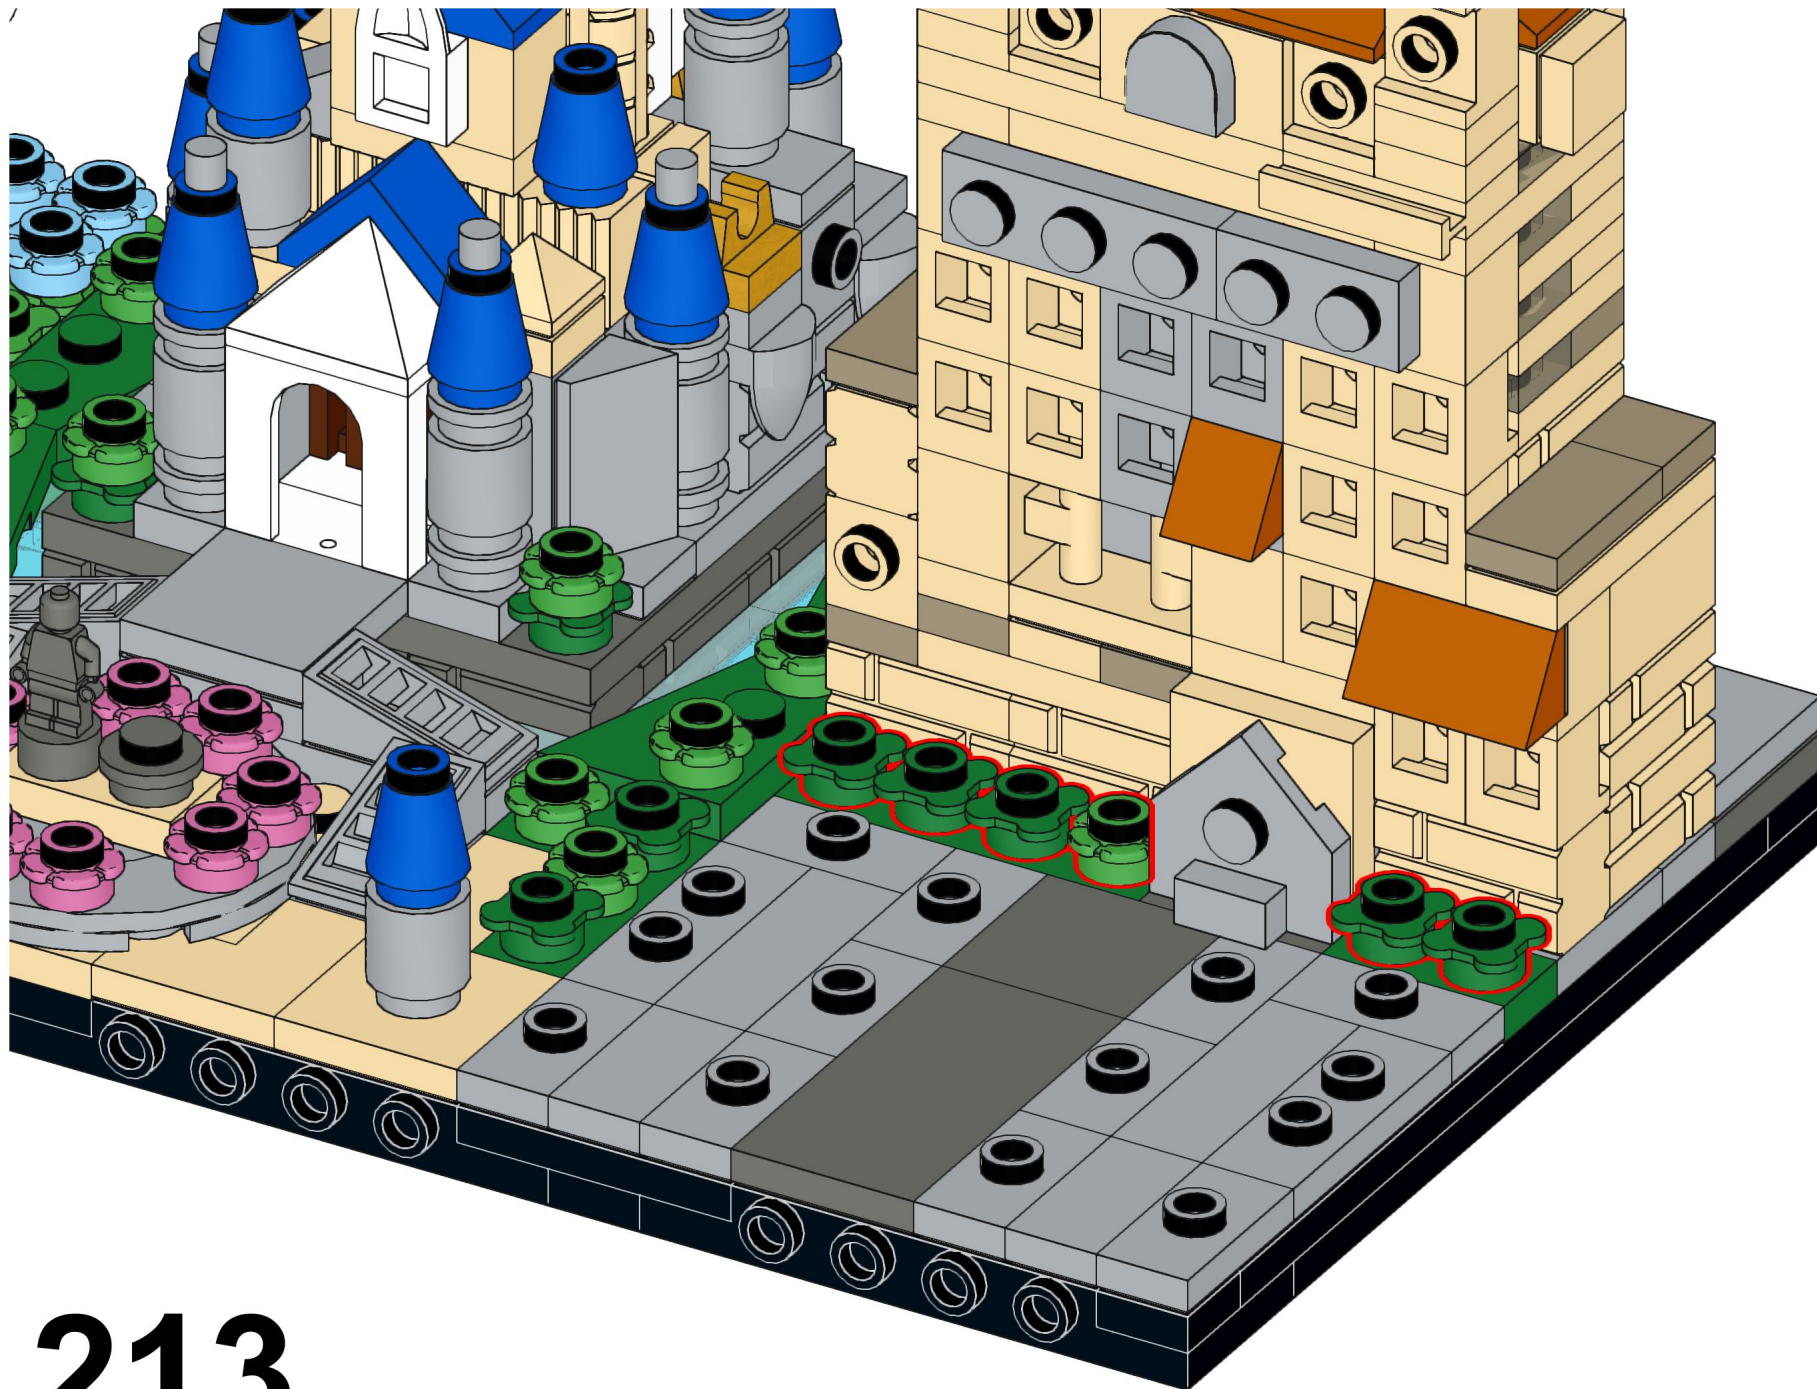

211

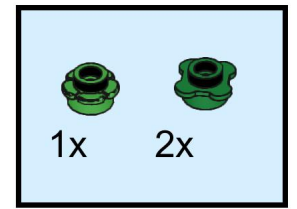

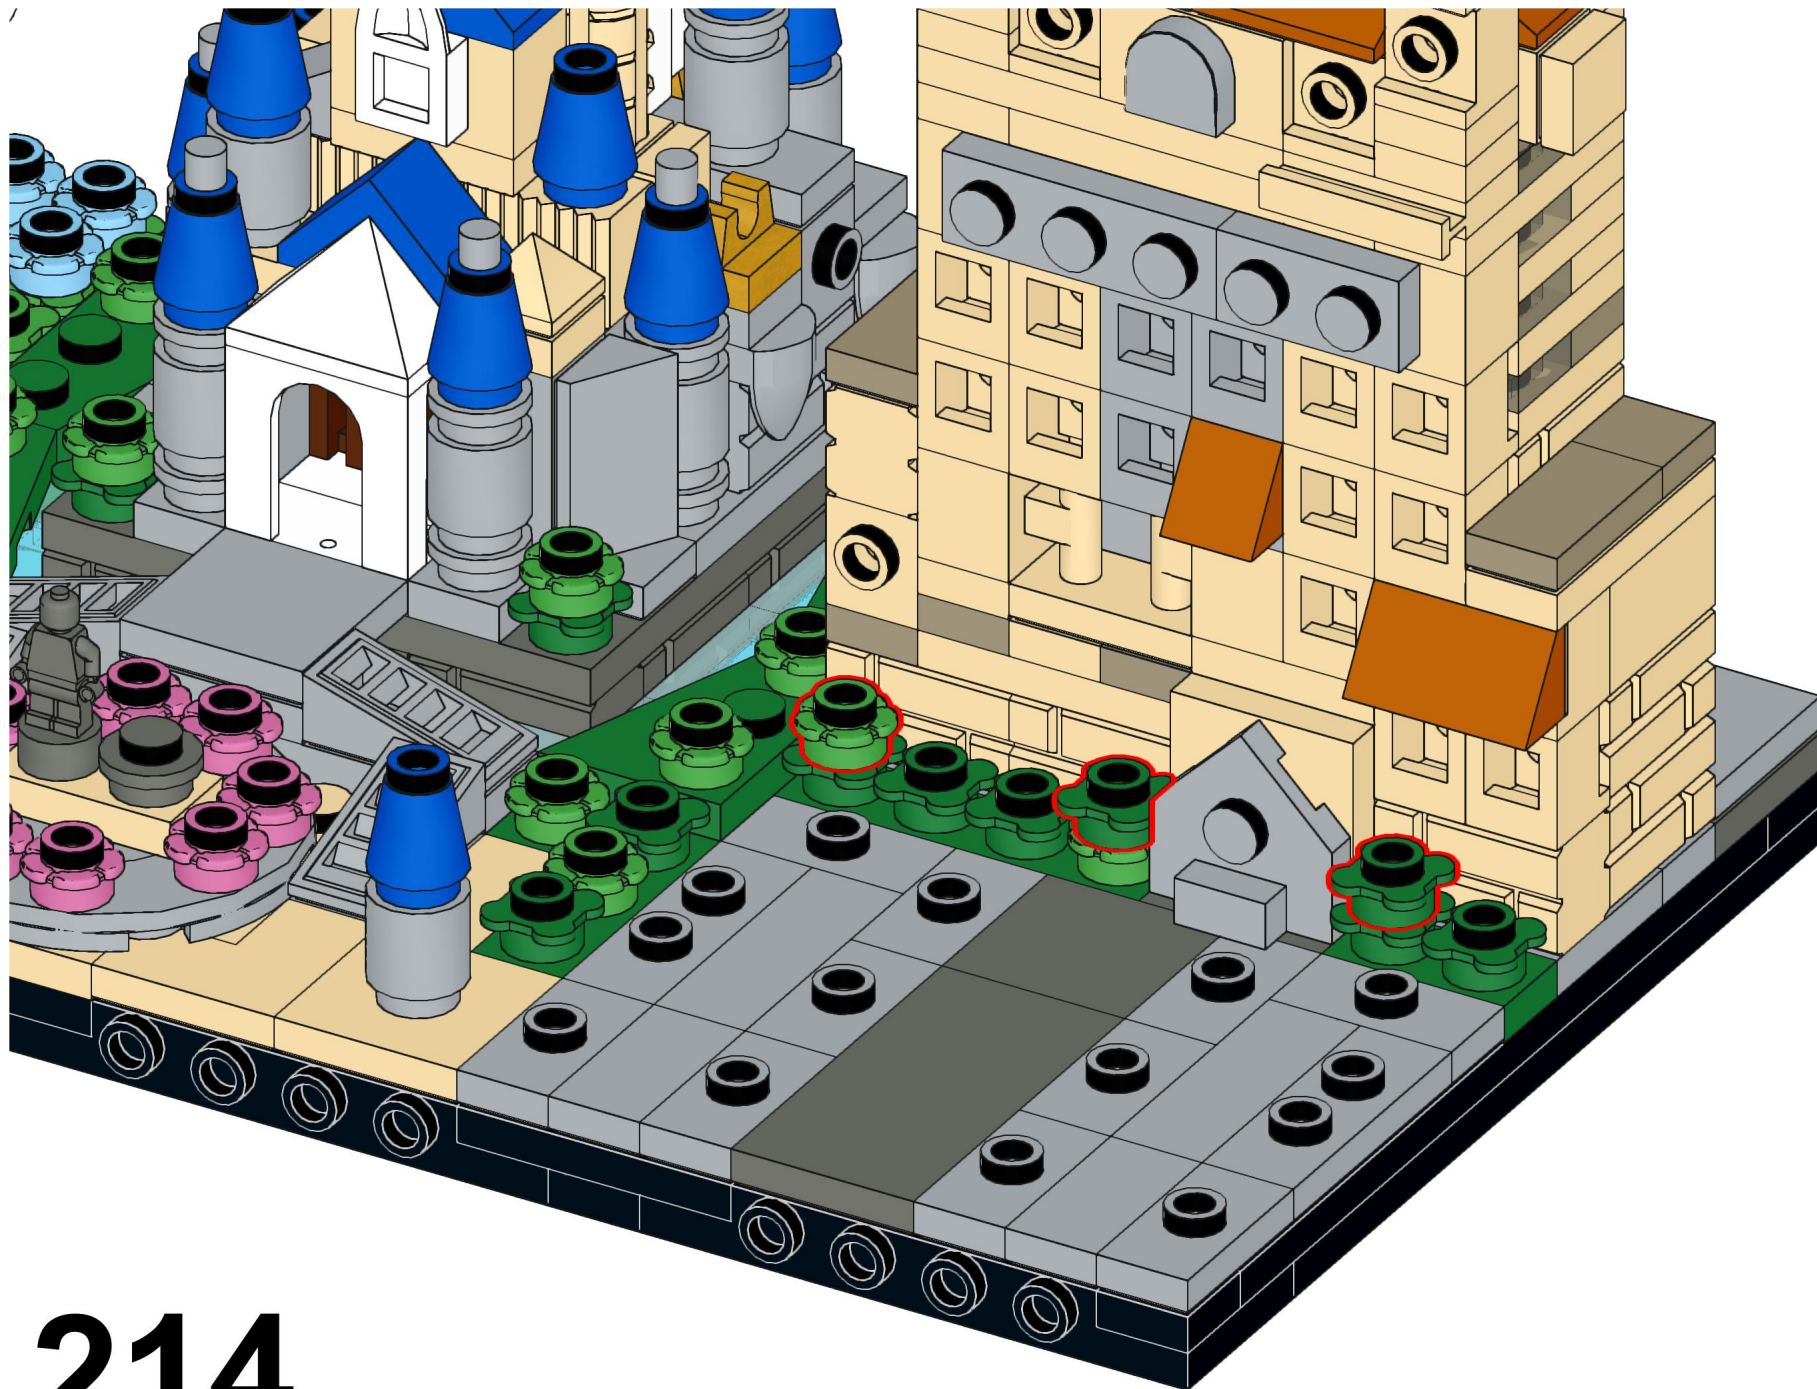

212

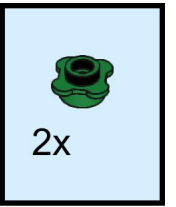

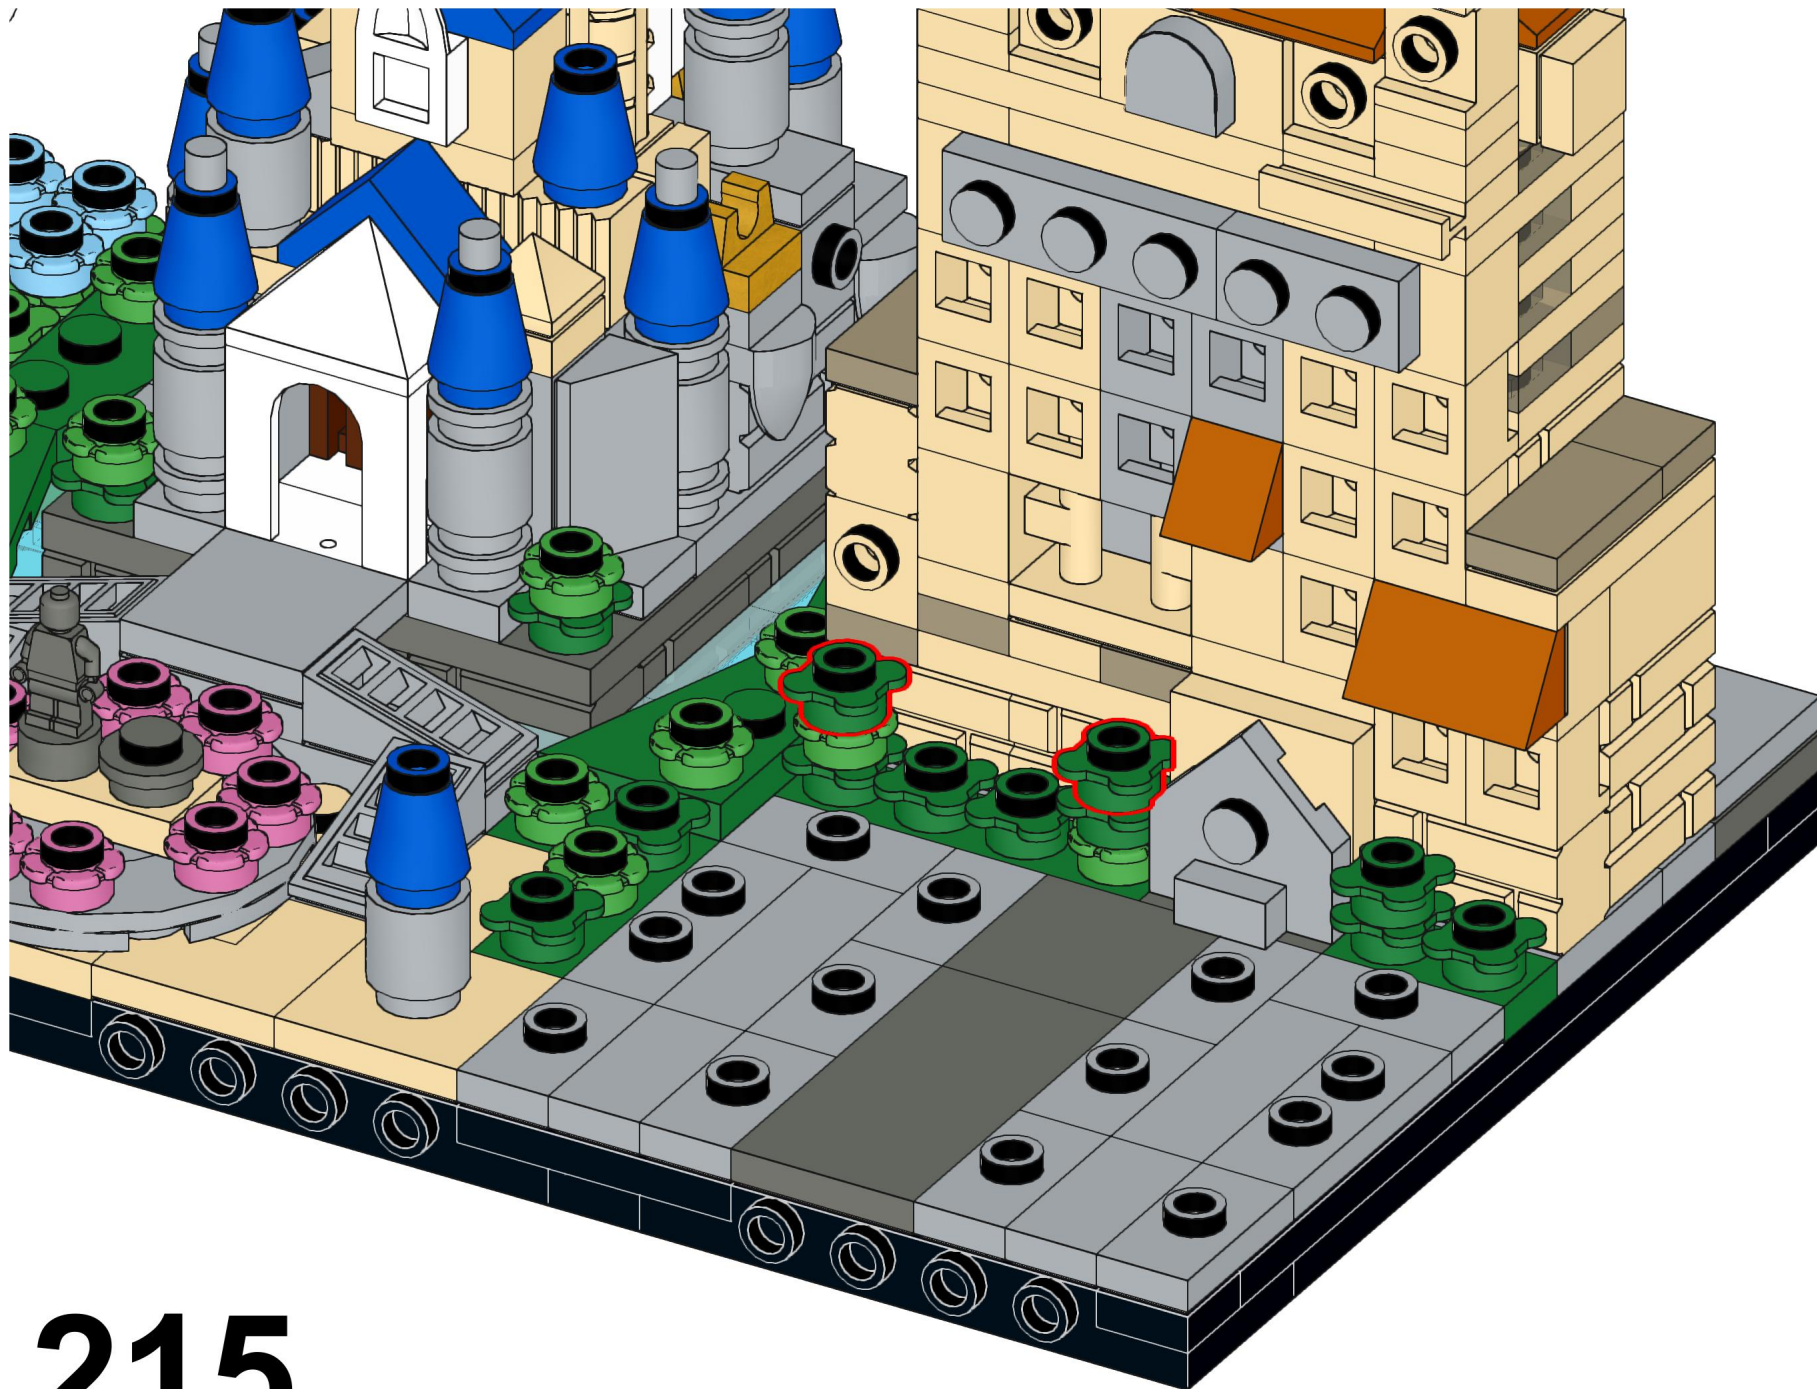

Fun fact: Despite popular belief, the elevator does not drop at the speed of gravity – it is falling faster! The attraction's technology is pulling the elevator up and down with speeds as fast as 39 miles per hour.
