This diagram illustrates a 3-phase motor winding connection in a star (Y) configuration. Three black cylindrical coils are arranged in a triangular pattern. Each coil has a blue terminal with a '+' sign. The blue terminals are connected to a central point, forming the star. A black terminal with a '-' sign is also shown, connected to the star point. A black terminal with a '+' sign is also shown, connected to the star point. A black terminal with a '+' sign is also shown, connected to the star point.

This diagram illustrates the assembly of a 4-wire terminal block. It shows a black terminal block with four slots, each marked with a blue plus sign (+). A blue screw is shown being inserted into one of the slots. To the right, a separate black component, likely a cover or a mounting bracket, is shown with a circular opening and a slot for a screw. The background is a solid dark green color.
