171

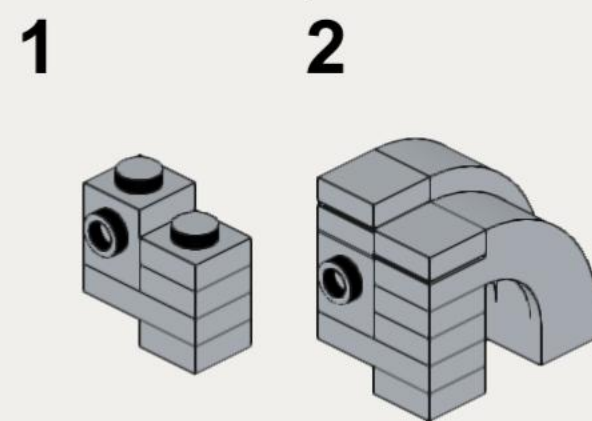

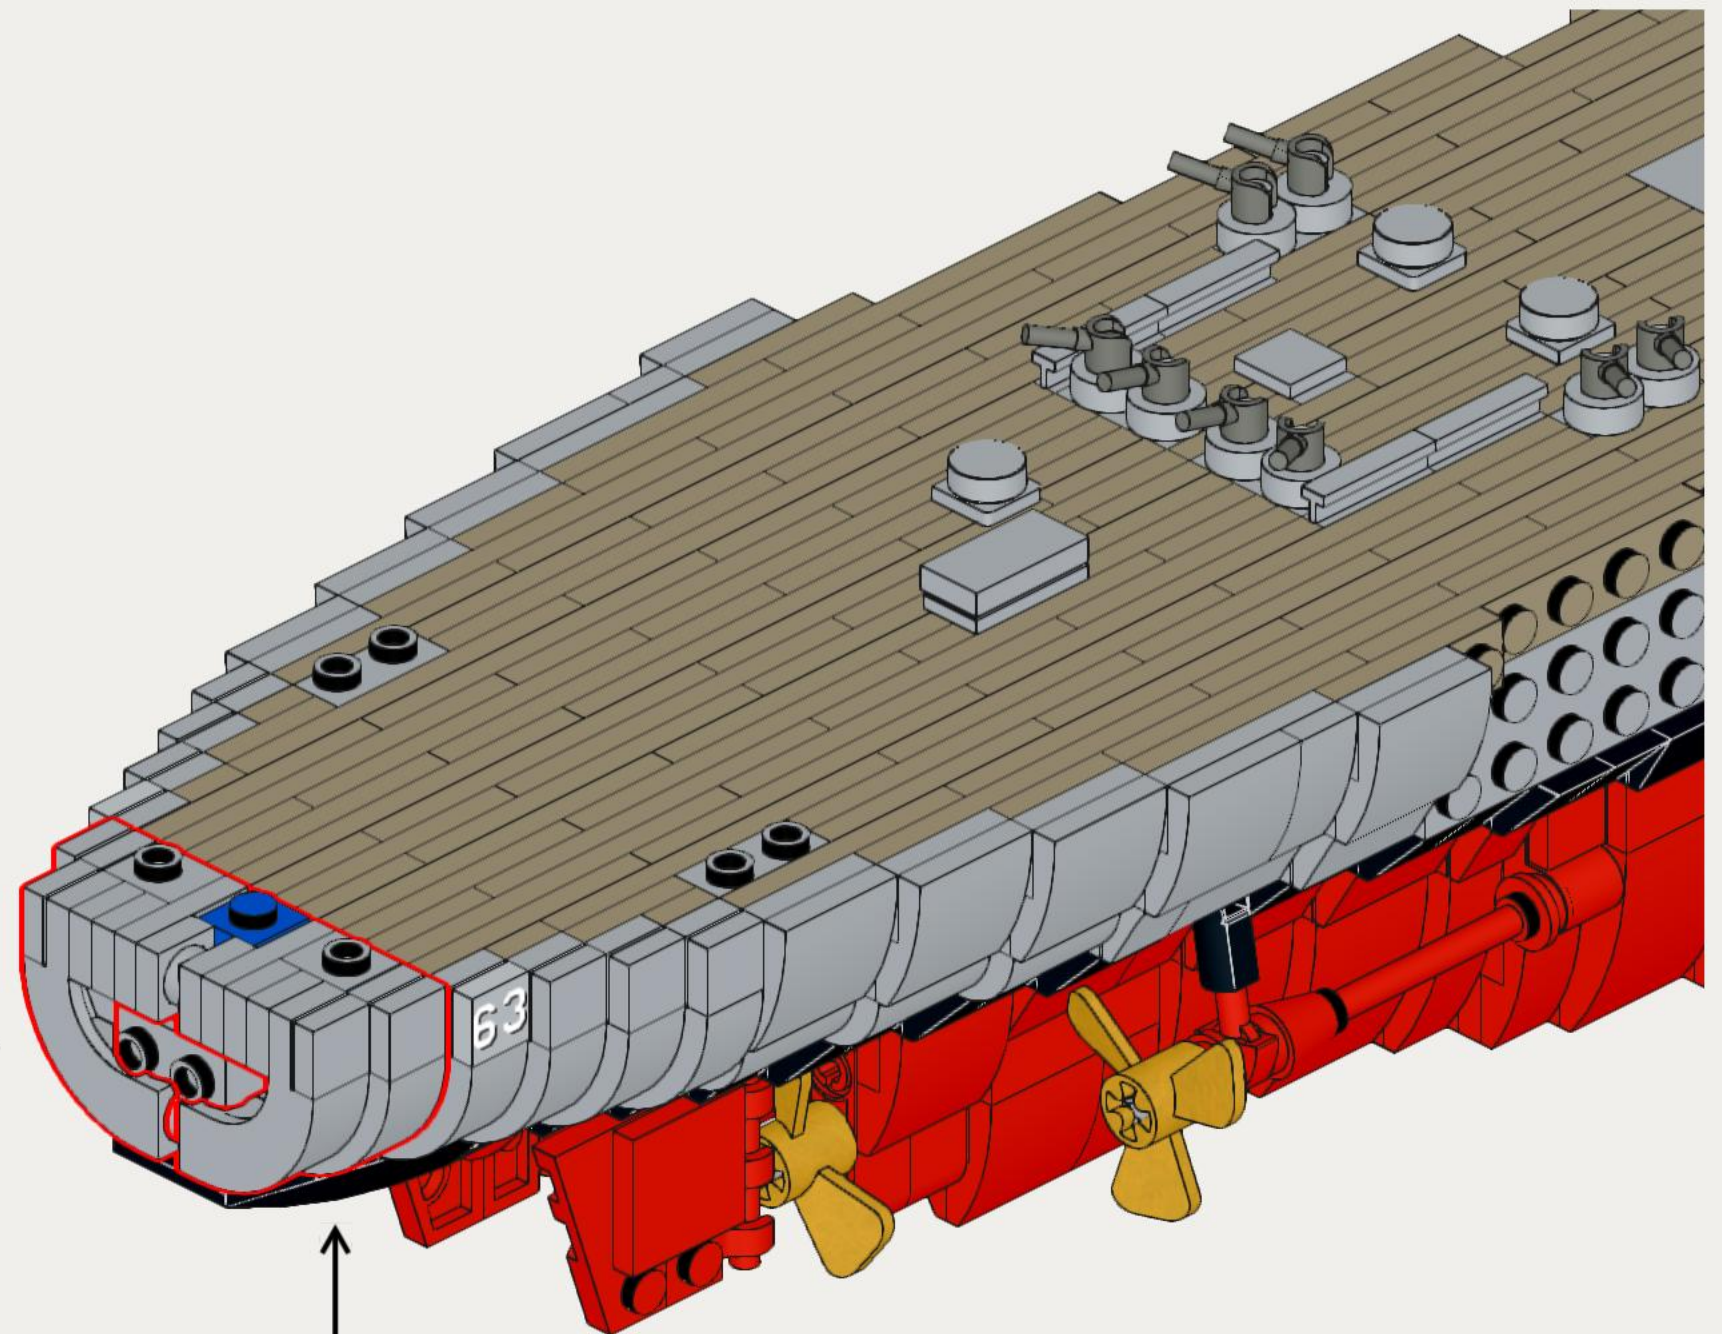

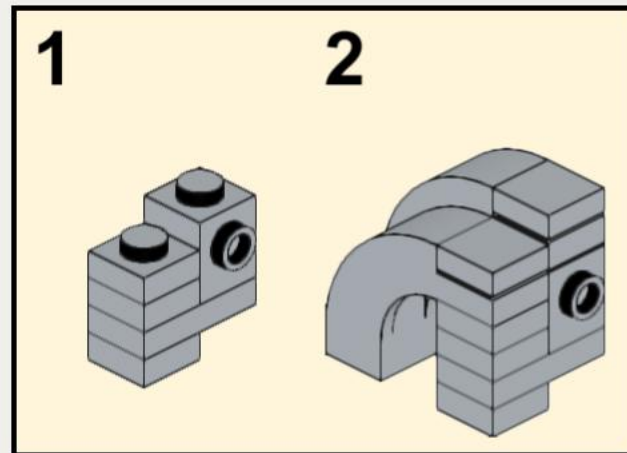

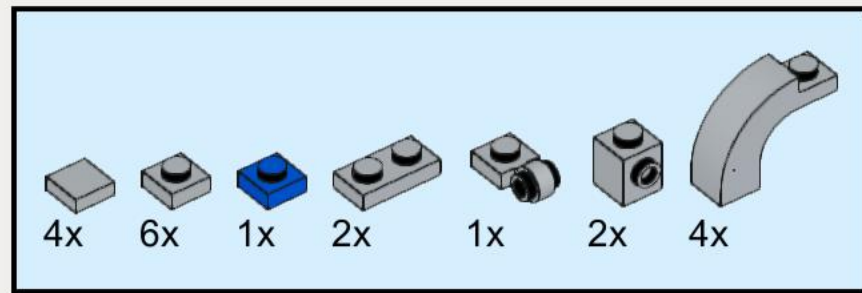

172

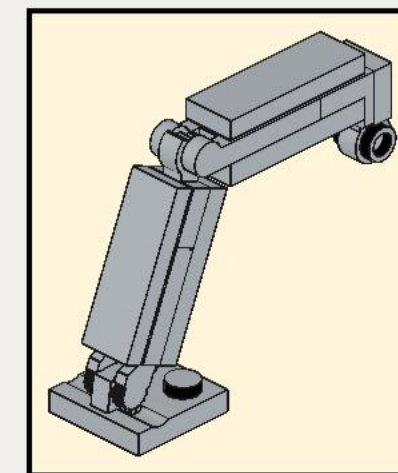

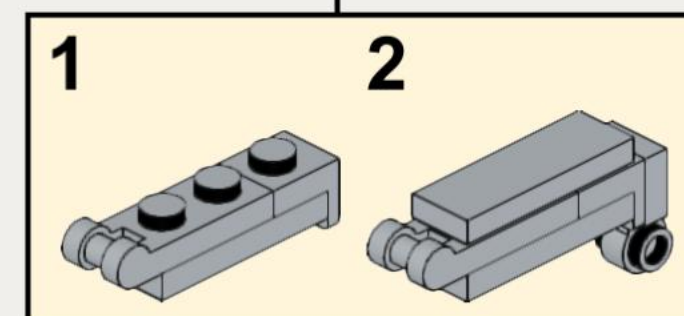

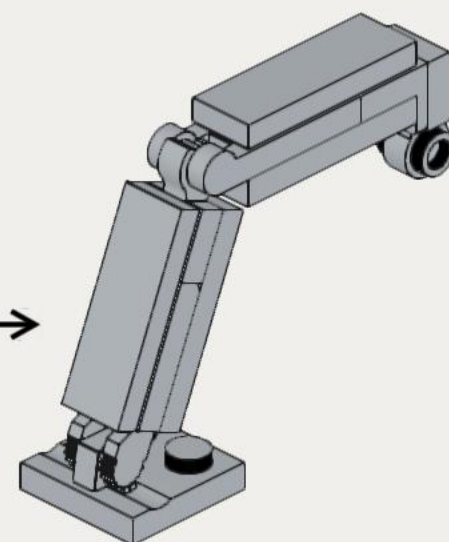

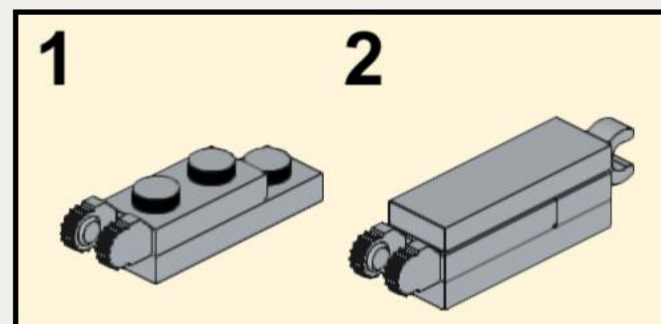

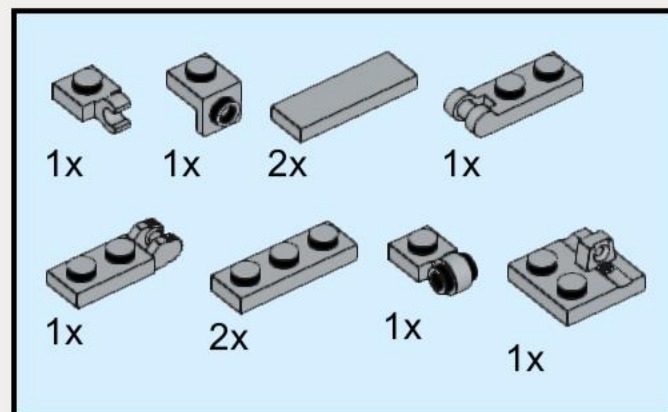

Carefully adjust the clip's angle and position so that the propeller shafts are parallel to the ship's fore/aft axis.

Do not push the bars in all the way, but just enough so that the clip aligns with the gap in front of the propeller.

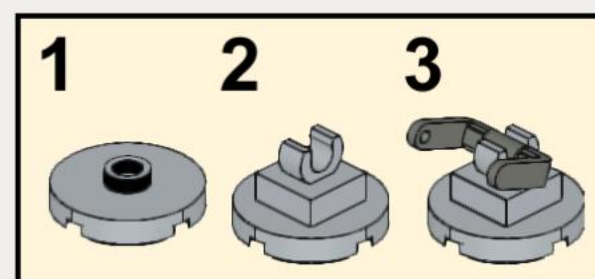

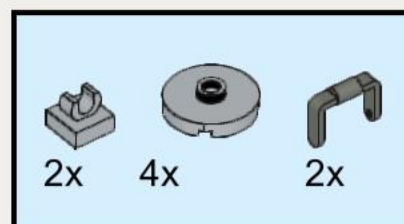

173

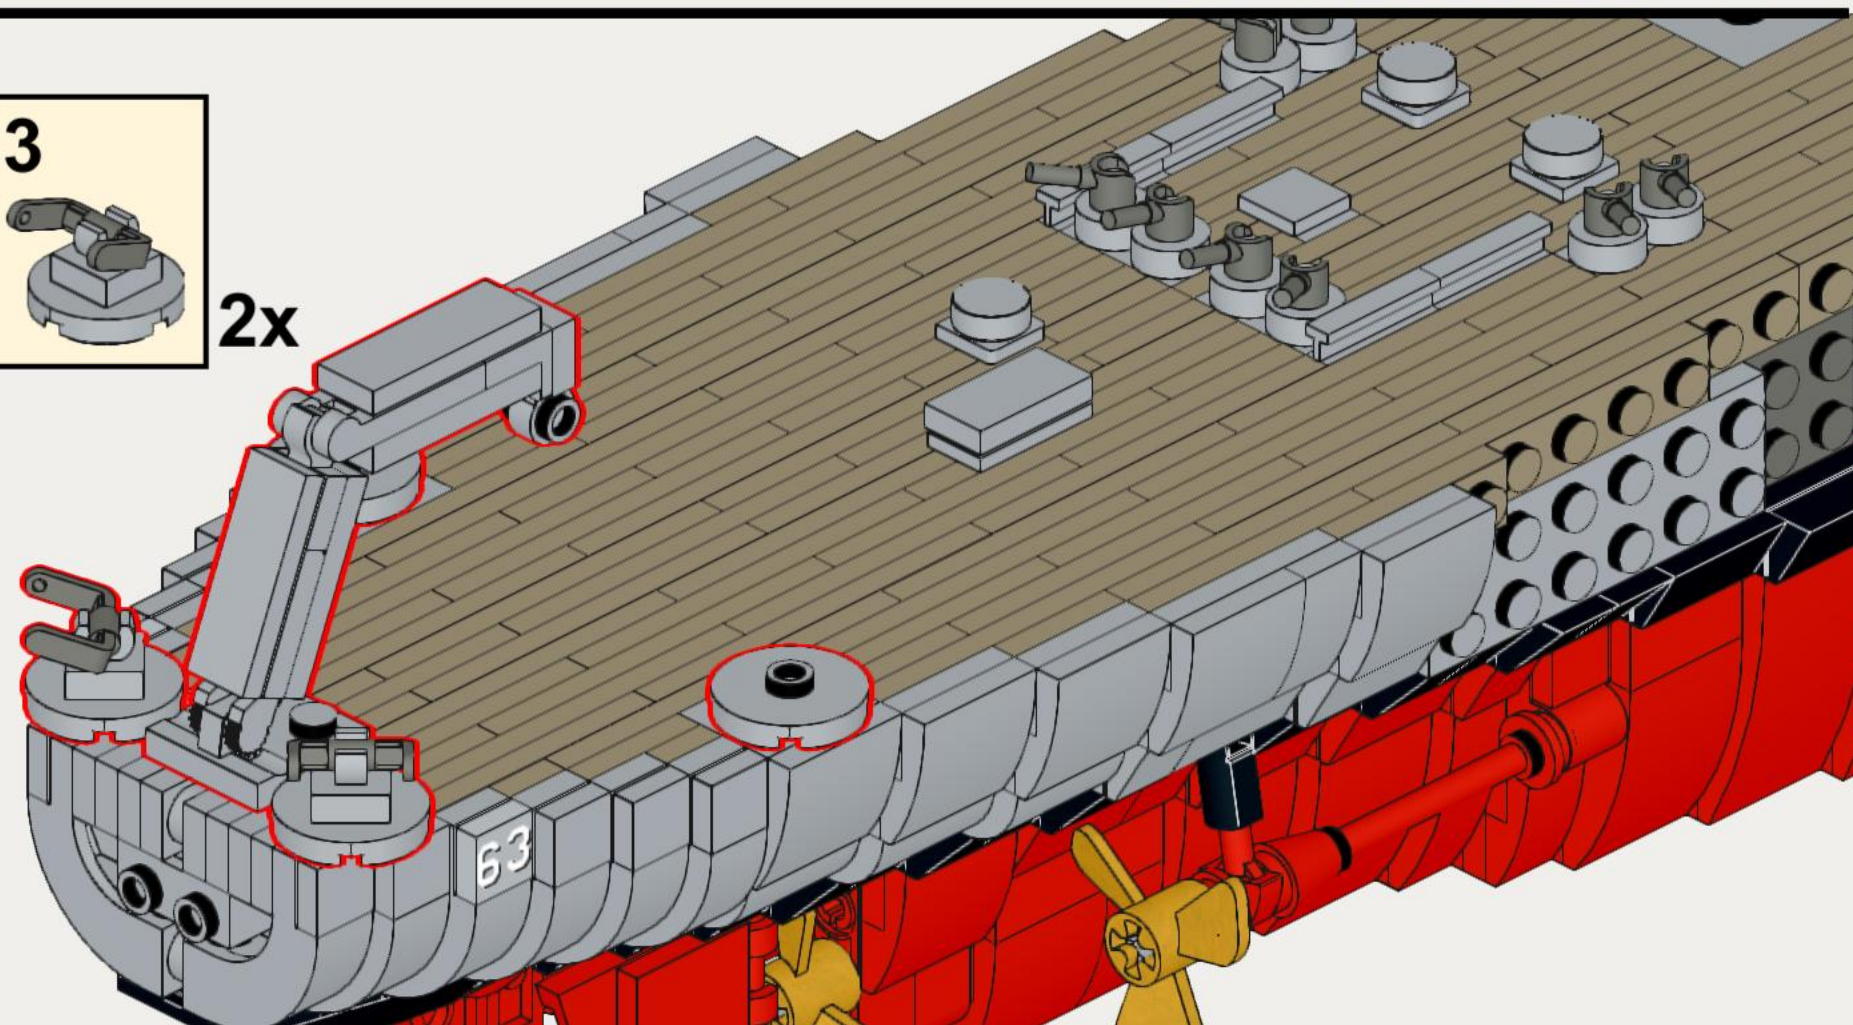

174

238

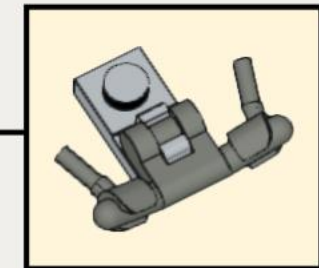

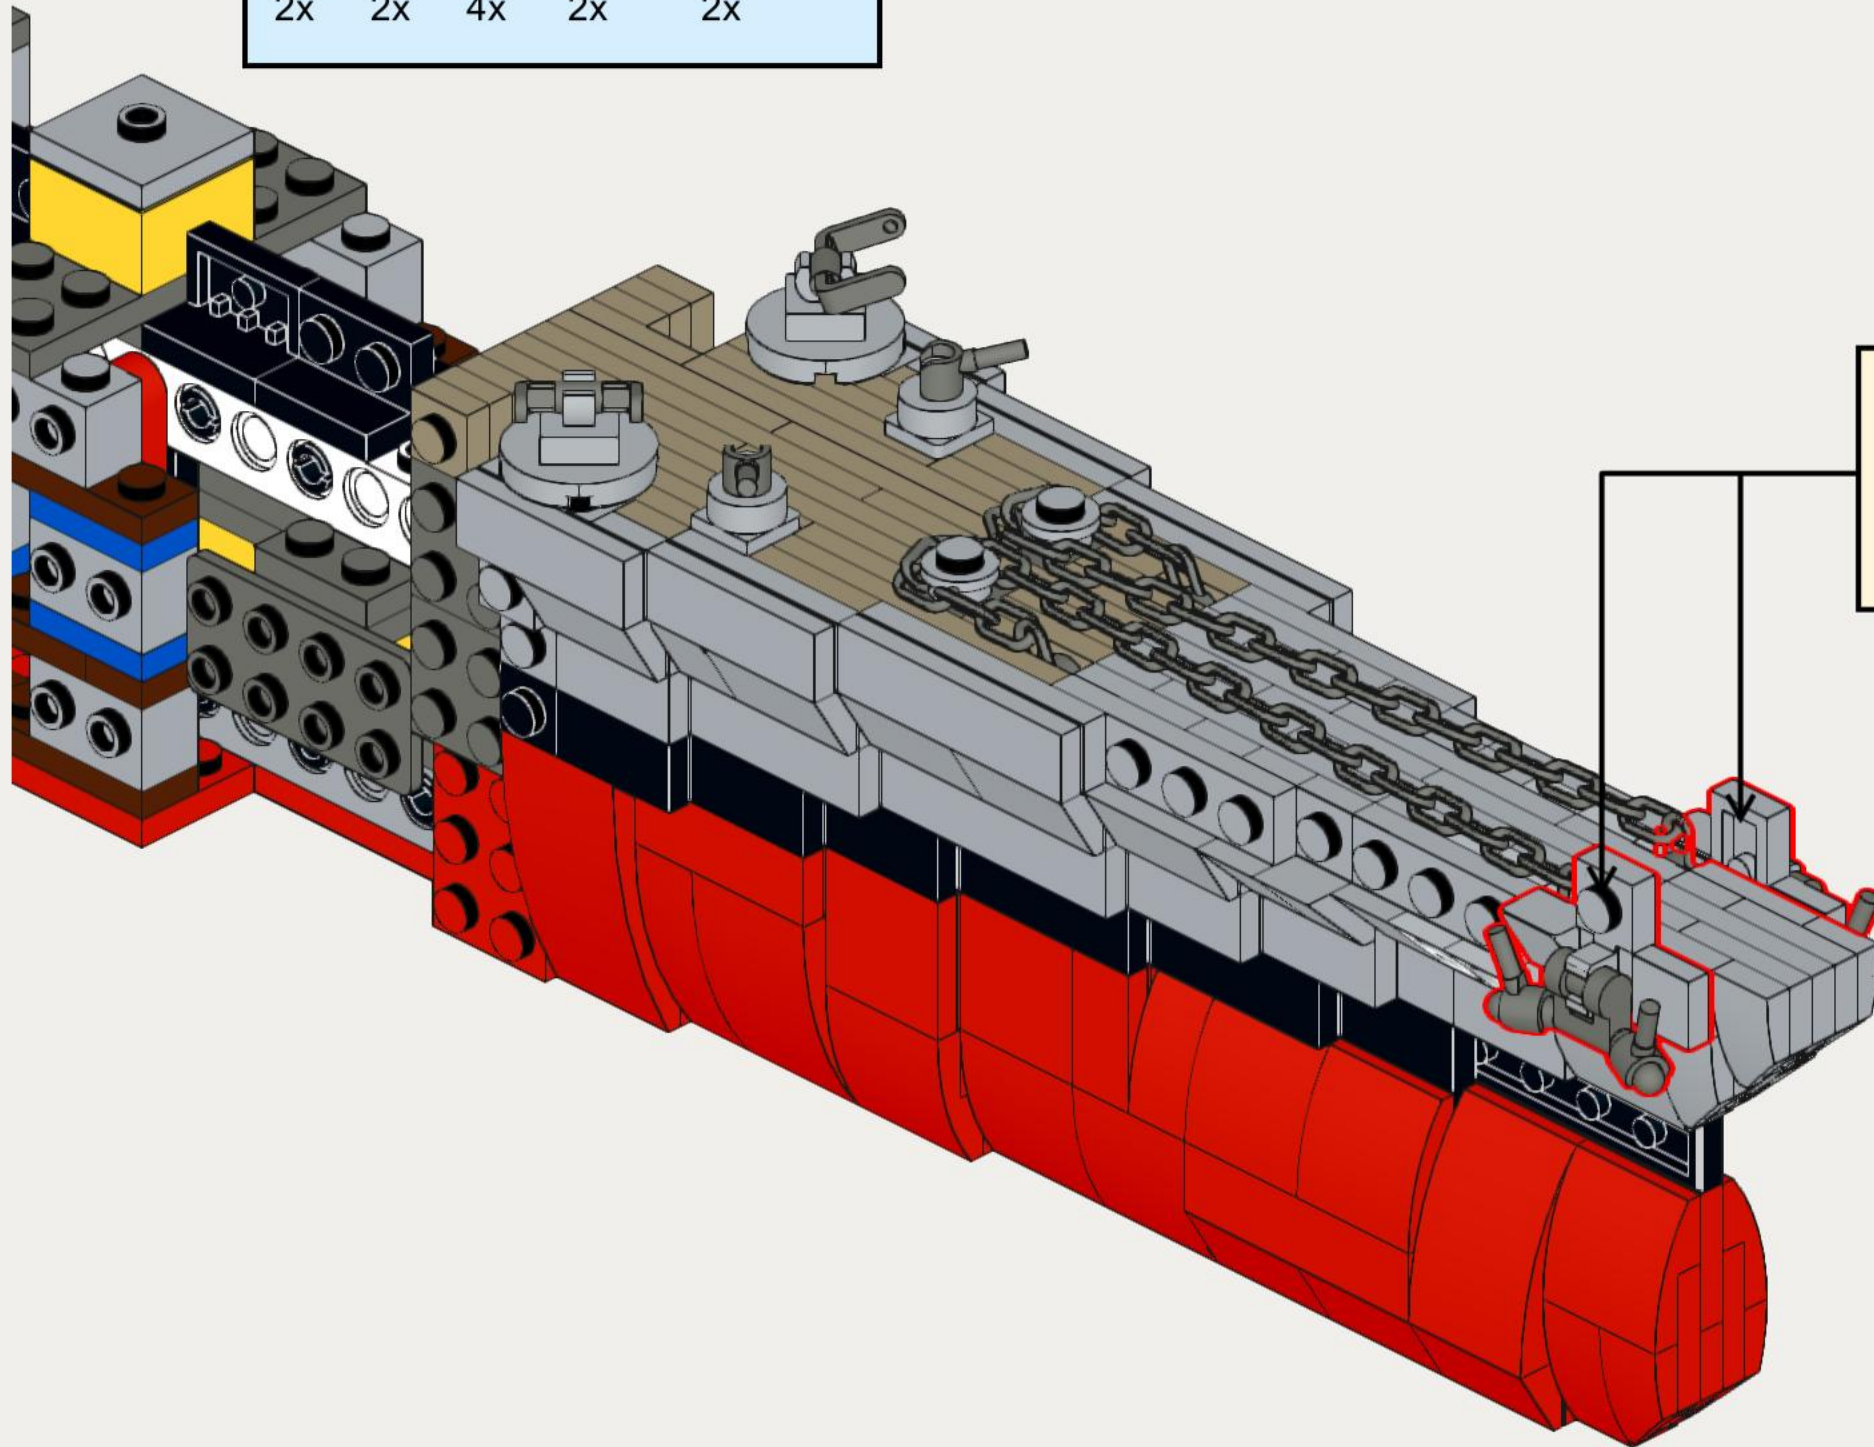

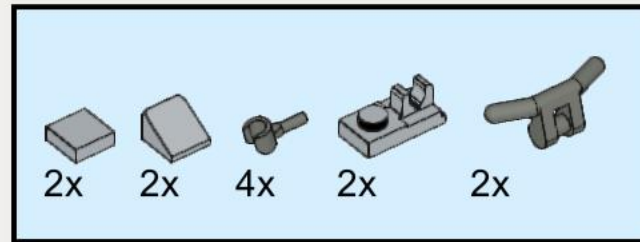

Adjust the chain tightness by turning the forward end pieces.

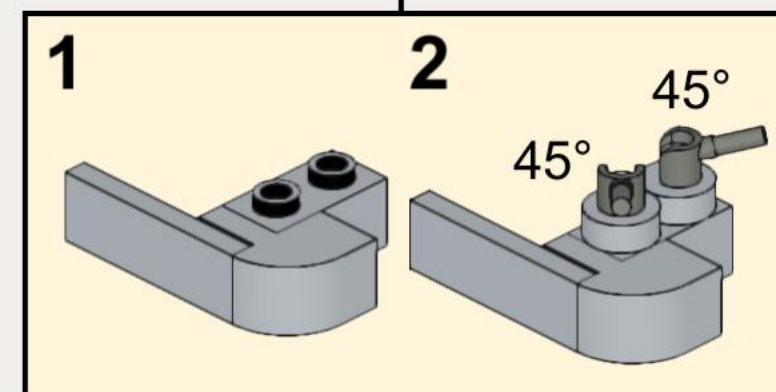

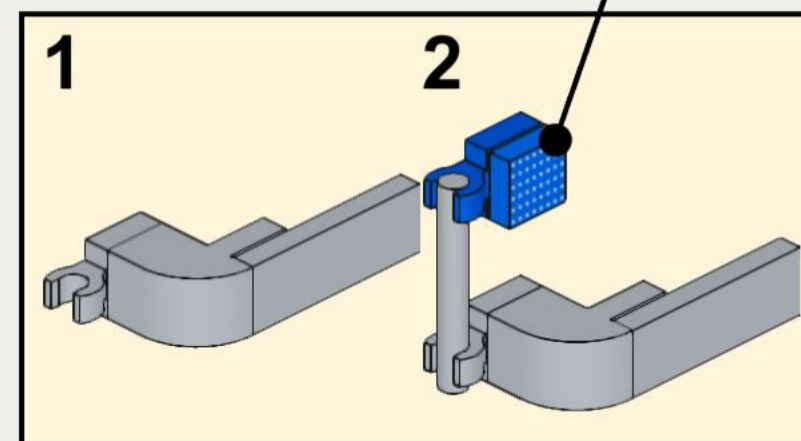

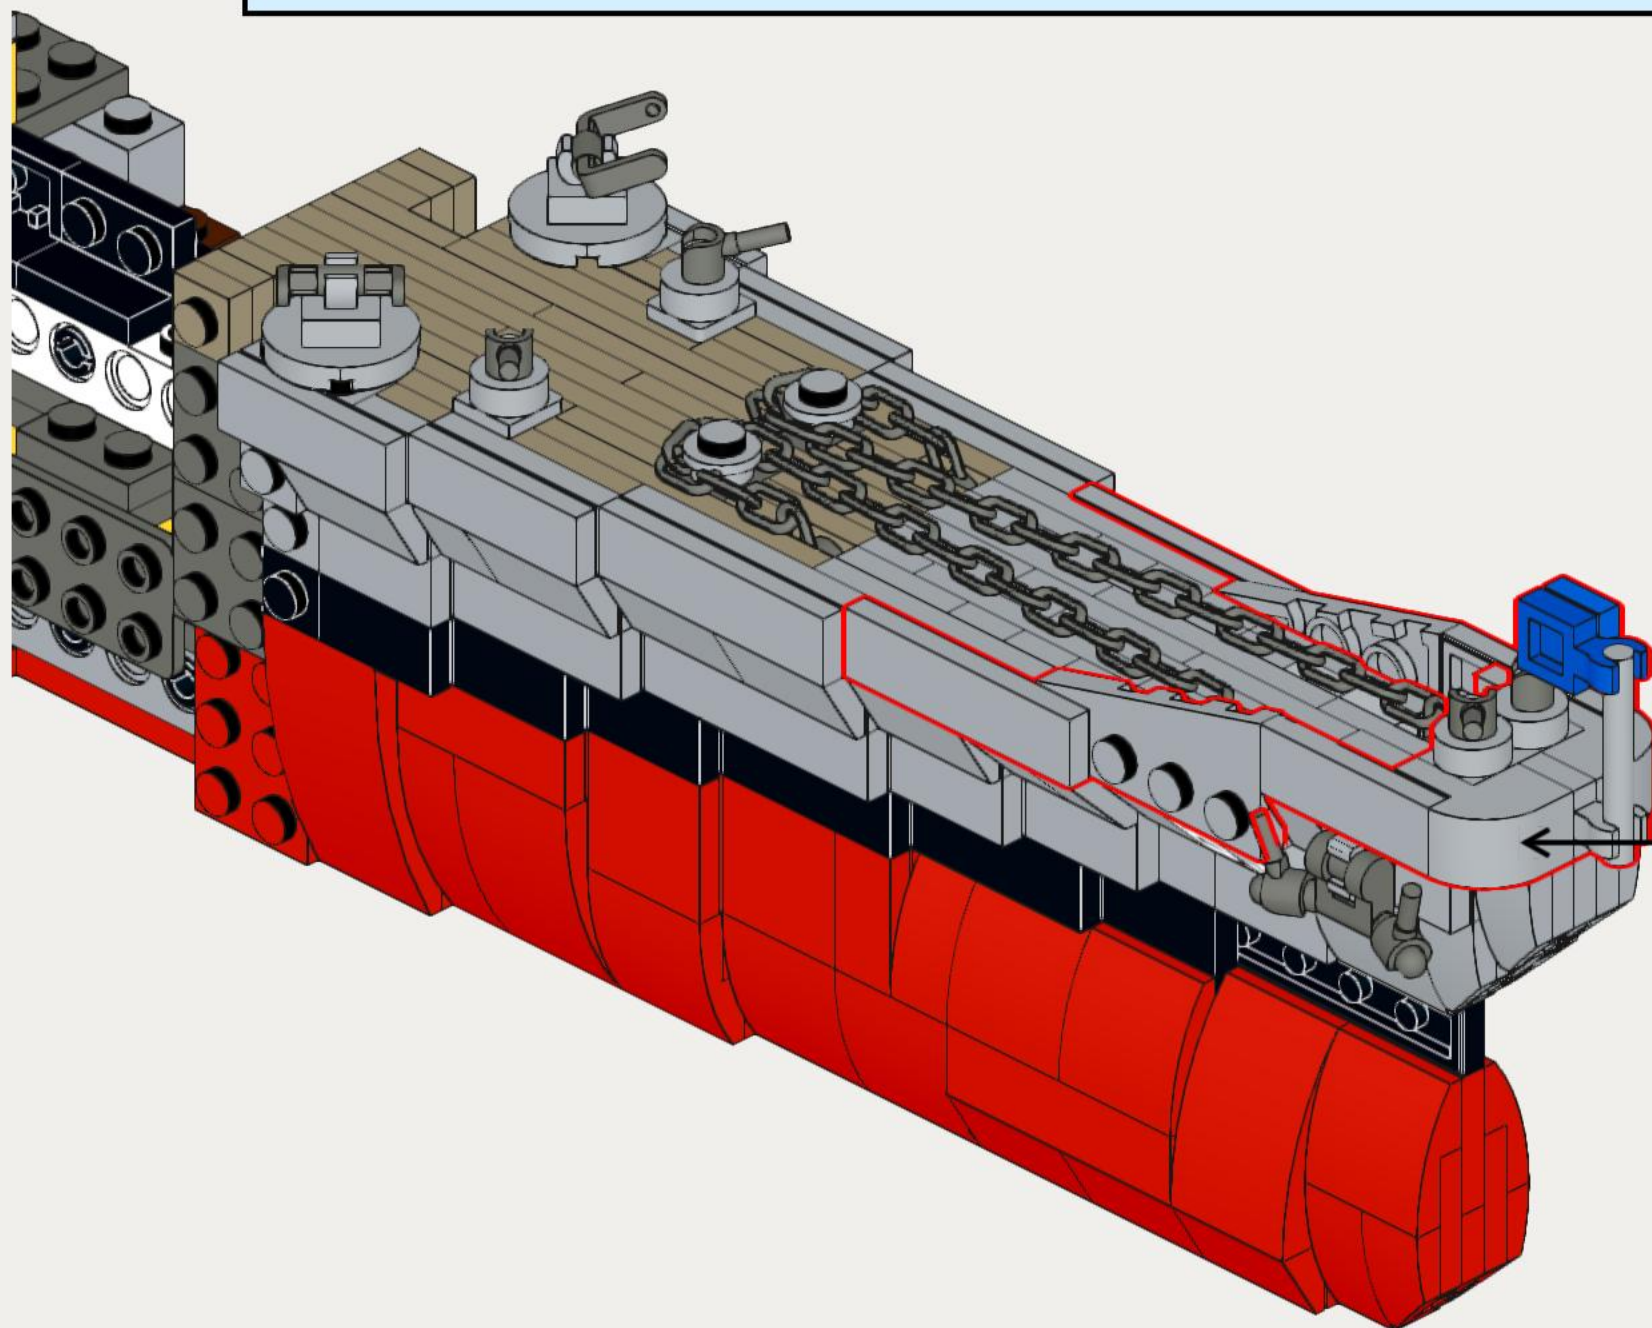

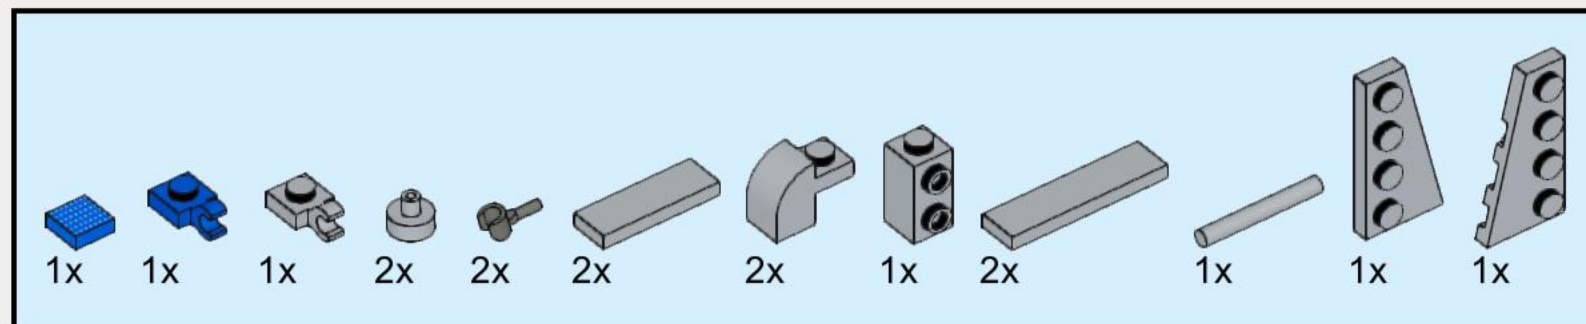

The chains should be straight, but without stress.
