FIRST AND FOREMOST, I WOULD LIKE  
TO SAY

THANK YOU

FOR CHOOSING TO BUY AND ENJOY THE  
PROCESS OF BUILDING THIS VERY  
SPECIAL AND DETAILED LEGO® STAR  
WARSTM MOC !

SERVED AS AN ALDERAANIAN DIPLOMATIC CRUISER,  
THE CR90 CORVETTE TANTIVE IV PLAYED A CENTRAL  
ROLE IN THE EVENTS AT THE BEGINNING OF THE  
GALACTIC CIVIL WAR, SERVING AS PRINCESS LEIA  
ORGANA'S PERSONAL STARSHIP IN THE LEADUP TO  
THE BATTLE OF YAVIN . . .

STAR WARS: A New Hope

© Disney

# BLOCKADE RUNNER

PRINCESS LEIA ORGANA OF ALDERAAN travels far and wide on board her consular starship *Tantive IV*, negotiating peace settlements and bringing aid to imperiled populations. Commanded by the daring and loyal Captain Antilles, Leia's *Tantive IV* is a Corellian Corvette: an older, hand-crafted ship of a make seen throughout the galaxy, and famous for its versatility. Under the cover of diplomatic immunity, the senator-princess uses her ship for missions of espionage against the Empire and covert communications for the Rebel Alliance. The *Tantive IV*'s mission profile takes it into both war zones and high-level diplomacy, making its added armor plate as vital as its formal state conference chamber. This sturdy ship has brought the young princess through many harrowing adventures, and it is only under the pursuit of Darth Vader that the *Tantive IV* is finally overtaken and captured.

## ESCAPE PODS

Spacecraft escape pods range from coffin-like capsules to large lifeboats which are small ships in their own right. The Blockade Runner carries eight small escape pods rated for up to three people, and four laser-armed pods which seat 12. More sophisticated than the smaller pods, these lifeboats nonetheless have a very limited range. None of the *Tantive IV*'s escape systems could save its crew from the *Devastator*'s guns.

## R2 AND 3PO'S ESCAPE

The small pod used by R2-D2 and C-3PO carries a minimum of equipment: simple rocket engines propel the pod away from danger as it ejects, using basic technology unaffected by magnetic or electrical interference. A gravity ring beneath the seat helps keep passengers secure above and cushions the shock of landing by projecting an antigravity field below. Only a single viewport is built in: a small slot window which is used for checking the landing environment before emerging. Fore and aft cameras feed a monitor inside to help it escape peril and find a suitable landing site.

## SHIPBOARD SYMBOLS

The components of functional systems within the Corvette are coded with symbols such as these for identification and maintenance purposes.

## THE CAPABLE CORVETTE

Sporting twin turbolaser turrets and a massive drive block of eleven ion turbine engines for speed, the Corellian Corvette balances defensive capabilities with a high power-to-mass ratio, meaning that what it can't shoot down it can generally outrun. These capable ships have been adapted to many uses, from cargo and passenger transport to scientific and military applications, but their most notorious use is in the hands of Corellian smugglers.

## CONTRABANDITS

Blending anonymously into galactic space traffic, Corellian smugglers skillfully pilot their multi-engined Corvettes through Imperial security zones to avoid duties and taxes (or arrest for dealing in weapons and illegal goods). They are hard to spot, and chagrined Imperial officials have given the make its nickname "Blockade Runner."

A NEW HOPE IS MY SECOND ALL TIME FAVORITE STAR WARS MOVIE, AFTER THE EMPIRE STRIKES BACK, AND THE OPENING SEQUENCE INSIDE THE TANTIVE IV IS VERY ICONIC AND TRULY AMAZING, NOT LEAST FOR 1977.

IT WAS A LOT OF FUN TO INCLUDE ALL THE (HIDDEN) DETAILS IN THIS MODEL, NO MATTER HOW SMALL OR BIG, AND TO CAPTURE THE OVERALL LOOK OF THE MOVIE SCENES. BUT I AM ESPECIALLY PROUD OF THE SLIDING AIRLOCK DOORWAY THAT USES A PRETTY CLEVER TECHNIQUE, THAT CAN BE OPENED TO REVEAL THE BOARDING ATTACK BY IMPERIAL FORCES.

IF YOU LOOK CLOSELY ON THE SOURCE MATERIAL, SOME OF IT I INTEGRATED IN THIS INSTRUCTION MANUAL (I USED UMPTEEN SOURCE PICTURES FOR THE DESIGNING PROCESS), YOU WILL SEE THAT THE INSIDE OF THE TANTIVE IV HAS MANY SPECIAL SHAPES AND DESIGNS, F.E. THE DIFFERENT ROUNDED SHAPES IN THE MAIN CORRIDOR.

THIS MOC HAS A TREMENDOUS FOCUS ON DETAILS. TO ACHIEVE THAT I SPEND HOURS AT DESIGNING THIS MODEL.

THE HINGE-MECHANISM ALLOWS YOU TO GET BETTER ACCESS TO THE CORRIDOR, AND SERVES AS A SWITCH, SO YOU CAN EITHER CLOSE THE CORRIDOR AND APPRECIATE THE FULLY CLOSED AND ABSOLUTE ACCURATE DESIGN, OR OPEN IT WHICH MAKES IT EASIER TO TAKE PROFESSIONAL SHOTS OF SCENES WITH YOUR MINIFIGURES, REENACT MOMENTS FROM STAR WARS: A NEW HOPE, OR JUST DISPLAY IT ON YOUR SHELF.

STAR WARS: A New Hope

66

This diagram illustrates step 66 of a LEGO construction. The main assembly features a white base with a curved grey plate being attached. A legend in the bottom left corner specifies the parts needed for this step:

- 1x dark grey 1x2 plate
- 1x white 1x4 brick
- 1x grey 4x6 plate
