MODULAR PUB

alternate build for 10264 Corner Garage
part 2 - first floor

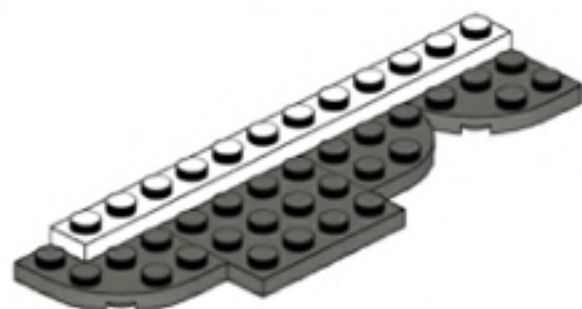

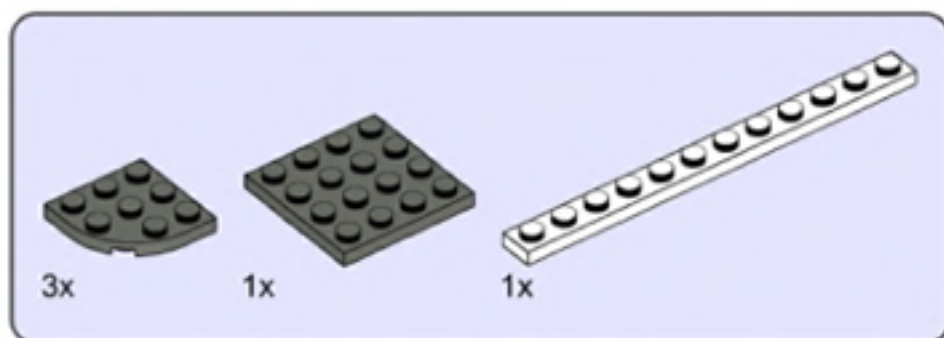

Hej brick fan, thanks for purchasing this building instruction. Unfortunately we had some problems with illegal re-sale/distribution of building instructions that were originally purchased from rebrickable.com. To make it harder for thieves in the future, I have watermarked some pages of these building instructions with a short version of the notice below. Thank you for your understanding.

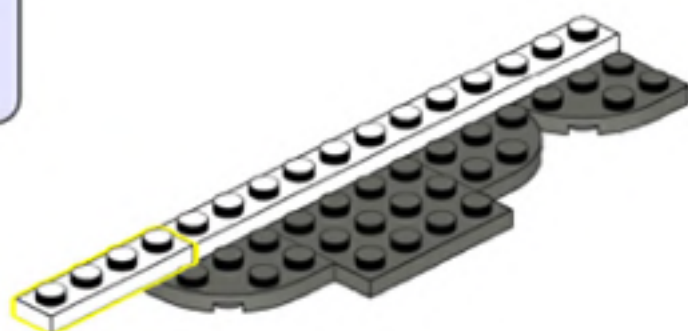

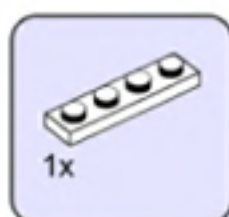

This instructions file is exclusively available for sale at <https://rebrickable.com/users/Versteinert/mocs/>. If you purchased, downloaded or received it from any other source, including by email after purchasing the parts, you probably received an illegal copy of the original file.

This building instruction may not be copied, reproduced, published (neither online nor printed), exchanged, changed or resold in whole or in part. The finished model is for private use only. Re-sale requires my express written approval.

Press down the roof near the gable wall. Be careful not to press on the hinge plates above the dormer.

117

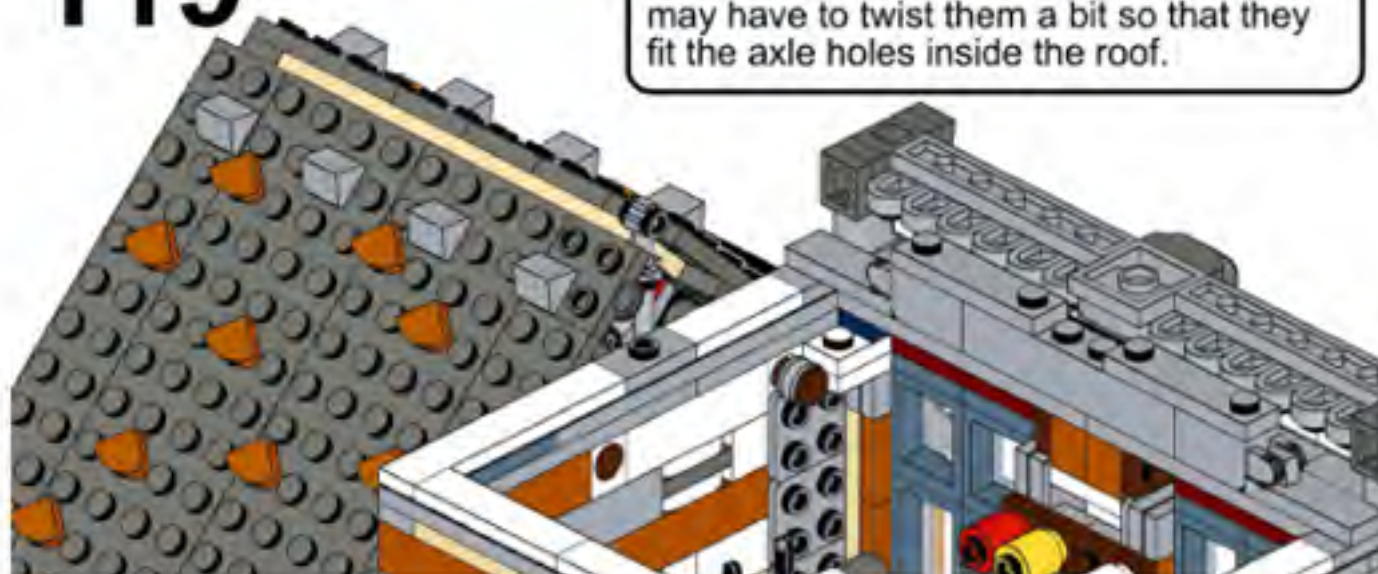

118

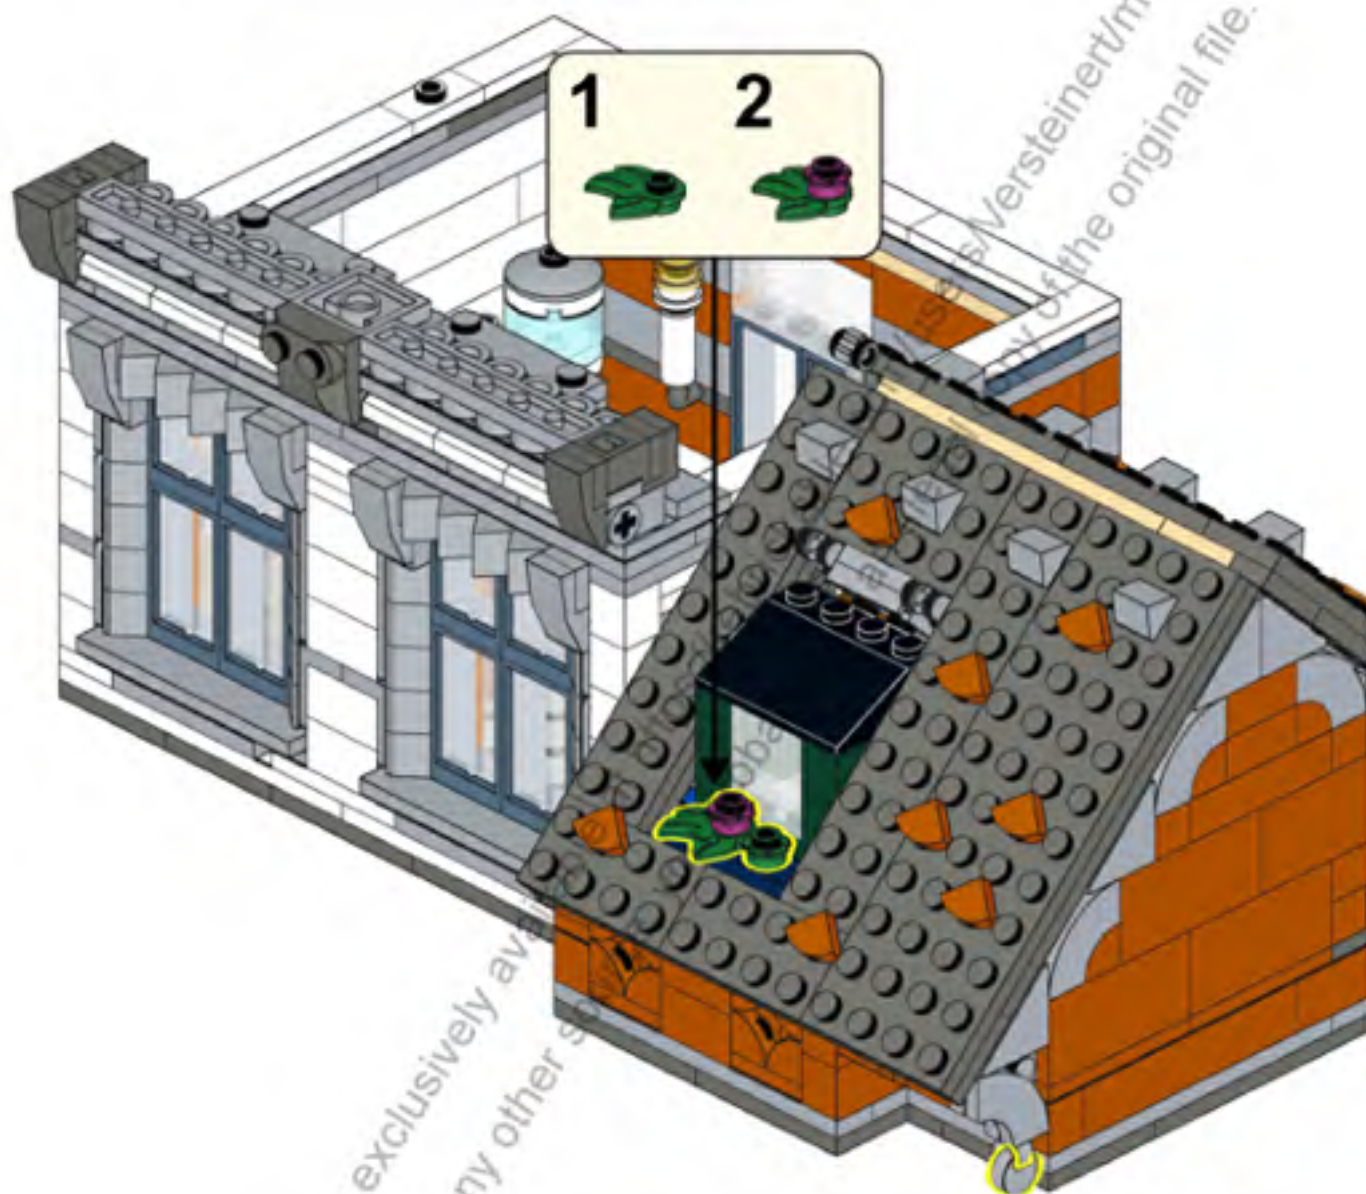

119

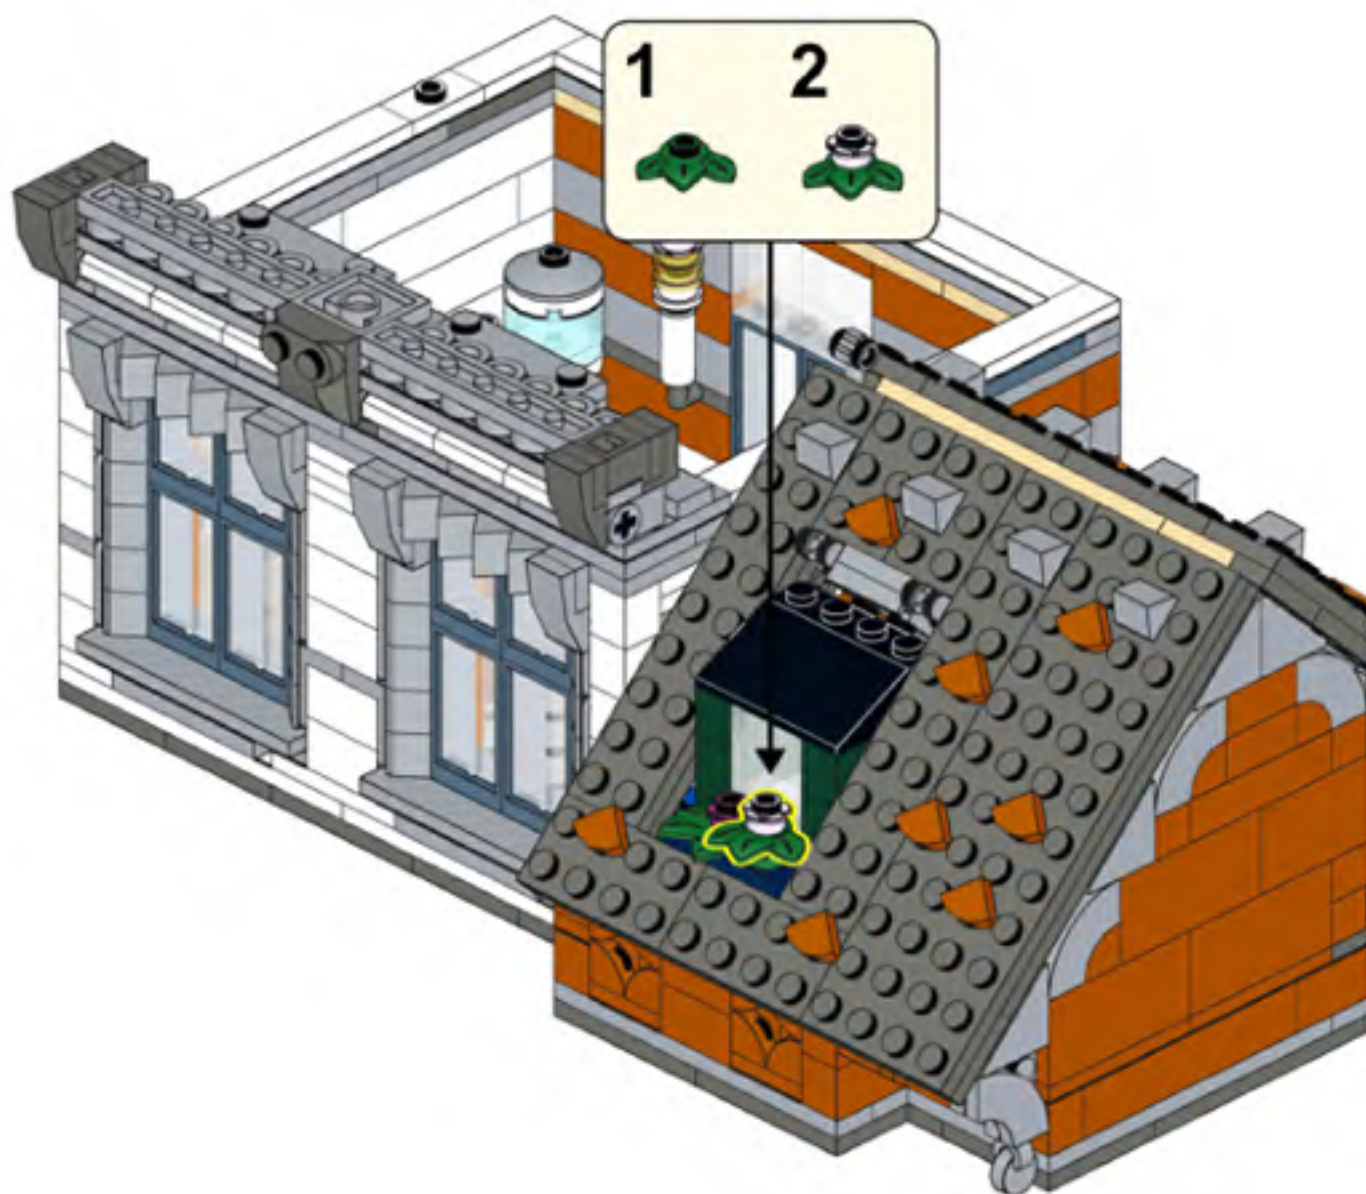

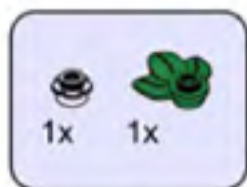

Push the axles in as far as possible. You may have to twist them a bit so that they fit the axle holes inside the roof.
