You can add those hinge plates at the three spots marked on the picture! (You have to take out the black 1x2 plates.)

Unfortunately I couldn't integrate them into this model in Stud.io for multiple reasons, but it works in reality!

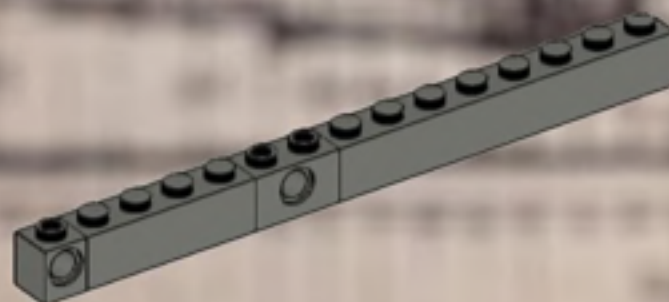

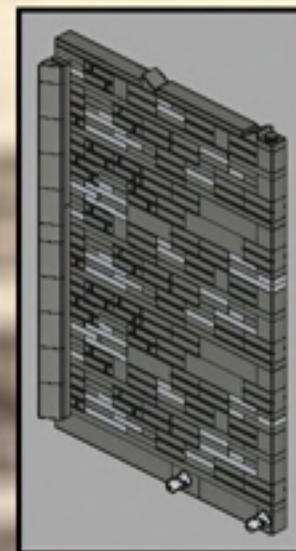

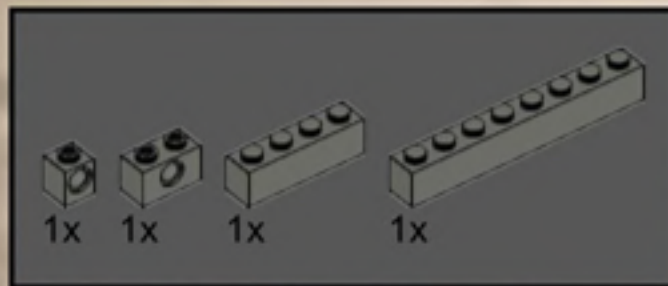

The next part of the build is optional.

It only makes sense to build the wall if you want to display Diagon Alley in the closed-off variant (where the buildings are facing towards each other)!

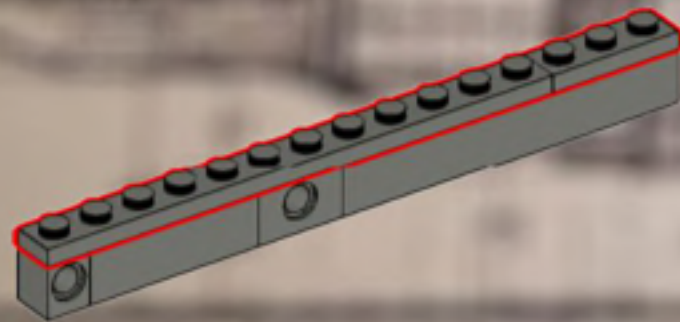

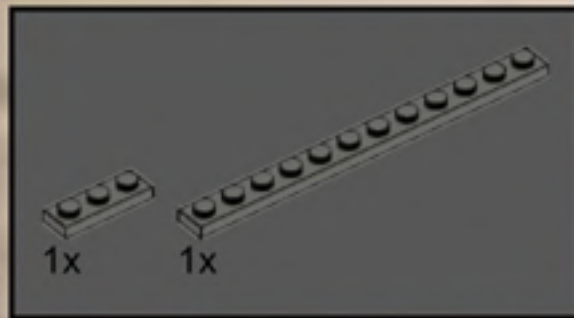

Once you built the wall you will be able to connect it to whatever Diagon Alley module you want:
