PLEASE READ:

These trans-clear pieces are for support. The legs of the shuttle are pretty strong and sturdy, but it will still need some support from the middle. This build is very large, at over 2500 pieces. Its your choice if you want to use these for support or something else of your choosing. But for now, I would recommend putting them on because you are still going to be building and adding on pieces to this ship.

And try not to flip the build upside down to put these on. Try to just tilt and lift it up a bit and attach them. You are going to be building the 4 landing legs shortly after this.

This ramp is goes on the back underside of the shuttle. It is detachable. Its up to you wheter or not you want to add the ramp to the build.

897

PLEASE READ

Don't actually flip the shuttle over upside down. This is just to show where the ramp attaches.

898

899

These carbonite blocks are optional. Its your choice if you want to build them or not.

900

901

902

903

904

905

906

907

908

You can go back a few pages to build 2 more of these carbonite blocks.
